FOR IMMEDIATE RELEASE

S2, BANGLADESH (Op Cancelled). Members of the Korea DX Club had to cancel their operation from Dhaka due to a civil war that broke out in the city. The KDXC team mentions that the "Situation is chaotic", and the team was going back to Korea. Unfortunately, the team's callsign S21KD was cancelled when they first arrived, and they tried to get a new license. However, Friday and Saturday were holidays in Bangladesh. They did get a new license on Sunday, S21ZCY, and moved to another location 2 1/2 hours away. The team hoped to be on the air that day but could not retrieve the radio gear from the airport. Safety was the team's first priority, so they cancelled and headed back home. They hope to get another chance to operate from S2-land soon. For more details and updates, please visit the following Web page at: http://dxpedition.co.kr

Here are the most important changes introduced by the new Law 53/2009, for the Amateur's services in Portugal:

* Introduction of 3 new Ham class - named: 1, 2 and 3 - that will co-inhabit with the actual 3 (closed for new admissions A, B, C). So from now all 6 class will co-exist.

* Minimum age to became HAM will be 12 years old (actually 16 year old).

* The entry-class will be mandatory class 3.

* Entry class 3 amateur=B4s radio must:

  * stay 2 years, minimum, on that class;

  * use 5 year maximum to apply for a class 2 permit. If they fail to get that permit they will lose the CAN;

  * use his station for reception only. For transmission they must use another licensed (from other class) amateur-radio station. In this case the presence of the owner is mandatory, acting as supervisor.

* The old "station permit" is extincted, being substituted by the CAN

- National Amateur Certificate (who allows a main fixed station, one additional fixed station, a mobile station and a portable station).

* Automatic renewal of CAN that have a initial 10 years validity.

* Creation of community stations - club stations.

* Creation of IOCA - special callsigns valid for one year.

The new Law will be effective on 1st June 2009.

CT-Spot News Team.

FOR IMMEDIATE RELEASE

VK9LA NEWS RELEASE MARCH 12TH

LOW BAND OPERATIONS.......

Extensive work has taken place to make sure all operators are familiar with various sunrise sunset times throughout the world.

Lord Howe island Sunset is at approx 07.36utc with Sunrise being 19.36utc (taken at 27th March 2009). We have all been familiarizing ourselves with possible propagation openings for all points of the globe.

A complete list in an ascending pecking order will be at every HF station for operators to continually check. It is our plan to have an operator on deck on 160m from 07.40utc daily to work all the Pacific areas followed by various parts of Asia somewhere around 08.50utc. From then we will look towards South Americas at around 09.35utc thru to approx 10.15utc when we will begin looking for W1 in USA at approx 10.30utc then head to again some parts of Asia and then VE3 and W4 around 11.30utc as well as TI and XE areas. UA9 around 13.30utc followed by W6 etc.

At approx 15.00utc we will begin searching for the likes of EK, 4L, UA1 followed by 4X at 15.45 and then the likes of 5B.

Hopefully we will get a shot at South Africa around 16.15utc then head up again into EU territory to LZ around 16.35utc, HA and so on leading up to I, LA, OZ, HB and G lands at 18.20utc.This procedure will be done every day we are there. This will also be adopted on 80m as well as 75m as we have 2 stations on air simultaneously on the same band, as well as 40m. We expect big long openings on all bands below 20m. We would however request that you be patient. It will take us a couple of days to install all low band antennas.

We would also request that once you are in the log to please do not call the next night, let someone else have a go�� my pet hate is to see the same station in the log on the same band over and over.

Cu in the pile ups....... Bill VK4FW.... Dxpedition Leader

Ham Radio on Venus! It's not April yet, so this is for real. The Japan Amateur Radio League (JARL) and JAMSAT, the Japanese amateur satellite organization, are working with the Japanese University Space Engineering Consortium (UNISEC) to send an amateur radio payload to Venus as part of the JAXA Planet-C Venus Orbiter mission planned for next year. According to the AMSAT News Service, UNITEC-1 will transmit a CW beacon at about one bit per second. Hams around the world will be invited to listen for the signal and to help with two major science goals:
1) development of technologies to receive and decode very weak and low bit-rate signals coming from deep space; and
2) development of technologies to estimate the orbit of the satellite and the Doppler shift of its signals based on the received RF signals. These technologies will be necessary for tracking and receiving signals from satellites in deep space. More information (in English) will be on the UNITEC-1 site at: http://unitec-1.cc.u-tokai.ac.jp/en/news_en.

PJ2 = Curacao.   PJ4 = Bonaire.

Return the card in the SASE, (or in the SAE if sufficient postage money or IRC is included) if there is one, with the note that you don't operate from Curacao.

If they mis-copied the callsign, they don't have a valid QSO. No point in sending it the Jim. He'll just do the same, and one of you is out postage. If you return it in the SASE, neither of you is spending his own money to return the card.

If there is no SASE, throw out the card.

Then, next year, come down and join us!

(it'd be a lot easier to keep 'em straight if they'd do PJ1=Aruba (I
guess P41 these days), PJ2=Bonaire, PJ3=Curacao. Keep 'em in order!)

Yeah, that's what I've been beginning to think.

KH4, MIDWAY ISLAND. It was announced this past week by Tom/N4XP and Dave/WB4JTT (edited): "A multi-national team of 19 operators will activate Midway Island in October 2009. The U.S. Fish & Wildlife Service (USF&WLS) has authorized amateur operation from this rare U.S. entity for only a 10 day period, its first radio activity in almost 10 years. Midway Island ranks number 24 worldwide and number 13 in Europe on the DX Magazine's "Most Wanted List". Activity will be on 6 meters to 160 meters with 5 to 6 stations. At least one station will be active on 20 meters around the clock for those who need it for a new country. Major efforts will be made to meet the demand to the most needed geographical areas, the low bands and RTTY. Team members are Joe/AA4NN, Carlos/EA1IR, Franz/DJ9ZB, Kimo/KH7U, Antoinette/KI6TVS, Jon/KL2A, Don/N1DG, Paul/N4PN, Tom/N4XP, Jeff/N6GQ, John/N7CQQ, Dave/WB4JTT, Charlie/W6KK, Bruce/W6OSP, Art/WA7NB, Janet/W8CAA, Joe/W8GEX, Byron/WA8NJR and Vrata/OK1KT. Off site support is being provided by Don/AA1V, Dan/W5DNT and Paul/W6XA. Travel to Midway is only allowed by chartered aircraft. Because of the size of the aircraft, the team is presented with unique challenges. As such, the aircraft will only be able to carry the team requiring the equipment to be shipped by boat some months ahead. Adding to the high cost of transportation, daily fees and other charges established by the USF&WLS makes this operation very expensive. A Web site has been established and can be found at:
http://www.midway2009.com
Please support this endeavor by sending a donation. To make it easy to donate you can contribute electronically using the Web site or if you choose regular means you may do so. Instructions are given on the Web site for either method. Updates will be published on the Web site as they become available..... Tom/N4XP & Dave/WB4JTT (Co Leaders for Midway Island 2009)"

WH6, HAWAII (Very Rare County). Attention county hunters! It was announced at the Maui Amateur Radio Club (MARC) this past week that the extremely rare Kalawao County will be activaed on 40 and 20 meters, March 30-31st. MARC member, Jayson Kohama, WH6BXK, is expected to work there on those particular days. After he gets off work each day, he plans to be on HF making as many contacts as possible. His station, WH6BXK, will be on the air each day after 1800 local (6:00 pm or 0400z). He will be on 7188 kHz and 14335 kHz. Kalwao County is one of the rarest USA counties. It is the 2nd smallest county and the poorest in the USA. It is located on the Kalaupapa peninsula, on the island of Molokai. It is the old Hawaiian leper colony. Because it was a leper colony, it was totally isolated from the rest of the islands and had its own separate county government, which was administered by the state. Hams must have special permission to go there and operate. Thus it is extremely rare for any ham signals to ever radiate from Kalawao.

XR1, CHILE. Members of the Radio Club La Portada will be active as XR1A during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via XQ1IDM.

The final logs have been uploaded to the Web site. Please QSL direct via Lee, ZL2AL: 87 Auckland Road, Greenmeadows, Napier 4112, NEW ZEALAND. For a direct response, you must enclose a self-addressed envelope (SAE) and at least 2 USDs or 1 IRC to cover the return postage, otherwise they will respond via the Bureau system. They will also reply to QSLs sent to them via the ZL Bureau, and they will upload their logs to the "Logbook of The World" (LoTW) by September this year.

Many of you will be unaware that the GB3MCB beacons comprising beacons for 2m 4m 6m and 70cms are due to be switched off on April 2nd due to lack of funding. Full details of the background to this will appear in a forthcoming 'Six News' but in brief, the Mid Cornwall Beacon and Repeater Group, which has a relatively small contributory user base, has insufficient funds to run all of the transmitters associated with the group. The groups main function until recently has been the upkeep of their 2m and 70cm Repeaters but they have now become responsible for the beacon system also. Read more about it and discuss:

A LITTLE SOLAR ACTIVITY: The sun is in the pits of the deepest solar minimum in almost 100 years. At such a calm time, even a little solar activity is remarkable. Here it is. SOHO recorded the movie on March 16th; it shows a minor CME billowing away from the sun's eastern limb. When the sun is active, we see several

such CMEs on a daily basis. Now the rate is about one per month. That's very little solar activity.

The reason Steve is going earlier than first announced, is that he has been asked to give a presentation on DXpeditioning at an "Amateur Radio Roadshow" being held by MCMC, the Malaysian licensing authority, on Saturday, March 21st.

ANOTHER ANTARCTIC OP & CRUISE IS BEING PLANNED. Mehdi, F5PFP, announced this past weekend that he is in touch with several French skippers for another planned expedition to the Antarctic area to take place in 2 years. He stresses that this is just in the "PROJECT stage", not an official announcement!! The itinerary would be more or less the following:
  Machu Picchu + Republica del Ecuador refuge (King George Island)
  Cerda traces station (Deception Island)
  Maldonado (Greenwich Island)
  Portal Point traces station (West Graham island)
  Port Circoncision (Petermann Island)
  Yelcho (Doumer Island)
  Melchior (Observatorio Island)
  And possibly a few more bases/refuges
Mehdi states this kind of expedition will take a long time to prepare because of the high cost (+/- 6000 Euros per person). If you wish to be part of Mehdi's team, send an E-mail to him at: f5pfp@aliceadsl.fr

DAYTON HAMVENTION DX ACTIVITIES. The SouthWest Ohio DX Association (SWODXA) is pleased to announce the speakers for this year's DX dinner to be held in conjunction with the 2009 HamVention. Their speakers will be John Stanley/K4ERO, and Ruth Stanley/WB4LUA. This husband and wife team travel the globe installing, maintaining and training personnel for religious international shortwave stations. They have been to over 60 DXCC entities and operated from more than 12 of them. John has written many technical articles in the ham journals (with one in the April 2009 issue of QST), is a recipient of the 2007 Doug DeMaw Technical Excellence Award and is an ARRL Technical Advisor, having contributed many pieces to the ARRL Handbook. When they accepted the invitation to be our speakers, Ruth commented that they have "....lots of interesting details about antennas and contest sites and DXing possibilities along with stories and more stories. I can hardly wait to hear what we'll say."

The dinner will be Friday evening, May 15th, at the Crowne Plaza Hotel, located in Dayton city center. Attendees will have their choice of either a steak dinner or a vegetarian dinner. They must be informed when the tickets are ordered if you want the vegetarian option. Tickets are 39.00 USDs per meal, payable in U.S. funds to SWODXA. (Sorry, they do not process PayPal or Credit Card payments.) Please advise if you want a vegetarian meal when you order. Order from Pete Meyer, N0FW, at his CBA. SASE is required or you may pick up your tickets at the door. They attempt to honor group seating requests when tickets are ordered together. There is not a bad seat in the house, but seating is definitely limited. Come join them for an evening of fun and fellowship.

As in the past, there will be some nice door prizes. Last year the main prize was an Icom IC-756 Pro III, but this year ICOM has promised them one of the first IC-7600's to be brought in to the United States! Up-to-date information may be found on the club's Web site at: http://www.swodxa.com Pete's E-mail address is: n0fw <at> live <dot> com.

Last year Yaesu joined them in sponsoring the DX forum during HamVention. They have agreed to partner with them again for 2009. There will be a FT-2000 with PEP raffled off at the end of the DX forum. The winner does not have to be present. Tickets for a chance on the FT-2000 are 5.00 USDs each or 5 for 20.00 USDs. For your convenience, they may be ordered at the same time you purchase your DX dinner tickets. All proceeds from this raffle are used by SWODXA to assist in providing DXpedition grants. EU-189. SPECIAL NOTICE by Theo, ON4ATW, about the Rockall operation (dated March 21st): "We are disappointed and surprised to read the news on some web pages and DX-bulletins about our planned operation from Rockall Island sometime this year. Apparently one of the organizations where we filled out an application form in order to receive sponsoring has abused this information and distributed this without notice to us. Sadly all information on those web pages and personal blogs is misleading and definitely not correct! Please be advised that any information will be forthcoming from me ON4ATW or at least will carry my signature in order to inform the DX community with real and up-to-date information. We are at a critical phase in preparing this expedition and releasing info at this stage could jeopardize the whole operation. Therefore, I ask you, our audience, to standby until accurate and inside information will be released once we have the feeling it is time to do so. Up until now nothing is official and we do not agree with individuals sending info to the DX-bulletins without prior notice to one of the actual Rockall 2009 team members."

NA-192. (Op Delayed) The date for the VX8X DXpedition has been moved back two weeks due to the requirements of the ongoing drilling operations on Ellice Island. The video should be ready by September 2009 and will sell for 25.00 USDs. But by ordering now, you reserve an early copy of this collectors' item at a discounted price of 22.00 USDs. As always, this includes shipping and handling. To reserve your copy, go to:

PJ2, NETHERLANDS ANTILLES (Contest Station Available). Geoff, W0CG (PJ2DX), resident caretaker of PJ2T, announced that nobody in the PJ2T club (CCC - Caribbean Contesting Consortium) is interested or able to operate the Curacao station for the IARU HF World Championship in July. Thus, the place is available if you would be interested in coming there as a Single-Op, or to organize a group operation. With sufficient lead time, Geoff could arrange for you to get a callsign of the form PJ2* (except that PJ2A, PJ2R, and PJ2T are unavailable). If you wanted to do a group operation that would include Geoff for a little bit of the operating time, you would be able to sign PJ2T. There's tons of info about the place at: http://www.pj2t.org Geoff is happy to respond to your questions by E-mail at: ghoward@kent.edu

CN8CG QSL ROUTE. If you recently used the QSL information on QRZ.com for CN8CG, the QSL route is not correct. The route did state QSL to Jules, W1GPY, but has since been removed. It was reported to OPDX that Jules ceased to be CN8CG in 1998 and was reissued. There is no QSL Manager list for CN8CG. According to HAMCALL, the callsign CN8CG was reissued in 2001 to Kamal Bella (Bloc, Kenitra, Kenitra 14000, Morocco).

The operation with 7 full HF stations from 2 separate sites, as well as one 6m station will be on the take air until April 3rd. Modes of operation are SSB, CW and RTTY. VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, who were expected to be active as VK9GMW early this week (possibly Monday), suffered a major delay due to weather. As of Saturday, March 21st, the operators are on Marion Reef and have been there March 17th. As this was being typed, their latest press release states): "It appears the Tropical Low has dissipated. If this is correct, a serious danger to us has been removed. Winds, however, are still near gale force and are forecast to remain strong at least until Tuesday. This means that we will not be able to leave for Mellish until Wednesday, the earliest. The soonest we are likely to be on the air from Mellish is Friday, March 27th. In any case, we will be able to extend the operation to make up for any lost time. While we continue waiting at Marion Reef for the weather to break, we are operating as HA7RY/MM and AA7JV/MM using a short vertical and 00W. Please follow updates at: http://www.vk9gmw.com

LAST MINUTE UPDATE: On March 22nd, the team reports: "We are still on Marion Reef. The weather has improved slightly -- winds are no longer 40 knots -- they have eased to 30 kts. The imminent threat of a hurricane has also been removed. Winds for tomorrow (Monday, March 23rd) are forecast to be 25 kts, seas 9 to 12 feet (3 to 4 meters). We will make an attempt tomorrow to cross the 440 km distance to Mellish Reef. Our plan is to turn back if the seas are too dangerous or untenable. If not successful tomorrow, the next weather window will probably be on Thursday."

YJ0, VANUATU (Pacific CW Tour). Operators Dennis/F5VHY (G3MXJ) and Nigel/G3TXF plan to operate as YJ0MXJ and YJ0TXF, respectively, from the Aore Island Resort off Espiritu Santo (OC-035) in Vanuatu for six days between Friday, March 27th and Wednesday, April 1st. This will be a CW only operation. Given the current paucity of sunspots, the main bands are expected to be 40/30/20/17 meters. They will try 80 meters, if local conditions permit. There will be no 160 meters. QSL YJ0MXJ via F5VHY, and YJ0TXF via G3TXF. The duo also plan to do short operations from New

Caledonia (FK) on the way out to Vanuatu, and from Norfolk Island (VK9N) on the way back. Their approximate activity times are as follows:

* FK/G3MXJ & FK/G3TXF: 0006z, Wednesday March 25th to
                        1200z, Thursday, March 26th
* YJ0MXJ & YJ0TXF   : 1000z, Friday, March 27th to
                        1500z, Wednesday April 1st
* G3MXJ/VK9N & G3TXF/VK9N: 1000z, Saturday, April 4th to
                        1900z, Saturday April 4th

PLEASE NOTE: All logs will be up-loaded to LoTW when they return home. There will not be online logs during these operations, nor are they expecting any Internet access.

ZD8, ASCENSION ISLAND. Karol, G0UNU, will be active as ZD8KR between May 4-11th. Activity will be mainly on 20 meters CW and SSB. More details will be forthcoming closer to these dates (on QRZ.com). QSL via G0UNU, by the Bureau or direct.

3DA0, SWAZILAND (Update). Operators David/GI4FUM (EI4DJ, 3DA0DJ), Tony/G4LDL, Gerry/M0MVV, Michael/NC4MM and Yuri/UT5EL will be active from the station at the Hawane Resort during the month of August. The object of this activity is to provide a ham radio station at an international scout camp near Manzini between July 31st and August 11th. David (the organizer of the DXpedition) has operated from Hawane Resort (near Mbabane) as 3DA0DJ on two previous occasions (in March 2007 [CQWPX SSB] and in October 2008 [CQWW SSB]). The Hawane Resort is located in the mountains of Western Swaziland at over 4,000ft ASL. It has been used for DXpeditions on quite a few occasions and is serviced by Daniel Hubbard/ZS6JR of African DX Safaris. There are permanent antennas on the site including a 60 ft. lattice steel tower with HF beams for 20/15/10m and the WARC bands. There is a "Four Square" array of 40m dipoles suspended from the tower. Daniel usually erects a vertical for 80/160m in addition to these antennas. David/GI4FUM states, "It would be our intention to stay at and operate from Hawane Resort and in addition provide operators for the scout camp on a daily basis. The camp site will use the callsign 3DA0SS but each team member will have their own 3DA0 callsign. The camp site is about an hour's drive away. Unfortunately the campsite is not as well situated for takeoff to Europe and USA as Hawane Resort. The campsite is on a southerly facing hillside. We would like to provide as many modes and as many bands as possible on this DXpedition. The March 2007 operation included an EME station which was very successful and made contacts in 100 different countries. During our stay at Hawane there is another DXpedition to Lesotho also serviced by African DX Safaris and team members from that DXpedition may join us during our time there. John, 9M6XRO, will be transferring to Hawane during the 2nd week of our stay." David/GI4FUM provides the following reference Web sites that may be of interest:

QSL INFO AND NEWS....................

PIRATE ALERT. Roger,G3SXW, reports, "A station signing EP2IA has been QRV this week on 40 mtrs CW, asking for QSL via QRZ.com. This was my call in the 1970's, but I know nothing about the current operation. If the callsign had been re-issued, I would expect him to give a valid QSL route. But QRZ.com points at G3SXW, so I must conclude that this is a pirate operation. Please help me to spread the word: PIRATE! I will receive many QSLs that will be returned to sender (extra work for me) and very disappointing for many DXers who think that they have worked a new country. There are some very selfish people in this world."

PIRATE ALERT. Charles, M0OXO, reports, "Over the last few weeks, I have been made aware that my short contest callsign has been used several times by an unauthorized person and maybe during contests too. No-one has had permission to use this callsign and I have no knowledge who the offender may be. My short contest callsign is "M0X" and this has been used along with a regional designator of the Island of Guernsey. The callsign used (which I now assume is a Pirate) was "MU0X" and was certainly used on CW although I am not yet aware of any other modes. There are several 'spots' on the DX Cluster for the callsign, and there have also been several requests for QSL cards. If you have this callsign in your log then the contacts are obviously invalid as I have never operated from the Island of Guernsey. Please bear in mind the callsign of "MU0X", and if you hear it on air please report it to me on my E-mail address. There will be some Amateurs out there who think they have just worked Guernsey on a new band, mode or even an all time new one, but sadly, they will be very disappointed." Charlie's E-mail address is:

The five special callsigns will mainly be active on 80, 40 and 20 meters, depending on conditions, using CW and SSB. Stations SB1658OZ and SH1658OZ will also be active on PSK31. The press release states, "We have noted in our logs that many award hunters work only CW or RTTY/PSK31. You will be more successful if you work as many modes as possible. Not all of our operators are able to work digital modes or CW." For complete information on all callsigns, times in UTC and frequencies, please visit the "Roskilde 1658 Award" Web page at: http://www.sk7bq.com/roskilde (under "Activity calendar")

DXCC Rule Change: At the request of the Program and Services Committee (PSC) the DX Awards Committee (DXAC) investigated the impact of an amendment to the DXCC rules. The DXAC and the PSC have unanimously decided to bring into force the following rule from April 1, 2009, 0000Z:
To meet the growing outrages of direct-QSLs to put to an end only bureau mediated QSL-cards will be credited for DXCC. Intended side effect is a higher degree of organization of radio amateurs in the respective national associations combined with a strengthening of the IARU and the total of Amateur Radio.

PIRATES: The station EP2IA was very active on 40m CW last week and stated "QSL info at QRZ.com". Roger,G3SXW, points out that this call was allocated to him in the 1970s which is also written on QRZ.com. Since the entry on the website has not been updated Roger thinks this was a pirate operation.

M0X is the contest call of Charles,M0OXO. This means that he may use the callsign MU0X while staying on Guernsey. Since Charles has not been on Guernsey the operation of MU0X during the past weeks is the work of a pirate as well.

New IARU HF band plans effective since March 29, 2009

The new HF band plans are effective since March 29, 2009.

US postage to Europe increased

Starting on May 11, 2009, an airmail letter from the US to Europe will cost 98 US Cent (instead of 94 US Cent). So if you consider enclosing US stamps instead of IRCs or dollar bills you should start increasing the amount of stamps already now.

New amateur radio frequencies in Japan

Starting on Mar 29, 1500 UTC, Japanese radio amateurs may also use the extended 40m band from 7.100-7.200 MHz. Moreover they are also allowed to use digital modes on 30m between 10.130 and 10.150 MHz.

EME DXpedition to South Cook Islands E51SIX & E51EME in BG08dr LATEST NEWS: Hello all from the Cook Islands, Conditions are quite difficult with some severe fading during day light hours here. This is mainly effecting my moonrise window to Europe but might improve later in the week as the moon rises later in the afternoon here. I will be on for 3-4 hours at my moonrise every day until 06 April, and again for the last 3 hours before the moon disappears behind the house and hills at 15 degrees elevation on my moonset. The station is working quite well after finding two problems in the rx that made reception very difficult for the first two days. So far over 100 different callsigns are in the log! 73, Bob

40M DX HUNTERS NET. Net Controller John, VK6JB, informs OPDX that he has been in the hospital for 7 weeks and is still recovering. He states, "I have had a skin graft which is healing slowly and is still quite painful. Others were trying to run the net while I was away but conditions were bad and other problems persisted to make it difficult. As of this week, we will be back in full swing with the net, so I hope that you will be able to join us. Our regular nets are as follows: Wednesdays, Fridays and Saturdays -- Usual time is at 1200z. The net is on 7093 +/- QRM. So, starting April 8th, come and join us. We know that conditions are not good but there have been some quirky openings on 40M, so come and be part of the net. Hopefully you can make a contact with a station you really need (a QSL or new country)." For more info about the net and the 40m group, please send an E-mail to: vk6jb@wia.org.au

SILENT KEY. OPDX was informed that Bill Hamer, ZL2CD, became a Silent Key on Sunday, March 29th, at Wellington Hospital. Bill received a QSM for services to radio but will be remembered by untold thousands of amateur radio ops all over the world for his QSOs. He was mostly active on CW, but his voice was heard on SSB. OPDX and its readers would like to send out our deepest sympathy to the family and friends of ZL2CD.

SOLAR CYCLE 24 NEWS. There was good and bad news reported this past week. In the middle of the week a good report from Thomas, NZ4O, came out stating, "A huge solar cycle 24 sunspot group has formed near E30N80 in the northern hemisphere of the Sun. It has pushed the solar flux index up from 71 to 155 and 6 meters is open globally via F2 layer propagation." However, bad news reported from NASA indicates that the sun is plunging into the deepest solar minimum in a century. NASA states on April 1st, "The sunspot cycle is behaving a little like the stock market. Just when you think it has hit bottom, it goes even lower. 2008 was a bear. There were no sunspots observed on 266 of the year's 366 days (73%). To find a year with more blank suns, you have to go all the way back to 1913, which had 311 spotless days: plot. Prompted by these numbers, some observers suggested that the solar cycle had hit bottom in 2008. Maybe not. Sunspot counts for 2009 have dropped even lower. As of March 31st, there were no sunspots on 78 of the year's 90 days (87%)." Read the complete report at:

Greece participated with 2 warships and 4 commercial freighter. Activity will be on all modes and bands. QSL only direct via SV2KBB (w/SAE) to: Archelaos Iakovidis, P.O. Box 26, P.C. 59100, Veria Makedonia, HELLAS, GREECE. Please, DON'T send bureau QSL. Operators mentioned are: Kostas/SV2LLB (5B8BG), Andreas/SV2JAO, Archelaos/SV2KBB and Litsa/SW2MIN (XYL SV2JAO). ADDED NOTE: Activity on Echolink R-4 (SV2/ Mt.Vorras) node: 121496, E.P.C. #6504. QSL Manager is also SV2KBB. To see the QSL card, go to: http://www.qrz.com/sy2dday

T8, PALAU. Operators Ryosei/JH0IXE and Nobuhiro/JA0FOX are once again active as T88CW and T88NF, respectively, between now and April 12th. Activity will be on 80-6 meters using CW, SSB, RTTY, SSTV and PSK31. This past weekend they were very active on 40/30/20/17/15 meters, mostly RTTY with some SSB on 15 meters. QSL via their home callsigns.

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, continue to be very active from Mellish Reef. As this was being typed, their log shows that the operators have worked almost 10k QSOs. They are working very hard on the lower bands and may try to work more on the higher bands. Their Web page states, "We intend to remain on Mellish Reef at least until April 10th. After that we will be looking for a favorable WX window for the return trip to the Australian mainland. We have supplies until April 15th - maybe 18th, if we stretch them and reduce power on the higher bands." QSL via HA7RY, direct, LoTW or by the Bureau (remember, they have an "Online QSL Request Service"). For updates and more info, please visit the VK9GMW Web page at: http://www.vk9gmw.com

VK9X, CHRISTMAS ISLAND. Just a reminder. By the time you read this Haru, JA1XGI/W8XGI, should be active as JA1XGI/VK9 between now and April 11th. Activity will be on all bands including the lower bands using CW and the digital modes. QSL via JA1XGI, by the bureau or direct.

YK, SYRIA. Saad, N5FF, in Damascus, is now active as YK1BA until April 10th. He will return home to Texas on April 11th. As usual, the purpose of the trip is not a DXpedition, so his operating will be spotty, but he states that he will try to put in as much radio time as possible. He suggests that his operating hours will be between 2000-2300z or between 0200-0500z and possibly some occasional activities between 1200-1400z. Saad says, "I suspect that 30, 40, and 80 meters will be the bands of choice, and I will be active on SSB, CW, and RTTY." However, he was heard this past weekend on 20 meters SSB. QSL via N5FF (QRZ.com for details).

The rec.radio.info newsgroup, first established in 1993, has been

recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

Hi fellow HAM.

I am the developer of HamSphere, the virtual Ionosphere for radio amateurs.
I had a user on the system the other day telling me he had worked over 70 countries on HamSphere. I thought that was a real achievement. But when I got to think about it, the system has almost 14000 users, so why not. It should be possible. Anyway, if you are interested in working real good DX stations, you might want to try the system out. I was determined that the system would hold for a year or two and then get scrapped due to high sun spot activity, thus a higher real shortwave band activity, but when I read about the quiet sun I am not so convinced. The sun seems to be very tired and probably needs some sleep.

(I should know this but... is there a collection of Rod Newkirk
cartoons (and preferably, his writings) available? Or do I need to be

just buying those 1950s/1960s QST CDs?)

Meteor Scatter: April 2009
April somehow marks the beginning of the MS season, after the long pause around the end of winter. Yearly minimum of Sporadic Meteors activity is now over, with mean Sporadics rates increasing in northern emisphere towards their yearly maximum in late summer. Lyrids shower (Maximum: April 22 , 11h UT (sol=32�32)) and some other minor showers are furthermore able to increase meteor flux. Have a look to shower predictions for April on our MMMonVHF MS-Propagationpage at: http://www.mmmonvhf.de/ms.php

EME Activity from Nigeria in next months...
5N0EME was now QRV on all three bands (2m, 70cm and 23cm). 23cm worked really very good with the dish and I expect many more QSOs on that band. I might be QRV again on 2m and 23cm during Eastern. Please check this site for update. Unfortunately 70cm does not work really good. However, I have always set my priority to the other two bands and could not take much more equipment over here (I already have more than 70kg of equipment here). So, sorry for 70cm. However I could do three QSOs, all in JT65. I might try it again but I will pick a day with good conditions to give DL9KR another chance to work me. Other than that, everything is fine over here and I am looking forward to my next EME activity from here. By the way, the rain season over here starts in May and I will probably not be QRV via EME so often anymore even so I stay until July. I will try to be QRV at least once a month on 2m and on 23cm. First Fotos are as well on the page now: http://www.mmmonvhf.de/latest.php?id=2397

Latest NEWS/INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal

MMMonVHF Sporadic E summery pages 2009 ; call for reports.

Sporadic E summary pages have existed already for many years in Europe first started by Udo, DK5YA between 2001 and 2005 and then by Steffen, DM2SR in 2007-2008. In 2008 this section became part of MMMonVHF directed by Frank, PA4EME and Udo, DK5YA. MMMonVHF has over 2000 registered users and an increasing number of visitors from continents other than Europe. After testing the programming just for Europe in 2008, our intention is to report Es worldwide. During the Sporadic E season in Australia, lasting from approximately Nov. 2008 until May 2009, first maps were created from another continent as Europe. Meanwhile, we are able to produce detailed maps from every Sporadic E opening that occurred on 144 MHz, no matter what day or continent. However the system needs to be feed with information. The information can be obtained from spots on DX-clusters but you may understand we prefer detailed information from stations involved in the opening. Therefore we invite everybody to report their contacts to the Es section of the MMMonVHF pages... If this is your first visit you need to register. After logging in, the page is self-explanatory. Please follow the instructions. In particular please use the correct time format HH:MM (mind the colon -:-) and a 4 or 6 character locator. Please select the correct day and check that twice. The information will show only after a delay for processing. You will receive a confirmation that your data was received in good order but it will not show up right away in the summaries. Ansgar, DG2KBC, programmed several tools capable of processing the data. But there are many types of logging programs and formats so every log is checked personally by Frank, PA4EME, or Udo, DK5YA. When needed, we will correct the format of your report to be able to process it. The changes will be visible in the summaries. The 2008 season learned that the time format is needing attention as well the locator.
For example: many are using the time format 08.00 but the system needs 08:00 or a locator JO20 needs to be like JO20WX. In case you don't add the last two digits of the square, we will draw the lines from the center of the square which correspondents with the subsquare MM.
For 2009 we especially invite amateurs from other continents as Europe as well to

send their reports
However don't forget the time difference between your continent and Europe.
We try to get the reports and maps on-line as fast as possible. Last year we succeeded to have maps and reports on the summery pages during ongoing openings in Europe. However don't forget: "Work first and report later..." ..... we will do the same!

On behalf of the MMMonVHF team,
Frank, PA4EME and Udo, DK5YA

3B7FQ ST. BRANDON ISLAND WRAP-UP REPORT (via K5XK). Rachid, 3B8FQ, reports on his recent February trip to St. Brandon Island, operating as 3B7FQ. All his contacts were CW only due to loud generator noise. Operations was concentrated on 10 MHz and 18 MHz, with limited operations on 40 & 20M. By the 10th day, the battery was not recharging properly which resulted in reduced power and sending by hand key. Although propagation and conditions were poor, 1,500 QSOs were made operating just a few hours each day, in between maintenance on the meteorological equipment on the island. Color QSLs have been printed and are being mailed this week. QSL all of Rachid's operations (3B7FQ, 3B6FQ, 3B8FQ, and his upcoming July trip to 3B9FQ) via K5XK. Some QSL databases are not correct, since Ron moved to a new QTH last summer. This address is correct and it is also OK on QRZ.com: Ron Evans, K5XK, 2 Pembroke Drive, Bella Vista, AR 72715-8823 USA.

CQ MAGAZINE NAMES PUBLIC SERVICE EDITOR. In a news release by Richard Moseson/W2VU, Editor of CQ Amateur Radio, dated April 6th, 2009, it was reported: "Richard Fisher, KI6SN, of Riverside, California, has been named Public Service Editor of 'CQ Amateur Radio' magazine, Editor Rich Moseson, W2VU, announced today. Fisher, a veteran journalist, succeeds Bob Josuweit, WA3PZO, whose final column will appear in the May issue of 'CQ'. Josuweit, who has covered amateur radio emergency and public service communications for 'CQ VHF', and then for 'CQ', since 1996, is stepping down due to increased time demands at his full-time job. Fisher has been a professional journalist for 35 years, working in various capacities for daily newspapers on both the east and west coasts. He is also a prolific writer on amateur radio matters, writing the 'Washington Beat' column for 'Popular Communications' and the 'Trail-Friendly Radio' column for 'WorldRadio Online'. He was previously QRP (low-power) editor of 'WorldRadio's' print edition. A ham since 1965, Fisher enjoys a wide variety of amateur radio activities, including QRP CW operating, outdoor operating, experimenting with antennas and building equipment. He is a co-founder of the Adventure Radio Society. ' I've loved 'CQ' since before my Novice days,' notes Fisher, 'so joining the team will be a thrill.' Editor Rich Moseson added, 'While I will miss the close working relationship I have shared with Bob Josuweit for over a decade, and wish him all the best in the future, I look forward to working closely with Richard and to the added benefits he will bring to the column as a veteran professional journalist.' Fisher's first column will appear in the July 2009 issue of CQ."

Each panelist will give a short statement of their perspective on participant diversity in RTTY contests and then be available to address questions and comments from the audience. I like this option also. The operator doesn't sit there waiting for a
card which will never come, and he can start hunting PJ2 for his DXCC.

(I'd go a bit further, and send it back even if it came without SASE,
but I recognize that some may be on a tighter budget than me.)

EME Activity from Nigeria in next months. LATEST NEWS from Bodo, dated 2009-04-11: I have got quite some requests regarding my EME activities. Sorry that I have not been QRV with 5N0EME and didn't do any updates. April 30, 1700-2000z, 1296.090MHz, JT65C, TX first

5H, TANZANIA. Operators Hermann/DL2NUD and Joachim/DL9MS are planning to be active as 5H1HP and 5H1MS, respectively, from Zanzibar, between May 16th and June 2nd. Activity will be on the HF bands and 6 meters, but an emphasis will be on VHF (EME/MS). Grid squares to be activated are: KI93RU and KI94RA.

8Q, MALDIVES. Hiroshi, 7M2VPR, is now active as 8Q7HN. Length of his operation is unknown at this time. He was spotted Sunday on 15 meters SSB -- between 0530-0800z on 21235 kHz and 1300-1330z on 21244 kHz. QSL via 7M2VPR.

8R, GUYANA. The 6 Meter Beacon Project, Inc., is happy to announce a HF-50 MHz DXpedition here between June 16th and July 6th. Antenna for 6 meters will be a 6M7JHV yagi at 45 ft. on the Atlantic Ocean pointed towards EU and NA, and using a 3CPX800A7 amp. Activity will be split between two teams: 11 days will be by Chris/W3CMP and Dave/N3DB, the other 11 days by Terry/K4RX and Ken/AC4TO. They hope to get some decent openings to, amongst other places, Northern EU, 5B/4X and W6/W7. They expect to have internet access most of the time. Operating frequencies and Web site will be announced at a later date.

AN8, CANARY ISLANDS. Operators Luis/EA8AY, Jeronimo/EA8NC, Pedro/EA8QP and Juan/EA8TT will use the special callsign AN8R during the CQWW WPX CW Contest (May 30-31st) as a Multi-Multi entry. QSL via EA8AY. Visit the special AN8R Web page at: http://www.ea8ay.com/an8r_wpx/

AX, ANTARCTICA (Special Callsign). Bob, VK0BP, currently employed by the Australian Antarctic Division as a Communications Tech from Davis Base Station (WABA VK-03, WAP AUS-03, IOTA AN-016), Antarctica, will be using the special callsign AX0BP on April 25th, to celebrate ANZAC Day. ANZAC Day is a national public holiday to commemorated and honor the members of the Australian and New Zealand Army Corps (ANZAC) who fought at Gallipoli in Turkey during World War I. This holiday is observed by

Australia and New Zealand, as well as the Cook Islands, Niue, Samoa and Tonga. Bob can only use this callsign from midnight to midnight (local time -- Davis is +7 hrs UTC). However, Bob will not be able to operate the full 24 hours but will do his very best to operate as long as possible that day. Australian operators can only use the AX prefix just 3 times per year -- Australia Day (January 26th), ANZAC Day (April 25th) and World Telecommunications Day (May 17th). QSL via VK2CA, direct only (2 USDs and a SAE is preferred).

C6, BAHAMAS. Look for C6APR to be active again from the Crooked Island Lodge, Pittstown Point, Crooked Island (NA-113), Bahamas. Activity will take place between July 23-27th, and during the RSGB IOTA Contest (July 25-26th) as a Multi-Op/Mixed-Mode/High-Power/DXpediton entry. Operators mentioned are: Pete/W2GJ, Ed/K3IXD, Dallas/W3PP and Jim/K4QO. Operations before and after the contest by C6APR will be on 80-10 meters including the 30/17/12 meter bands using CW and SSB. Also, look for C6AXD to be on RTTY and C6AQO on 6 meters (grid FL22). All three callsigns are good for Bird Rock Lighthouse (ARLHS BAH-005) as well as IOTA NA-113 and Grid Locater FL22tt. All QSLs go to K3IXD.

CQWW DX CONTEST BREAKS 10,000 LOG BARRIER! A press release (dated April 15th) from CQ Communications, Inc., states: "For the first time, more than 10,000 logs have been submitted for the CQ World Wide DX Contest, according to Contest Director Bob Cox, K3EST. In addition, Cox reports that the number of CW logs have exceeded the number of phone logs for the first time in more than 20 years.

According to Cox, there were a total of 5013 SSB logs and 5272 CW logs submitted for the 2008 running of the event, for a total of 10,285 logs. This is the first time that the CQWW -- already the world's most popular amateur radio contest -- has broken the 10,000 log mark. Of these, nearly 98% were submitted electronically.

It is also the first time since 1986 that more CW logs have been submitted than SSB logs. 'This is a clear indication,' says Cox, 'not only of the health of contesting and of CW, but of ham radio as a whole.' In addition, the logs contained the callsigns of more than 50,000 different amateur stations making at least one contest contact, indicating that many more stations participate in the CQWW Contest than submit logs.

SSB results of the 2008 CQWW Contest will be published in the August 2009 issue of 'CQ' magazine; CW results will appear in the September issue."

DAYTON TOP-BAND DINNER BANQUET FULLY BOOKED. George/K8GG and George/W8UVZ announced: "Despite the economic turn-down, the response for the 2009 Dayton Topband Dinner has been steady and growing. We are now fully booked with a long waiting list for this May. We are sorry to report we cannot handle any further reservations and have been turning away repeat attendees for over a week now. We will do it again in 2010, assuming the Dayton Hamvention(r) continues, so if you missed this year and want to attend next year, please mark you calendars to contact us in late February or early March next year. We will announce the details on The Topband Reflector, and various DX e-bulletins as we have on the past. Thanks for your understanding, and we hope to see you next year."

GD0, ISLE OF MAN (EU-116). Stewart, GM4AFF, will be active as GD0F during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/SSB/24-Hrs/ Island entry. QSL via M0CMK.

HB0, LIECHTENSTEIN (Update). Operators Kasimir/DL2SBY and his friend Georg/DF1SR will be active from here between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Kasimir informed OPDX that he has bought Spiderbeam for 10/12/15/17/20m which will improve his signal. Other equipment includes a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir and Georg will use two separate callsigns for this operation. For the HF bands, they will use HB0/DL2SBY and for the EME activity they will sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

HI, DOMINICAN REPUBLIC. Ronny, OT4R, will be active as HI7/OT4R from Punta Cana between May 9-30th. Activity will be on 20/15/10 meters SSB. Suggested frequency for 20 meters maybe 14300 kHz. QSL via OT4R.

EU-189. (Update) A Belgian team of five operators will attempt a landing on Rockall Island between April 30th and May 1st. They will be on the air with two stations using the callsign MM0RAI/p for about 48 hours. A report from the "Maciverblog" indicates that they are "hoping to achieve a world first by shooting a video on the rock, more than 240 miles west of mainland Scotland, and streaming it live on the internet on each of the three days they plan to spend there. A Scottish cameraman is also going to be in the landing party and, if conditions are good and the technology works, hopes are high of the first live TV news broadcast from the rock. Rockall, the summit of an ancient volcano, stands about 60 feet above the Atlantic. Landing on the rock is very difficult as it is steep even on its easiest side. The area is infamous for its high seas and very changeable weather throughout the year." Read the complete blog by journalist Iain Maciver at:
http://maciverblog.co.uk/2009/04/15/belgian-hams-bid-to-broadcast-from-rockall/

Also, check-out the Rockall Web site for latest news and last minute updates at: http://www.rockall.be

K4, UNITED STATES (Special Event). Operators from ARES in the Summerville, SC, area (Dorchester County, Grid locater EM93), will activate the special callsign K4E during an ARES Earthquake Emergency Communication Awareness Exercise, April 21-22nd. When not passing event traffic, K4E will be available for QSOs on 80-15 meters, as well as 2 meter FM local QSOs. QSL via W4NSC. This training exercise is to demonstrate the cooperation needed between the firemen, policemen, hospital workers, hams, and other public service personnel throughout South Carolina in time of an emergency. South Carolina is prone to hurricanes, and it has been determined that a major earthquake occurring in the greater Charleston, SC, area would divide the area into 18 "islands" due to damage to infrastructure such as bridges and roads. Each of these "islands" is equipped with a structure containing various emergency supplies and Amateur radio equipment and antennas. Each POD (Points of Distribution) has a generator and is environmentally controlled. This exercise is a test of one of those "islands".

Latest NEWS/INFO for the NEWSLETTER

MMMonVHF The VHF-DX-Portal

****

Most noticeable event this month is Lyrids shower, peaking on April 22, 11 UT this year. ZHR value is medium (around 20 hr-1) but may vary up to 90 hr-1 during rare strong displays. Not only ZHR is variable, but also Time of Maximum and shower�s Peak Length are. Time of maximum has been found to vary from year to year in the range sol=32�0-32�45, equivalent to 2009 April 22, 3h to14h UT. Peak is relatively sharp but its Full-Width-Half-Maximum time is strongly variable form year to year. Anyway, the very best rates are typically achieved for just a few hours. SILENT KEY

Holger,DL1COP, writes that Franz,DL3PS/HB9EHQ, passed away suddenly and unexpectedly after suffering a heart attack at the age of 45. Franz was member of the DARC, USKA, HB9VC and HTC and made several DXpeditions in the past like LZ/DL3PS (Sofia), TF/DL3PS (Vestmanneyjar Island), TF/DL3PS (Grimsey Isl), ZS6/DL3PS (Vanderbijlpark), 4X/DL3PS (Ashkelon) and D44TXS (Cape Verde) during March of this year. Several friends of Franz will try to confirm all open QSL requests (especially the latest ones from the D4 DXpedition) with an appropriate remark.

The wellknown DXer Charly Hausemer,LX1AJ, put his keys away at the age of 89 years on April 7, 2009.

GJTRACKER Version 1.05
Lance did updated the program to include the option to permit the ESC key to automatically exit the callsign and locator fields or to eliminate all the noise and just use the standard editing to enter the callsigns and locator. Of course if you choose to operate without the ESC key activated, you will have to remember to manually press the button to the right of each of those fields to either look up the callsign or calculate the coordinates from the locator you entered. As usual, the VK3UHF crew comprising myself VK3PY, David VK3QM and Charlie VK3NX will operate from the Barrabool Hills, 15km west of Geelong, QF21CU. We will have all bands from 50MHz to 24GHz inclusive. I'm particularly looking forward to this event as it marks the 20th anniversity of the Summer VHF-UHF FD. I've been fortunate in having operated in every event since its inception, including the Spring FD and last year's inaugural Winter FD. Yes, I'm getting a little long in the tooth! Operators may also wish to look for Bert VK3TU and Ken VK3NW who will be operating from a hill near Hamilton in western Victoria, QF01WX. They will have all bands from 50MHz to 10GHz and expect to operate for 24 hrs. Another crew led by Lou VK3ALB and Nik VK3NJP are heading to Mt. Leura near Camperdown QF11. They will have 50 MHz to 1296 MHz inclusive as well as a modest 10GHz system (500mW+120mm horn ant).

C6 - BAHAMAS, NA-001

Karney,W2AFC, Dave,N1EMC, and Bill,NE1B (C6AWB), will meet Tom,C6ANM, in Nassau (NA-001) to operate in these upcoming contests:

CQWW 160m CW (Jan 23-25), ARRL DX CW (Feb 21/22),
CQWW 160m SSB (Feb 27-Mar 1) and ARRL DX SSB Contest (Mar 6-8).

Tom,C6ANM, is staying in the Bahamas since Jan 1 and works on 160m-6m until Apr 1. He prefers QSL via LoTW or direct to WA2IYO.

CT - PORTUGAL

Marq,CT1BWW, will use the call CS6BWW in all major contests in January, February and March. QSLs via bureau to his homecall.

FW - WALLIS AND FUTUNA, OC-054

Eli,HA9RE, is team leader of a DXpedition to Wallis (OC-054) which plans to hit the airwaves as FW5RE from Jan 28 until Feb 17. Eli will be accompanied by Laci,HA0NAR, and Sara,HA9SDA. They want to work with two stations at the same time in CW/SSB/RTTY on 160m-10m. They will use a 24m long vertical for 160m/80m/40m, a Spiderbeam for 20m/17m/15m/10m, an HB9CV on 20m-15m and a 7-band Butternut vertical.

Their QSL manager is HA8IB.

HK0/SA - SAN ANDRES ISLAND, NA-033

Mike,K5UO, Cal,WF5W, and Rob,HK3CW, hit the mark when they announced their activity from San Andres (NA-033) during the CQWW 160m CW Contest from Jan 23-25 because the demand for this counter on 160m should be tremendous. The team of three will join the multi/single class signing 5K0CW. They will stay active from the island for another week working also in RTTY and on the other HF bands. The team will use a modified "Battle Creek Special" vertical and a K9AY receiving antenna.

QSL cards are managed by W5PF.

HS - THAILAND

Manfred,DL2EBR, will stay in Nakhon Nayok for a longer period of time. He is licensed as HS0ZEU and enjoys digital modes like PSK and SSTV. He requests QSLs via the RAST QSL bureau.

V3 - BELIZE

Gerd,V31YN (DJ4KW), and Gisela,V31GW (DK9GG), are staying in Belize between Jan 19 and the beginning of March. They plan to activate IOTA NA-180 as V31YN/p from Feb 26 until Mar 3.

QSLs direct, via bureau or LoTW via their homecalls.

AUSTRALIA, SPECIAL EVENT STATION

The Australian Communications and Media Authority (ACMA) assigned the special callsign VI2BV90 to the "Waverley Amateur Radio Society" which is the oldest amateur radio club in Australia. The club was founded on Jan 27, 1919, and got its first callsign N249 on Aug 18, 1920. Later this was changed to 2BV and then VK2BV after all. Thus VI2BV90 is celebrating the 90th birthday of this club from Jan 24 until Feb 1.

More details about the station can be found at: http://www.vk2bv.org

BERMUDA, SPECIAL EVENT STATIONS

2009 will see the celebrations of the 400th anniversary of the colonization of Bermuda (NA-005). PLEASE DO REGULAR UPDATE OF THE eMWS and eMWDXCC at MMMonVHF

The Team of MMMonVHF will use YOUR "Most Wanted" for showing expedition
the most wanted places (specially for MS in europe and EME all over the
world). Remember such nice trips to DXCCs like GU, JW or JD1 these year
or the multi-square operation from Tor, DJ8MS...   Some of you did not

update since 01/2007 and so maybe they are not interested anymore or have had no changes. So therefore we decide to build in a new BUTTON at your ACCOUNT to click that there was "NO CHANGES" in your "most wanted" since your last update. Otherwise we will remember your after a years periode to see if you still have interest in it... NO problem, if not, but than we will skip these entry after 3 years to have the table as update as possible (its not a question of quantity, it shall be high quality!). However, the eMWS and eMWDXCC pages make only sense if the data is as much up-to-date as possible. So, please feel free to upload your data as often as you want. SOURCE: The MMMonVHF Team

Tonga, A35. World traveller and Uruguay DX Group member Bert, CX3AN, will be active as A35HA from Tonga's main island, Tongatapu for one week starting February 14th. He informs OPDX that he will be active on 40-6 meters with a special emphasis on 30/17 meters using CW and SSB, and only 100 watts from his Icom 706 into dipole antennas. His activity will be limited because he will be on a family holiday trip. Bert will be operating alone this time, not like other trips where his good friend Mario, CX4CR, usually would join him. Desecheo, KP5. Update. The KP1-5 Project is very aware of the need for Desecheo in Europe. Previous DXpeditions contended with an obstructed path to Europe making working this #3 most needed country, difficult at best. During the recent reconnaissance trip to the island, agreement was reached that will allow antennas to be placed on a ridgeline above the helipad that will give a clear path to Europe. See the photos showing the problem and the plan at

http://www.kp5.us/ (click on News / Updates): the team wants to provide as many EU hams with a QSO as possible! Please visit also http://www.kp5.us/help.htm to support this DXpedition.

date is fast approaching, and all team members are ready to go. Operations
will between March 23rd and April 3rd. The total list of operators are:

"We will assemble 7 full HF stations at 2 seperate sites as well as one
for 6m. Modes of operation are SSB, CW and RTTY. We will use mono band
yagis and mono band verticals to allow us to possibly have 2 actual
stations on the same band similtaneously. There are also a quantity of
wire antennas for the low bands. A full list of operating frequencies
will be designed to enhance our plans. With the rising fuel prices and
the international economy crashing around us, we have been able to secure
a vessel to freight all of our equipment. We are still trying to get
more support to cover this cost, so please be so kind to visit our Web
site and make a donation at: http://www.odxg.org/vk9la.htm
The QSLing chores will be handled by VK4FW. We will set up an online
QSLing system that will permit you to apply online to help cut your
postage costs. More on this later. QSL cards will be printed very quickly
by UX5UO." For more updates, details on the DXpedition and how to donate
to this operation, please visit the ODXG and VK9LA Web pages at:

VP9400, BERMUDA (Special Event). Rose, VP9LP, Secretary of the Radio Society of Bermuda, announced that the year 2009 is the 400th anniversary of the settlement of Bermuda by Sir George Somers. Look for most local organizations to have some kind of special event during the year. The Radio Society of Bermuda has been issued with a special callsign that can be used all year; it is VP9400/xx. The xx suffix is the operator's callsign suffix (i.e. VP9400/LP). There are a few novice licence holders who have a 3 digit suffix (i.e. VP9400/NMT). Look for special pictorial postcards to be used to QSL.

WAS LOTW ACCOUNT INFORMATION. Bill Moore, NC1L, ARRL Awards Manager, announced: "Some users may have noticed that their WAS totals have changed or have completely gone away. On January 1, 2009, LoTW refreshed all WAS accounts to accommodate the new Triple Play award. Your Triple Play record is shown as a sub award in your WAS account just as band and mode sub-awards are shown. If your account had no QSO rules then the system had no way of applying your QSO credits. This is easily fixed by adding a rule to your WAS account. All WAS accounts must have at least one rule.

To add a rule to your WAS account simply access your WAS account then select 'MODIFY ACCOUNT'. Follow these steps to complete the process:

Click 'Add Rule To QSO Set'

Next, select the type of rule you want to apply. Drop the box down, make your selection then click 'Add Rule'

(Next it may ask you here to select a callsign if you have more than one account. If so, select the callsign you want to change).

If there is only one callsign in the account the next screen will say 'Save Account Changes'

Click this and your account should be OK now.

Note, if you feed more than one WAS account for different locations you must do this for each account. Some accounts are very simple and will only require a callsign rule. Other accounts may be more complex requiring multiple rules to accommodate your operations. WAS accounts can be configured to automatically select those of your QSOs that both qualify for a WAS award and also match a set of rules you specify. A QSO Set is a list of rules that define QSOs that will be matched. Your account can include more than one QSO Set if needed to encompass all of your QSOs that are eligible for the awards. The rules that make up a QSO Set each compare the value of a field related to the QSO. The fields that may be used for this comparison are the callsign you used to make the QSO, the QSO date, and several geographical fields. At least one rule must be included in a QSO Set in order to match any QSOs. If more than one rule is present in the QSO Set, you may choose whether the QSOs must match all of the specified rules or any of the specified rules."

WORLD'S LARGEST AMATEUR RADIO ANTENNA DEPLOYED ON 160M AT OH8X. Jarmo, OH2BN, reports: "With the aim of pushing the always challenging Northern

envelope on low bands and verifying their own engineering skills, the group at Radio Arcala will hit 160M with a 39-ton (80.000 lbs) 3-element full-size monster during the week of January 19, culminating with the CQWW 160M Contest. OH8X is to be manned by OH2IW and OH6KN, still in a limited capacity while valuable data will be gathered in this first assault. Their partners for measurement purposes will be the sister station CU2X operated by OH2BH/CU2KG and, in close proximity, by the associate stations OH0E operated by OH2MM, and OG2P by OH2PM. You may catch all these stations during the coming week. Radio Arcala is co-operating with the University of Oulu in several areas of HF propagation study. They also welcome and acknowledge field reports at <oh1wz@sral.fi> You may read about details of the monster construction at <http://www.helsinki.fi/~korpela/PU/PU.html> and study the overall mission at <www.radioarcala.com>

ZT2, SOUTH AFRICA (Rare PFX). Look for eight South African amateurs to operate as ZT2V in the CQWW WPX SSB Contest (March 29-30th). Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and WW5L for the following DX information.

The following press release was provided by Tom Anderson, WW5L.

PJ7/FS DXpedition to the Caribbean

The "Buddies in the Caribbean" DX group which specializes in 100 watt or low power radios and the Buddipole portable antenna system is off again to a new DXpedition site Feb. 4-11.

This time the group will be operating at different times from BOTH the French and Dutch side of St. Martin Island FS/PJ7. Various modes including phone, RTTY, and CW will be on the air, along with "golf cart mobile", or "bicycle mobile" operations and other unique operational situations. Each of the operators has extensive experience operating from "unique" locations or various DXCC entities.

In 2007, four of the eight operators on the 2009 DXpedition were part of the Montseratt VP2M Buddipole DXpedition.

The DXpedition headquarters will be at Villa Ait Na Greine on the French side of the island. The heaquarters (http://villaaitnagreine.com) is perched on top of a cliff overlooking the Caribbean with excellent take off angles toward North America and Europe. There will be other sites on the island, both on the French and Dutch sides, where operations will occur giving DXers a chance to work two separate DXCC countries.

The group's goal will be to work stations from all over the world using Buddipole(TM) antennas and other newly-developed Buddipole(TM) antenna accessory products. The operation will be the week before the Orlando Hamfest and two weeks before the KP5 DXpedition. Operators will be using FS/homecall and PJ7/homecall and plans call for contacts to be uploaded to LoTW, eQSL, and an on-line log. Those wanting hard copy QSLs should send a S.A.E. and appropriate return postage or an SASE to the homecalls of the operator(s) you've worked.

The "Buddies in the Caribbean" blog page will be:
http://caribbeanbuddies.blogspot.com/

The group consists of the following operators:

K8EAB Weymouth Walker who's operated from Jamaica as well as motels, high rise apartment buildings, a pontoon boat, mountain tops, and even "picnic table" portable during his 52 year ham career.

KC4VG Mike Greenwood was a member of the BUM's Montersatt group in 2007 as VP2MVG and has been licensed more than 25 years. He also has operated from the Bahamas C6 and other Caribbean locales. Unique QTHs have included operations from Alcatraz Island in the USA, a cruise ship, and the Marconi station on Cape Cod. He specializes in low power SSB operations. Many DXers have run into Mike at the Buddipole booth at the Dayton Hamvention where he helps Chris and Budd out with sales.

N7UN Guy Hamblen has operated from such unusual locales as the Appalachian Trail and from the top of several of Colorado's 14,000 ft. peaks. Previously he was K7YYK, AA7QZ, and his current call of N7UN. He has 334 DXCC countries confirmed.

KB9AVO Paul Van Dyke was a member of the 2007 Buddipole Montseratt DXpedition and held the VP2MVO call. He is a frequent contester as part of the KP4US contest team in Abonito PR. He will be specializing in PSK, RTTY, and Slow Scan tv on FS/PJ7. He is also founding president of the Indiana-Michigan-Ohio Skywarn Association.

WW5L Tom Anderson is an avid DXer and has held the following DX calls since the 1980s: V31EF (Belize), G0/WW5L (UK), 7P8TA (Lesotho), and C91TL (Mozambique). He is on the DXCC Honor Roll and has also operated from the Battleship Missouri, KH6BB, at Pearl Harbor HI. He was a K2BSA staff member and radio merit badge counselor at the 1997 National Boy Scout Jamboree and has been invited back as a K2BSA staff member for the 2010 Centennial National BSA Jamboree. He is also planning on operating as HB9/WW5L from the Kandersteg World Boy Scout Camp in Switzerland in July.

N0TU Steve Galcchutt is a long time CW operator on Straight Key Night and enjoys "mountain top operation" as he's operated from several of Colorado's 14,000 ft. peaks. QRP CW operations are his main interest. He will also be the group's resident videographer - you may have seen his videos on YouTube under the pen name "the Goat Guy."

W3FF Budd Drummond is one of the principals in Buddipole. His main interest lies in making portable, "bicycle mobile", "golf cart mobile", and "walking" HF contacts from whatever location he finds himself in. Budd was one of the members of the 2007 Buddipole Montseratt DXpedition. His web page is http://www.qsl.net/W3FF. In September 2004 Budd worked every continent using 50 watts on his "bicycle mobile" and has logged more than 5,000 QSOs as "walking mobile" station.

W6HFP Chris Drummond is the president of Buddipole and his main interest, naturally, is HF portable operating and "lightweight" DXpeditions to remote locations. An avid backpacker and outdoorsman, Chris works to design products that will live up to his demanding expectations for rugged and versatile equipment for HF operating in the field. He was also a member of the VP2V Montseratt DXpedition with callsign VP2MHFP.

About the antennas: the Buddipole antenna system is designed to be a lightweight and versatile way to put an efficient station on the air in minutes in almost any terrain. By utilizing an interchangeable series of custom-made components the user is able to configure dozens of antenna designs optimized for their particular operating needs. The group to St. Martin expects to operate dipoles in various configurations, verticals, vertical beams, mini-yagis, and other antennas using only Buddipole parts. Several new products will make their debut including a lightweight rotor, super cap power supply, LifePo4 battery packs, folding capacity hats, and shockcorded masts.

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 893.2
BID: $OPDX.893.2
January 26, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K4UEE and W0GJ for the following DX information.

The following press release was provided by Bob Allphin/K4UEE and Glenn Johnson/W0GJ.

Desecheo 2009 Press Release # 4
January 26, 2009

FOR IMMEDIATE RELEASE

We have reserved the special call sign K5D for our upcoming Desecheo operation. The operation will begin late in the day on Feb 12th.

QSO philosophy...because Desecheo is so very rare (#6 worldwide, #3 in Europe and # 2 in Asia) there are many, many hams worldwide that need KP5 for an all-time new one. Therefore, we are asking that you not contact the Dxpedition on any band/mode that you have confirmed from a previous DXpedition. This will allow the people who really need a new DXCC entity a better opportunity to get through the pileups.

Our objective is not to establish a world record for contacts...there will be no "greenies", no boxes to check, no competitions for most band/mode QSOs, no certificate or awards for contacting the Dxpedition more times than anyone else. So, if you have KP5 already confirmed on a particular band/mode, we respectfully ask that you exercise restraint. If, late in the DXpedition, we are calling CQ for contacts, we will welcome your call.

The team has encountered higher expenses than anticipated. These mainly involve the transportation and feeding of other personnel that will be traveling to the island with us. Approximately ten other personnel will share our campsite and facilities for the duration of the DXpedition. They will be on Island with us to provide security and carry out field research. Therefore, we ask that you consider a contribution to the DXpedition to help with these incremental expenses. Just go to www.kp5.us and click the button that reads" How you can Help".

We are all counting the days until we assemble in Puerto Rico on Feb 7th.

Bob Allphin- K4UEE
Glenn Johnson-W0GJ

Dear colleagues radio amateurs!

I am addressing you as a member of managing committee of Radio Club Slovenj Gradec - S59DCD. I would like to introduce to you our project and provide some promotional material and kindly ask for you help in promotion.

Our project is a brand new World Wide HF contest. We dedicated it to a noble idea of PEACE MESSENGER CITY association, which was founded within organization of United Nations. We named our project World Wide Peace Messenger City Contest - WWPMC.

Please, find attached short introduction of our club, introduction of IAPMC, and an explanation of PMC contest idea. We do heartily hope that you will find our idea interesting and persuasive in the way, that you will get your hands on mikes and keyers and joins us on the air.

We would like to kindly ask you for help in spreading the news about our new contest among radio amateurs in your district and your country by publishing this article in any possible way (printed publications, web sites, internet forums, discussion groups, mailing lists etc.) We hope we will meet amid a large concourse of contesters.

We are looking forward to meet you and your fellows' radio amateurs in WWPMC contest.

Reply to this mail is not necessary, but it would be appreciated.

With best regards from Radio club Slovenj Gradec - S59DCD!

Zvone BURJA - S56GTA

Member of managing commitee

P.S.: Since there are all members of this project working on promotion campaign it is possible that you will receive this invitation more than once. For such instance I would like to apologize if that should cause any troubles. Such incident is not intentional or made on purpose.

Thank you for your understanding!

The number of days with fog and mist in the past thirty years has fallen sharply in Europe - To know where/how/when with the weather I visit he webpages of the Dutch KNMI on a regular basis. Some days ago there was a small news item on their webpages that during the last 20 years the number of days with heavy fog decreased by 50%. This is, concluded by a study, contributing to the global warming. The news item is in Dutch so Frank, did translate it for you

EME Activity from Nigeria in next months...
Bodo will be working in Abuja/Nigeria for several month. This will give me the opportunity to bring EME to the Nigerian Amateur Radio Club. Please remember that I will be there for work reasons so I cannot be on air as much as on my other DXpeditions. However, I will take all of the equipment there and try to be on the bands as often as possible. The call sign for EME activities might be 5N0EME but its not confirmed yet. All other HF activities will be with the call 5N/KT3Q. The EME activities will be focused on 2m and 23cm. Equipment is planned to be as listed below. If you have anything that I could use during that time, I would be happy to take it there and maybe leave it there as donation for the radio club. Camb-Hams on Harris DX Pedition 2009 (IO67)
After a very successful Dx pedition in 2008 to the Island of Mull the Camb-Hams have decided on another DX Pedition for 2009. We have agreed on the Island of Harris for this years location which is off the north west coast of Scotland. The format of the trip will be the similar to last year, where we shall have stations on HF voice and data, most bands inc 5Mhz, alongside 6m, 4m, 2m and possibly 70cm (SSB, JT6m and MS). There will be lots of portable operation around the islands (possible interest to WAB chasers) and 3 very energetic climbers activating SOTA summits all week. Read more about these upcoming trip in detail:

3B7, ST. BRANDON ISLAND (Update). Ron, K5XK, updates OPDX that Rachid, 3B8FQ, has license in-hand, and expects to activate St. Brandon Island (AF-015) for almost two weeks between Friday, January 30th and Thursday, February 12th. The callsign will be 3B7FQ. This will primarily be a working trip for maintenance on the meteorological station on St. Brandon, with on-air operations as time allows. Rachid expects that the 30/20/17 meter bands to be the most productive but will try all bands, 80-10 meters. Rachid will use CW and SSB. On CW, look for Rachid near the bottom of the band, "on the 8's" such as 10108, 14008, and 18078 kHz. He will be using only 100 watts and a G5RV antenna. He also plans to be active later in the year as 3B9FQ (from Rodriguez Island) while on holiday in July. QSL 3B7FQ, 3B8FQ, 3B6FQ and 3B9FQ via K5XK per instructions on QRZ.com.

5H, TANZANIA (IOTA Op). Just a reminder that Sigi/DL7DF and his XYL Sabine will be on holiday in Zanzibar (AF-032), February 3-13th. Look for Sigi to sign 5H1DF and be active on 160-10 meters using CW, SSB, RTTY and SSTV as often as possible. His equipment consists of a transceiver, a linear TY900, a 18m Lowband Vertical, a Vertical R7, as well as a laptop computer. QSL via DL7DF, by the German QSL Bureau (DARC) or direct to: Sigi Presch, Wilhelmsmuehlenweg 123, D-12621 Berlin, Germany. For updates and more details, visit: http://www.dl7df.com/5h/index.html

ANTARCTIC ACTIVITY WEEK NEWS...............

PLEASE REMEMBER - Stations that are active and signing "/ANT" may NOT be in the Antarctic!

Just a reminder that the Worldwide Antarctic Program's (WAP) 6th Antarctic Activity Week (AAW) will take place between 0000z, February 16th and 2400z, February 22nd. For details, see: http://www.waponline.it

This year's WAP AAW event is in collaboration with Italian Air Force, the National Antarctic Museum (MNA-Genova) and the Italian Ham Radio Association: ARI Mondovi, ARI-Genova and ARI Massa-Carrara. The AAW is an unique world-wide event where Hams are "celebrating and working to improve Worldwide interest around the Antarctic Continent and its related matters, to understand and share what the Nations and Organizations are doing to study and protect this still non contaminated corner of the world and share from there, a message of peace." Gianni, I1HYW, states (edited), "A number of operators (see list below) will be activating radio stations from at least 13 countries world-wide. The aim of AAW (also next March 1st, will see the end of the International Polar Year), is precisely that of gathering international scientific activities and the Ham's AAW, with particular reference to logistic and weather-related aspects, developed jointly with the major world-wide scientific organizations and international scientific community in a climate of mutual practical data sharing, with respect of the economic forces and logistic elements vital to the continuation of scientific research in a corner of the world which harbors the very secret of our existence."

The AAW is celebrated every year during the last week of February, and it also coincides with Argentine's celebration of their Antarctica Day (see http://www.marambio.aq) on February 22nd. As of print time, the following stations are expected to be active during the AAW event:

* Phil, K6EID, from Marietta, Georgia, informs OPDX that he will be signing K4A for the AAW. He wants to remind everyone that in the past many of the AAW operators append "/ANT" to their callsign for AAW. He has refused to do that because Russian hams have used "/ANT" while they were in Antarctica, and he doesn't want to mislead anyone. It is possible that many of the newbie hams can be fooled by this, thinking they are working Antarctica. So, please remember that during the AAW there will be a lots of stations with zany callsigns operating, and some will inevitably append "/ANT." They are not in the Antarctica, they are in the home country indicated by the prefix. There are no current Antarctic stations signing "/ANT". Most of these special event station callsigns will issue a special QSL, but they are not the Antarctica!

C2, NAURU. Dani, EA4ATI, who is now active as 9M2TI from Malaysia, informs

OPDX that he is preparing for a DXpedition (with a team of operators) to activate Nauru in the Pacific sometime in May. The callsign will be C21TI. Travelling through Australia to get to Nauru, tentative dates will be either from May 3-17th (after the cyclone season) or May 16-30th. Dani states, "I am preparing the logistics with a friend from Nauru that I met in Malaysia during a ITU workshop last November, but we will probably stay in the Od'N Aiwo Hotel." This is the same location that previous DXpeditions to Nauru have used (such as C21BH, C21SX, C21XF, etc). The composition of the team is not finished yet, but Dani is looking for CW, SSB and RTTY operators. Ruben, C21RK, was mentioned as part of the team. Activity will be on all HF bands including 60m and 6m. The suggested frequencies mentioned (as of now) are:

The ARRL Web page reports, "The U.S. Fish and Wildlife Service (USFWS) announced on Monday, January 26th, that they would once again allow Amateur Radio operators the opportunity to operate from Midway Atoll. This is the first time that USFWS has allowed amateurs to operate from the wildlife refuge since 2002. The USFWS started a program earlier this month to encourage visitors to experience Midway's wildlife, history and culture, as well as non-wildlife-dependent activities -- including Amateur Radio. To ensure the safety of the wildlife on the Refuge, the USFWS said that Amateur Radio operations will be permitted for two weeks only, from October 5-19th, 2009. 'Radio operation will be allowed only within a designated area on the north side of Sand Island and the use of portable generators will not be permitted,' said Midway Atoll Refuge Manager Matt D. Brown. 'There is 120 V power available at the operation site. Any modifications to the island power grid/infrastructure must be approved in advance and be paid for entirely by the radio operators.' All participants will be required to attend a refuge orientation shortly after arrival that is designed to enhance visitor safety, wildlife protection and overall enjoyment of the wildlife refuge." Hans Timmerman, PB2T, President of the European DX Foundation (EUDXF), reported on the EUDXF Web page on Friday, January 30th: "Where I had the impression that Curacao had a clear position on its future political status it appears that another referendum will be necessary to decide on the future of this island. On Curacao a committee has been installed that will lead a referendum that addresses the planned political change. On February 2nd, 2009, at the latest, this committee will propose the date for the referendum and it will propose the exact question for the referendum. A final decision will be taken by the local government of the island. In the meantime the chairman of the committee stepped down because he appeared to be too controversial. To be continued...."

LOTW REACHES 200 MILLION QSOS! "The ARRL Letter" reports that on January 16th, the "Logbook of The World" (LoTW) hit the 200 million mark during the upload of four years' worth of logs (about 25k QSOs), by Vic Kean Jr., K1LT, of Carroll, Ohio. To celebrate Kean's submission of the 200 millionth QSO, the ARRL has awarded him lifetime free LoTW credits and free ARRL Awards as he qualifies for them. LOGBOOK OF THE WORLD NOW EASIER THAN Ever! Bill Moore, NC1L, ARRL Awards Manager, reports: "In order to better accommodate new users as well as existing account holders, ARRL's Logbook of The World (LoTW) has been updated. According to ARRL Membership and Volunteer Programs Assistant Manager Norm Fusaro, W3IZ, these improvements were made based on tracking Manager LoTW help questions and listening to users. 'Through the efforts of Membership and Volunteer Services Dave Patton and Information Technology Manager Jon Bloom, we have also added an automated results table on the LoTW Users Home Page that lists members in numeric order who have achieved the Triple Play Award,' said ARRL Chief Operating Officer Harold Kramer, WJ1B. 'IT personnel have also fixed a number of long standing issues with Logbook in recent weeks, and some additional enhancements are underway.'

Some things that have been added:

- An LoTW User's Corner that includes quick links to log onto your account, save or renew a certificate and ways to address PC failure.

- The GET STARTED section <http://www.arrl.org/lotw/start.html> has been simplified with links for each of the four steps in the certificate process.

- LoTW instructions are now available in nine languages: English, Dutch, French, German, Italian, Russian, Slovenian and Spanish. Options to select a language have always been available, but they have now been moved up front to the GET STARTED page. The languages are identified with icons of flags to represent each language.

- The GET STARTED pdf file has been updated to include new screenshots and refinement of some of the processes.

- The software download section now consists of only three icons representing the three operating systems for which software is available: Windows, Mac and Linux. The user simply selects their operating system and they are redirected to the download specific to their system.

- A new link has been added for QSL Manager, Club Calls and DX-peditions. This link gives details on establishing an account for these special operations and includes a section for 1�1 call signs.

- A new PowerPoint overview is available from the LoTW site. This presentation has also been added to our multimedia library.
  <http://arrl.org/multimedia>
  The program is an overview of LoTW and what users can expect from the service. There are screenshots of LoTW pages, as well as a condensed version of the certificate and award application process.

With more than 200 million QSOs submitted, ARRL's Logbook of The World system is a repository of log records submitted by users from around the world. When both participants in a QSO submit matching QSO records to LoTW, the result is a QSL that can be used for ARRL award credit. Yaesu is the principal sponsor of the LoTW Web site."

SILENT KEY. It was reported by Ben, PA5BW, that Solofo Randrenjason, 5R8ET, became a "Silent Key" (SK) unexpectedly in the hospital on January 19th, "during a more or less routine surgery". Ben states, "Solofo was my colleague and later even my 'second man' at the Radio Netherlands shortwave station in Talata Volonondry in Madagascar, where I worked there back in 1993-1995. Together we started the Madagascar Amateur Radio Association in 1995. His keen interest in radio and shortwave lead to his amateur radio license in 1994, using a simple transceiver borrowed from visiting Japanese hams and a homebrew dipole antenna. Solofo was the first local ham to obtain an amateur radio license. All licensees before that were foreigners that traded in their foreign calls for a local ham radio permit. Several other local hams were to follow him which led to the first ever 5R8 Ham Dinner in Antananarivo in 1995, counting nine (!) 5R8 hams on 10 square meters. The highest 5R8-concentration ever. I remember Solofo as a very friendly and kind man, a real friend (and a very loyal one) and a committed amateur radio DXer. For me it is very hard to understand that I will never meet him again. The world will be a little bit colder without him. Our hearts go out to those that are left behind: his family, his colleagues at the radio station, his fellow radio amateurs."

Possible new amateur radio band allocations on Norway:

A report of the Norwegian amateur radio club (NRRL) states that they were successful in persuading the licensing authority to add new bands to the amateur radio band plan. This includes an allocation of 490-510 kHz on a secondary basis with a maximum power of 100 watts PEP (only A1A). On the 160m band spectrum 1850-2000 kHz they intend to allow an average power of 10 watts insteadt of 10 watts PEP. The frequencies 5260-5410 kHz will be opened to all Norwegian HAMs on a secondary basis with a maximum power of 100 watts PEP. The 12m band will be extended by 150 kHz and allocated from 24740-24990 kHz with a maximum power of 1000 watts. There will be added also some parts between 70-70.5 MHz. The NRRL states that the new amateur radio law is expected for the spring 2009.

Today I had the great pleasure of completing an EME contact on 6m
with TN5SN during his moonset. Nicolas has a great setup there
with his I0JXX 7 element yagi and a kw. His best signal here
today was -25 dB, but when I ran a sked with him earlier in the
week, his signal on two sequences was strong enough to be audible
at -18 and -22 dB!   It sure is great to have such a well equipped
6m station and experienced operator QRV from a very rare DXCC! GL

Sweden. A mail from Arne SM7AED translates into English as;
New amateur radio band in Sweden from today (29 January 2009).
>From today we do have access to a new general amateur radio
band in Sweden, 50-52 MHz. The official information from the PTS is;
The 50-52 MHz frequency band is available from now, to amateur radio
with an output of maximum 200 Watt. Existing 6 meter licensees will
not be debited any annual fee for 2009. Licenses witch expired
31 December 2008, does not need to apply to be prolonged. Allegations
is ongoing between the SSA and the PTS in a try to change the power
limit to 1000 Watt. But for now the limit is 200 Watt.
So now it just to hookup the 50 MHz antenna and get on with it

Hi everyone, I just wanted to let all of you know that today, after a lengthy process, I was able to obtain 6M privileges for Singapore. This will mean that there are 2 operators in Singapore currently, the other being Selva 9V1UV. Some of you may have worked me under my old call of VK8AH from Darwin. Hoping to apply the little knowledge I have obtained to a slightly different latitude! I will be very limited in capacity due to the regulations applied (6M is not normally allowed in Singapore) and as such I only have 50-50.2 at low power. However, its a start! After many DXpeditions and 16 first ever activities on 23cm I am happy to announce another mile stone in EME history. I will be working in Nigeria for several month starting in March. This gives me the opportunity to bring EME to Nigeria. We already formed a EME group (5N0OBA, 5N9AYM, 5N4BRJ, 5N0ATI and myself) which will be active on 2m, 70cm and 23cm. Our focus will be on 2m and 23cm.
RIG in detail see: http://www.mmmonvhf.de/latest.php?id=2244 -
However, what I am still missing is a preAmp for 2m. I would prefer a SP-2000 or any other kind that is reliable and includes the relays.
I am looking forward to work you. Many thanks to all of you!

FOR IMMEDIATE RELEASE

Today several team members leave their homes and start their journey to Desecheo via Puerto Rico. The entire fifteen man team will assembled by Saturday evening in San Juan. Sunday morning will be devoted to the required UXO (unexploded ordnance) training and afterward the team will travel to Rincon, Puerto Rico, the closest landfall to Desecheo. The rec.radio.info newsgroup, first established in 1993, has been

recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

KP5 - DESECHEO ISLAND, NA-095

It's getting serious with the activation of Desecheo Island (NA-095, USI OI-002S) which is ranking #6 on the Most Wanted lists worldwide. If everything works out like planned the operation will start on late Feb 12. The callsign will be K5D and the DXpedition will last until Feb 26. The team asks everyone not to establish personal QSO records and call them only on the bands/modes needed. They want to help many hams worldwide that need KP5 for an all-time new one. The budget has been exceeded unfortunately so more donations ae still welcome. More info about donations can be found on their website (http://www.kp5.us) via the button "How you can Help". There you can find also an online store with souvenirs and an online logbook updated twice a day. The first team members have left for Puerto Rico on Feb 6. The team members are Ralph,K0IR, Glen,K0JGH, Grant,K1KD, Bob,K4UEE, Tim,K5AC, Bill,N4NX, Dick,K5AND, Gary,K9SG, George,N4GRN, Mike,N6MZ, Mike,NA5U, Felipe,NP4Z, Neil,VA7DX, Steve,VE7CT, Glenn,W0GJ, Jim,W0NB, Gordon,W0RUN, John,W2GD, Gregg,W6IZT, Garry,W8OI, Eladio,WP3MW, and Jerry,WB9Z. There will be 15 men ashore at any time and the staff will be exchanged during the operation. Their equipment includes eight IC-756 Pro III, two IC-7000 and several Alpha power amplifiers. They have three different antenna locations planned with several Stepp-IR verticals, a Cushcraft A3S for 40m-10m, a Cushcraft A3WS WARC yagi, a 4-square array for 30m, dipoles and verticals for 80m/160m. The 160m antenna location is said to be good also for Europe. The QSL manager for K5D will be Bob,N2OO, who will be supported by a dozen OMs of the South Jersey DX Association. This is their frequency plan:

Band	CW	SSB	RTTY
160m	1826 up/dn*	1843,3 up	---

Update on the K5D DXpedition..............

February 8, 2009
Everyone arrived safely in San Juan PR yesterday; the last group at about midnight. Last night we executed a contract for a helicopter to transport our heavier items including transceivers, amps, generators and shelters.

Fifteen Team Members plus a half-dozen USFWS personnel completed UXO (UneXploded Ordnance) training this morning.

Today was spent transiting from San Juan to our team HQ hotel in Rincon PR. On the way, we stopped at the Arecibo Radio Telescope (http://www.naic.edu), visit courtesy Angel, WP3R.

More news posted here (http://www.kp5.us/) as it becomes available.

Here are some photos taken today from Rincon; click HERE.

Ohio/Penn DX Special Bulletin No. 895.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 895.2
BID: $OPDX.895.2

February 10, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network the KP5 Web Page and VH2HV for the following DX information.

JIM SMITH VK9NS (SK).........

Bruce (G3HSR) reports (via VK2HV): It is with deep sadness that I inform you that Jim (VK9NS) passed peacefully away on Norfolk Island at 15:40 local time on 10 February 2009 after a short illness.

Jim is survived by his wife Kirsti (VK9NL) and his four children: Bruce (G3HSR), Stuart, Sheena and Fraser (all living in the UK).

Jim�s contribution to Amateur Radio, DX-ing and IOTA is inestimable. He will be sadly missed. Further information and condolences can be sent to Kirsti at jimkirsti@in.net.nf

FROM THE EDITOR (by KB8NW): After coming home from work today, I was shocked when I read my very first E-mail about Jim. Dxers throughout the world have lost one of their greatest icons in DXing. Noted for his DXpeditions to rare place, the "Heard Island DX Association"
<http://www.hidxa.nlk.nf>
and keeping Norfolk Island active on the air, Jim will surely be missed. Many will probably remember Jim for his famous 1983 VK0JS Heard Island DXpedition (along with his wife Kirsti/VK9NL signing VK0NL). If you are new to DXing and do not know about Jim, please take a few minutes to visit the Web page above and learn about this DX legend.

OPDX and its readers would like to send out our deepest sympathy to Jim's wife Kirsti and his four children Bruce/G3HSR, Stuart, Sheena and Fraser. Jim's signal will surely be missed on the air.

K5D DXpedition Update
Dated - February 10, 2009

The K5D Team continues to prepare for its early Thursday AM departure for Desecheo Island. Last night the team met and had dinner with USFWS participants, law enforecement personnel and members of the field research team. Due to continued questionable weather (which for some weeks has included large waves, dangerous surf, high winds and rain unusual for this time of year), the Team has made an important strategic decision.

For safety reasons, all personnel and equipment will be transported to Desecheo Island by helicopter. The possibility of Team members and crew members being injured, vessels being damaged and equipment being lost during a sea landing was too great a chance to take.

Today, all of the equipment, supplies, antennas, generators, food, shelters, tables, chairs and so forth were unloaded from the storage facility and loaded into a large moving van for transfer to the helicopter pad.

Tomorrow, representatives of the helicopter company will meet the Team, examine the cargo and prepare it for transit via sling load on Thursday morning. A second helicopter will ferry personnel. Because we're limited to only fourteen days on the island, doing it this way will allow us to get on the air sooner, stay on the air longer -- and all with a higher degree of safety.

The Team has voted, if necessary, to contribute more money of their own to help contain these incremental costs.

If you're inclined to contribute more to help, it would be appreciated.

At 1240Z the first helicopter with five Team Members aboard took off from Rincon and a few minutes later landed safely on Desecheo Island. The K5D Desecheo 2009 DXpedition is officially ON!

K5D DXpedition Update
February 12, 2009

February 12, 2009
Per Glenn W0GJ and Bob K4UEE @ 23:45Z: "Heavy winds during the day delayed several helicopter flights so we're running quite a bit behind schedule. For example, we had to wait until the last helicopter trip to begin erecting shelters. We're all exhausted and have quite a bit of infrastructure work yet to do (in the dark). Regrettably, this will delay our planned QRV until (hopefuly) near 1600Z tomorrow (Friday). We're sorry to disappoint those expecting us on the air tonight.

Hello to all VHF friends, many of you will remember TV-tower station LY2WR from 1980-90's. I am glad to confirm, that we now are QRV again and like before, can't live without clear horizon :) New QTH in KO24FO is very remote place, so remote that it is often impossible to reach during winter months, only if in good landrover or tank. Good thing is that there is no industry around, therefore very low levels of QRM. Not so good that it is 50km from Vilnius and obviously we will be active mostly during contests and extreme DX openings. As for contests, be sure to arrange sked with LY2WR, we are now capable of 800-900km without tropo. A few words about last BCC MS contest. It was our target during second part of 2008, during which time we built the new LY2WR station. The contest itself was great fun as always, many old friends called, as well as many new stations, which is nice. Not so nice was total lack of supervision from BCC organizers - sked- and half-sked QSOs were happening all the time, not because people want to cheat, but because of lack of information from Contest Committee on what exactly is a sked, what you can do and what you can not, on ON4KST chat and DX-Cluster. For example "I now CQ dir West" - is 20% of sked info to my understanding, no? About LY2WR QSL cards. During this QRT time, we may have lost some unanswered QSLs, if you need LY2WR QSL please email ly4u@lyradio.org with QSO data. You can see our new QTH and BCC MS Contest photos here: http://www.printqsl.com/lyac/262/ly2wr-2008/ 73 and cu on bands Rytis LY4U and Arvydas LY3BF - SOURCE: tnx Rytis direct to MMMonVHF

Justin G0KSC sent following message from the MMM Webside:
Hi, I just wanted to let you know of my website which includes many OWA Yagi designs by myself. My target is to acheive low SWR wide band Yagis with a clean pattern and hopefully, as short as possible. There is quite a collection now ofr 6,4 and 2 metre bands so hope fully, some MMM users will find some use for these. USE the Free Yagi Antenna Designs for Ham Radio at http://www.g0ksc.co.uk/

5X, UGANDA. Nick, G3RWF, will once again be active as 5X1NH. He will be in Fort Portal in western Uganda starting March 11th for about two months.

Nick informs OPDX that he bought a (U.S.) vertical for 40 and 80 meters, so he feels that he will do a bit better on those bands this time. However, he will not have a 160 meter antenna (states, "there is simply not enough room for an antenna, unless I visit my friend 5X1GS and use his antennas - which I might well do."). He also mentions, "I prefer CW but I have now worked over 20k CW QSOs, so I have it in mind to work some data (RTTY and PSK31). Will work SSB whenever signals are good enough." Nick informs that one of the problems in 5X is unreliable power (it is difficult to promise that there will be power at any particular time). He plans to buy or rent a car battery this trip because he will not have a vehicle to tap into. Since he is doing voluntary work there, look for Nick on the air mainly during the early mornings, evenings and weekends. QSL via G3RWF.

9K48, KUWAIT (Special Event). Members of the Kuwait Aamateur Radio Society will activate the special callsign 9K48NLD from their K2RA Headquarters [PLEASE NOTE: Not from IOTA AS-118 as initially planned.] between February 25-26th. IOTA NEWS........................

AS-056. This one was received late for this week's bulletin, but worth mentioning. Activity this past weekend by Joe, JA4PXE, as JA6PXE/6 was from Danjo-Archipelago a rare IOTA. Joe was only on 40 meters CW using an IC-703 running 10 watts into a Inverted V antenna. QSL via his home callsign, direct or by the Bureau.

EU-008. Operators Doug/GM0ELP and Simon/M0GBK will be active as MM3T from the Isle of Skye (IOSA NH07, SCOTIA CN14, WW Loc. http://freespace.virgin.net/douglas.maxwell/MM3T/mm3t.htm

OC-164. John, VK6HZ, will once again be visiting Rottnest Island this year. Dates of operation will be March 3-9th. Operation will be holiday style (he states "in between beer, swimming and, of course, quality time with my family!) Equipment will be IC-7000 running 100w into a Buddipole, running all modes. QSL via VK6NE. Online log will be available after the trip at: http://www.vk6hz.com

KH6, HAWAII. Bill, AC0W, will be operating KH6/AC0W during the ARRL International DX Phone Contest (March 7-8th) from OC-019. Activity will be on 80-10 meters. There is a possibility of some operations a few days before and after the contest, as time allows. QSL LoTW and AC0W.

KP5, DESECHEO ISLAND DXPEDITION (News/Update)................

* The K5D DXpedition to Desecho Island is now on the air until February 26th. Activity will be on 160-6 meters using 6-8 stations on CW, SSB and RTTY. QSL via N2OO.

* UPDATE February 14, 2009 (2330z): "Because of higher-than-expected winds which delayed helicopter trips, we were unable to complete our full setup on Thursday. At this writing, those problems are behind us and the camp and all antennas are in place and working.

  The QSO count is just under 10,000 in the first 24 hours with only two stations operable for most of that time. We now have five stations on the air hoping for two or three more tomorrow. We have no internet connectivity as our satellite link and our 900 MHz terrestrial link both failed. We have a plan that should get them both working in a day or two. In the meantime, no logs have been uploaded and, of course, no photos. When the links are working you'll learn about it here.

  The Team is in high spirits and the weather is good now, nice breeze, calm seas but hotter than expected.

  Last night we were forced to move our 40M operation away from our planned frequency. This was because of the RTTY contest which wiped out most of the band for us below 7.1MHz. The contest ends tomorrow and we expect much better 40M performance especially to Europe. We're sensitive to the fact that some EU countries/amateurs cannot transmit above 7.1MHz; this problem will self-resolve when the RTTY contest ends late tomorrow." (KP5 Web page)

* ACTIVITY ON THE BIRDS. Thanks to the support of AMSAT-NA, the team is equipped with a Kenwood D7 HT and Arrow antenna, as well as training on using the FM satellites. Satellite operation is not expected to begin until the second half of the DXpedition, and then only on an as available basis. A second repeater on AO-51 (145.88/435.150) will be activated on February 16th and reserved -only- for contacts with K5D while within sight of the island. K5D may be active on either AO-51 repeater, SO-50 or the ISS voice repeater modes if available. Users attempting contact with K5D should be aware the the DXpedition does not wish to exchange grid squares during the QSO in order to allow more operators the chance for a QSO. Their grid square is FK68, same as most of Puerto Rico. Please be courteous and limit yourself to one QSO.

* ONE LESS OPERATOR. OPDX was informed that Brad Farrell, K4RT, did not make the trip due to a family illness.

* Remember, for updates visit the KP5 Web page at: http://www.kp5.us

JOIN A DIFFERENT KIND OF AMATEUR RADIO COMPETITION

There is no doubt that our time-honored hobby is going through turbulent times with the intake of new hams decreasing in many countries. The overall Amateur Radio population has diminished dramatically.

As an independent body, the group at Radio Arcala, OH8X is poised to try some new methods to attract young people congregating in many non-traditional hangouts such as Virtual World on the internet. The Arcala radio station is the first-ever amateur radio station to be active in Virtual Reality. Millions of computer-minded youngsters gather there daily in an easy-going leisure mood.

The overall Radio Arcala strategy is spelled out on the OH8X Webpages but one of the key buttons - ON YOUNG PEOPLE'S TERMS - is still to be drafted.

See http://www.radioarcala.com

We now challenge members of our fraternity of all ages to draft the text for this button in a way that is both appealing and informative enough to encourage today's youth to take the step we once took.

CONTEST OUTLINE

Consider yourself as another 18-year old enthusiastic ham of today. Challenge yourself to talk to a bunch of young people ranging from 15-20 years of age in a large room with the occasion devoted only to yourself. Your mission is to tell them about the excitement of being an amateur radio operator today and why those in the audience should join our ranks.

Draft your paper/talk to be no more than 250 words in length in English or Spanish.

Remember a few things:

1: These people have many other tempting options to occupy their youthful and modern mind and time.

2: They can take only a certain amount of history at once. Be balanced.

3: Consider that one of the current obstacles is the license exam; it is an entry barrier not found with many other hobbies. Address that issue, too.

4: Remember that electronics has become a highly complex science and that experimentation may not exist as an option the way it did before.

5: Find the most positive and truly unique features that Amateur Radio has. Highlight the positive and truly unique features of Amateur Radio.

6: And finally, take this not only as a fun game but consider that, indeed, the future of this hobby is in the hands of people like you.

Deadline:

Please submit your paper by email no later than March 15, 2009 to oh8x@sral.fi (English) or yv5amh@iaru-r2.org (Spanish).

More than one text can participate and more than one submission can be selected, if seen practical.

The body to review the not-to-be-disclosed papers with their national focus group is composed of the following individuals: Hans Blondeel Timmerman, PB2T, IARU Region 1, (Chairman); Reinaldo Leandro, YV5AMH, IARU Region 2; Dave Sumner, K1ZZ (ARRL); Olaf Lundberg, G0CKV (for RSGB); Tonno Vahl, ES5TV, (ERAU); Hans Johansson, SM0IMJ (SSA) and Juha Hulkko, OH8NC and Martti Laine, OH2BH (Radio Arcala).

Prizes:

In addition to the award of first, second and third prizes in the form of three (3) amateur radio contest-like plaques, the winning text will be made available to a large group of people in Virtual Reality. You will be invited to be part of a Radio Arcala working group drawing up a next-generation recruitment campaign. Your work will be featured in national magazines by the above jury plus on the DX Summit and the Radio Arcala Website. You will be pleased with your achievement. Be aware that the review committee can for editorial reasons make style changes to the text before publication.

Note for editors:

By sending a note to Radio Arcala at oh8x@sral.fi
you can obtain high-resolution pictures taken from the virtual space at the first amateur radio station there - OH8X. Please note that the pictures are high-resolution, 6.5MB each, and assume an address that can receive such files.

WSJT MODES
Dear Users of WSJT: I'm looking at some new ideas for future development
of the WSJT program, and I need some user input. JT2, JT4, and the "QSO
mode" of WSPR have always been considered as experimental additions to
WSJT. I learned a lot from their implementation, and I've received some
useful feedback from others who have used them. I have mentioned before
that they may not become permanent additions to WSJT. My present
assessment is these modes are not much being used, and I'm considering
removing them from future versions of WSJT. Do I hear any advice to the
contrary? ... 73, Joe, K1JT

2M EME WAS

I have compiled my information and put it on my website. Quick and dirty, I am obviously not much of a web designer, but hopefully it is usable. This is just a first cut! While the information was good at the time I worked the stations, I am certain some of it is no longer valid. Some stations may be qrt, some may have moved, some may have improved their stations. I apologize to all the big stations I have left off the list, it was not on purpose. My crude website is:
http://home.comcast.net/~kd3uy/site/
Please get back to me OFF LIST. We could clog up the reflector otherwise. I will update with your comments as quickly as I can. I hope this helps some of you, and I hope some of you can help me make it much better.

Allan informs OPDX that he will be taking an amplifier and a wire antenna for Top-Band with him which should be a little better and stronger for this band. However, he mentions that this is the rainy season, with lots of lightning storms around the Lakeshore so please don't expect miracles. Harry is already fairly active on RTTY and PSK31, but 7Q7AH hopes to fill some gaps when Harry is busy. There is also a chance that John, 7Q7JL, will also visit the shack to transmit if the roads are okay to drive on between the Lakeshore and Blantyre. QSL route is to G0IAS, DIRECT ONLY, with sufficient funds for card return. NO return postage... NO return card. Allan states, "Sorry people but postage is expensive in the UK...and the managers pockets are only so deep.!"

8Q, MALDIVES (AS-013). Tom, PF4T, will be active as 8Q7TB from Embudu between June 8-25th. Activity will be on 40 and 20 meters using SSB.

FH, MAYOTTE. Remember to look for Phil/G3SWH and Richard (Dick on CW)/G3RWL to be active from Mayotte this week between February 26th and March 5th. Mayotte counts as AF-027 for IOTA purposes. Both operators will use the single callsign of FH/G3SWH. Their activity will be mainly on CW on all bands 80-10 meters. There may be some 160 meters CW activity, but this will be entirely subject to QRN, antenna space and local site conditions, so there are no promises. Richard may also operate some RTTY towards the end of the trip. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many bands as possible. NA-186. Cezar, VE3LYC, is planning a DXpedition to one of the most wanted IOTAs in the world called Fox Island. Cezar states, "This group sits on the #1 position on the NA-IOTA Most Wanted list with only 3% of the IOTA members having it confirmed. The only activation was back in 1993, for only a few hours.

Several years ago Fox Islands had been designated polar bear resting site in the Churchill Wildlife Management Area and became off limits for the public. This past Thursday (Feb.

19th), I had finally been informed that a permit had been issued for my DXpedition, and I will be able to travel to the islands between March 31st and April 3rd. Note that I have also requested a special callsign from Industry Canada, but their evaluation is likely to take a little longer. I will travel with two professional guides who will provide transportation to the island by snowmobiles, bear watch and safety, as well as all logistical support required for such an operation. Outside temperature at that time of the year is expected to be around -10 C. If I'll be able to obtain the special callsign, I will set up a page at QRZ.com where I will update everyone on what follows." Costs of this operation are very high and Cezar is seeking any possible support from both group and individual donors. Cezar states, "Any donation will be truly, very much be appreciated. There are two things that I will include later on the QRZ.com page. First, about the QSLing. Those who choose to mail direct requests should check the cost of mail from Canada to their QTH. QSL requests received with insufficient return postage will be automatically sent via the bureau. Secondly, I will be camping in total wilderness without internet access on the island. As such, DX Cluster posts addressed to me as criticism or requests are useless. I am determined to give all parts of the world a chance, and I ask DXers to respect my direct calls."

J8, ST. VINCENT. Dave, G3TBK, is once again active from here as J88DR. He was in last weekend's ARRL DX CW Contest but is also expected to be in ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band/Low-Power entry. Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, but mostly on CW. QSL via G3TBK, direct or by the RSGB Bureau.

JD1, OGASAWARA. Operators Hide/JM1LJS and Hiroyuki/JG7PSJ will be active as JD1BLK and JD1BMH, respectively, from Chichijima Island (AS-031) between April 29th and May 12th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via their home callsigns.

KG4, GUANTANAMO BAY. Dan, W0CN, will be on a short work assignment and active as KG4CN from Guantanamo Bay, Cuba (GITMO, IOTA NA-015, Grid FK29), from February 26th until March 9th. Activity will be on 160-10 meters, mostly SSB and some CW. Also, look for Dan to be operating in the ARRL DX SSB Contest (March 7-8th). QSL to W0CN (LoTW/direct/Zero-Bureau).

KP5, DESECHEO ISLAND DXPEDITION (News/Update)................

* The K5D DXpedition to Desecho Island continues to be on the air until February 26th. On February 20th, "Group #2" left the island and was replaced by "Group #3". "Group #1" will be staying during the whole K5D operation. Pictures of the groups as follows:
 #1 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group1.htm
 #2 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group2.htm
 #3 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group3.htm
The team has fought hot weather, high winds and seas which cause them to lose several antennas on the beach due to guy-points being washed

away, but the DXpedition continues to operate effectively. Plenty of new pictures are being added daily to the DXpeditions Web site and the K5D QSO count keeps climbing high. As this was being written (Sunday at 1823z), the K5D QSO count was just under 86k contacts (+41k/CW, +38k/SSB and +5k/RTTY). This count does not include QSOs being made on the satellites. Remember, online logs at available at:
http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/lookup.htm
Activity will continue on 160-6 meters using 6-8 stations on CW, SSB and RTTY. QSL via N2OO. Remember for updates/logs/pictures, visit the KP5 Web page at: http://www.kp5.us

MJ, JERSEY. Operators David/G3NKC, Dave/G4BUO, Martin/G4XUM and Phil/GJ4CBQ will be active as MH4K during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via G3NKC.

P4, ARUBA (Change of Plans). Andy, AE6Y, will be active as P49Y during the ARRL DX SSB Contest (instead of the CW Contest -- March 7-8th) as a Single-Op/All-Band entry. QSL via AE6Y.

PJ7, ST. MAARTEN. Bil/W8EB and his wife Dorothy/W8DVC will be here between February 22nd and March 19th. Activity will be on 160-10 meters, CW, SSB, RTTY and PSK31 as PJ7/W8EB and possibly PJ7/W8DVC. Operations will be limited because he is on holiday. Bil will operate in the ARRL DX SSB Contest (March 7-8th) as PJ7B, and as a Single-Op/All-Band/Low-Power entry. This will be Bil's 14th consecutive ARRL DX SSB Contest participation from St. Maarten. Also look for him to be in any RTTY contests. All QSL requests go to W8EB. Visit their PJ7B Web site at: http://www.qsl.net/pj7b/

HK1AT QSL STATUS. The HK1AT Team reports that there was a mistake in the printing of the QSL card and the name of the island (Mucura Island, IOTA SA-078) was omitted on all the QSLs confirmed so far. RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Multi-Op entry. QSL via DK4VW.

S9, SAO TOME (AF-023). Georg, DK7LX, will once again be active as S92LX from June 13-27th. Activity will be on 80-10 meters CW only. He plans to have a Web site available which will include an online log search. QSL via his home callsign, direct or by the bureau.

SPECIAL EVENT. Look for special event stations to be active with the "1658" within their callsigns on February 26th. Activity is to celebrate the "Treaty of Roskilde" when the three most southern provinces of Sweden [Skane (Scania), Blekinge and Halland] became under Swedish rule after more than 800 years of Danish rule. Working these stations is good for the "Roskilde 1658 Award". To qualify for the award you must work two Swedish award callsigns with 1658 in the call, or OZ1658ROS and one Swedish award callsign. During the rest of the year four Swedish award callsigns or three Swedish award callsigns and OZ1658ROS are needed. The award is also available for SWLs. All callsigns, maybe with the exception of SH1658DK, will be active sometime during the day on February 26th. Most activity will take place after work hours, that is around 1600z or later, on 80m and 40m. Some stations will be active on 20m and other DX bands around 0800-1500z, if conditions permit. Also, SB1658OZ will be active on PSK31 near 14070 kHz on February 26th, if conditions permit. This station is situated in the province of Blekinge, and is also valid for the very rare "Lan K" for the national WASA/HASA awards issued by their IARU organization, SSA. Only a handful of hams are active on the HF bands from the county of Blekinge. "Roskilde 1658 Award" was presented in the February 2009 issue of CQ Amateur Radio. Check out their activities calendar on the Roskilde award's Web site for complete information at:
http://www.sk7bq.com/roskilde
The calendar will list all callsigns that will be active with their approximate dates/times and frequencies. The calendar is updated continuously when new activities are announced. An online log is available as well. It is updated at least every month if there has been activity with the callsigns. It will also tell you if you have qualified for the award.

SV9, CRETE (EU-015). Willi, DJ7RJ, will be active as SV9/DJ7RJ between February 25th and March 15th. Activity will be on 160-10 meters, using CW and SSB. QSL via his home callsign, direct or by the bureau.

T2, TUVALU. Operators Bob/W7YAQ and Bill/N7OU are now active on Tuvalu as T27A and T27OU, respectively, until March 2nd. Both operators were active this past weekend as T27A in the ARRL DX CW Contest as a Multi-Single entry. Look for activity this week on 160-10 meters, mostly CW, some RTTY. QSL via their home callsign.

TA, TURKEY. Members of the Telsiz ve Radyo Amatorleri Cemiyeti Mustafakemalpasa Subesi (TA3KZ) and the Balkan Contest Club (LZ1KZA) will activate TA3KZ from small village Tirnova near Mustafakemalpasa (QTH Loc:KM49FV) during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via TA3KZ, by the Bureau or direct.

V3, BELIZE. Gerd/DJ4KW and Gisela/DK9GG will once again be active as V31YN/p and V31GW/p, respectively, from Blue Marlin Lodge on Southwater Caye (NA-180), between February 26th and March 3rd. Activity will be on all bands and modes. QSL via their home callsigns, direct or by the bureau or LoTW.

VP2M, MONTSERRAT (NA-103). Operators Mike/W1USN, Scott/W1SSR and Bob/AA1M will be active between February 25th and March 7th. Their callsigns have not yet been assigned, but they have requested VP2MPR (W1USN) and VP2MPL (AA1M), if not, VP2M/homecall. Activity is planned for CW, SSB and PSK-31. QSL via their CBA.

VK9M, MELLISH REEF. Operators George/AA7JV and Tomi/HA7RY will be active as VK9GMW in what they call "another low-key, simple DXpedition", from Mellish Reef between March 22nd and April 6th. Please note that the dates are approximate and may change due to weather. The operation will have a strong low-band focus, although VK9WMW will operate on all HF bands. QSL will be via HA7RY, by the Bureau or LoTW or direct to: Tamas Pekarik, Alagi ut 15, H-2151 Fot, HUNGARY. DX SUMMIT ALERT

The Old OH2AQ DX Summit Goes Offline November 19, 2008 at 1000 UTC

The new DX Summit website at http://www.dxsummit.fi/ debuted on May 23, 2008. The site has been redeveloped from the ground up and uses the latest technology available. The new DX Summit has been ramping up steadily and today the number of hits is approaching 1 million a day. In addition to providing the same functionality as the old DX Summit, the new platform offers the necessary flexibility to easily add new features which are currently on the drawing board.

The old DX Summit homepage at http://oh2aq.kolumbus.com/ redirects users to the new DX Summit website. However, all the old DX Summit data pages are still online but the trend for daily hits has decreased, as we expected. The number still remains high but the time has come to shut down the old DX Summit machine which may cause your software to stop working.

To try and maintain compatibility with older software which may no longer be supported, the new DX Summit includes a series of DX spot webpages which are 100% HTML compatible with the same pages on the old DX Summit. Simply changing the URLs in your software according to the information below should keep it working with the new DX Summit. If your software does not allow you to edit the URLs, please contact the author of your software and ask them to change the URLs according to the information below.

New URL: http://www.dxsummit.fi/text/dx10000.html

Software authors who wish to implement data exchange with the new DX Summit should visit http://www.dxsummit.fi/technical.aspx for information on data formats and URLs. If your software does not work with the new DX Summit, we encourage you to forward this information to the author of the software you are using.

We hope all software relying on the DX Summit can be successfully updated to work with the new DX Summit. We look forward to providing you with this valuable DX resource for many years to come!

73,

OH8X Team

The GB3VHF 2m beacon is to close down in December 2008
After nearly fifty years of near continuous service from the transmitting station at Wrotham in Kent (JO01DH), the 2 metre beacon GB3VHF will fall silent towards the end of December 2008. For a good few years the beacon enjoyed the site facilities at Wrotham by means of a 'peppercorn rent'. At this time the site was owned and operated by the amateur radio friendly BBC. Full details can be found in the press release at http://www.gb3vhf.co.uk/

We did get a link with the following Info by Ian, G0AFH, Gaetan ON4KHG and Kevin, G1KAW and would like to open a discussion at our MMMonVHF FORUM:

SPORADIC E in the southern hemisphere
As you might have been seen in past weeks we did build up a new SPORADIC E Service page as well for the southern hemisphere where the summer (and so sporadic e) will occure hopefully soon. PLEASE have a look at: http://www.mmmonvhf.de/es_s.php and use the input at these page for an opening in the SOUTH. The switch between the both areas are made in the drop down menue at PROPAGATION... MMMonVHF is trying to give an overview of Sporadic E on other continents than Europe and is asking to send reports of Sporadic E openings that occured on 144 MHz worldwide!

Netherlands Antilles to net new DXCC Entities for 2008   Over the past year much discussion has been made about the possibility of new DXCC entities happening once the break-up/disbanding of the Netherlands Antilles takes effect on December 15th, 2008. This past week, the President of European DX Foundation (EUDXF), Hans, PB2T, who visited ARRL HQ in July and had a discussion about the DXCC status of Netherlands Antilles, feels that after December 15th, 2008, it looks like four new entities will be added to the DXCC list in the future (Curacao, Sint maarten, Saba, Sint Eustatius and Bonaire).

CQ COMMUNICATIONS ACQUIRES WORLDRADIO MAGAZINE

(Hicksville, NY and Sacramento, CA, November 12, 2008) -- CQ Communications, Inc. has acquired "WorldRadio" magazine, CQ Publisher Dick Ross, K2MGA and "WorldRadio" Publisher Armond Noble, N6WR, announced jointly today. CQ, based in Hicksville, New York, currently publishes "CQ Amateur Radio, CQ VHF" and "Popular Communications" magazines.

"WorldRadio", based in Sacramento, California, has been published monthly since July, 1971, with a primary focus on the human side of ham radio. "CQ", a general-interest ham radio magazine best known for its support of DXing and contesting, has been in print since January, 1945.

Armond Noble, N6WR, Publisher of "WorldRadio", said that at the age of 74 the time had come for him to retire. "I wanted to be sure that 'WorldRadio' found a good home, and that our readers would continue to be served by an independent voice in amateur radio," Noble said.

"CQ" Publisher Dick Ross, K2MGA, said, "'WorldRadio' has filled an important niche in our hobby for nearly four decades. We welcome "WorldRadio's" readers to the CQ family, and we look forward to meeting their needs for many years to come."

Current plans call for "WorldRadio" to continue to be published online as part of the CQ family of magazines, with Editor

```
Nancy Kott, WZ8C, continuing in that position. "WorldRadio" subscribers
will also have their subscriptions transferred to "CQ" magazine. Readers
will be notified of details as plans are finalized.

GB3VHF closedown new moves by the RSGB

Chris, G0FDZ, did receive a letter from the GM at RSGB HQ stating that the Board has asked him to enter into discussions with the site owner, with regard to seeking the possibility of a more realistic site rental for GB3VHF. This is good news indeed and I have been asked that until discussions are completed that I keep GB3VHF on the air. This I am happy to do and I am grateful that the Board has intervened on this matter. Have a look at MMMonVHF FORUM:

Hello! Mike has put together some thoughts about his recent EME DXpedition to P29, and I have put them up on my website so you can read about his adventure: www.bigskyspaces.com/w7gj/P29NOTES.doc
Mike did a great job under very adverse circumstances. He was stronger here on 6m EME than he was on 2m, but I was very pleased to contact him on both bands. I can't imagine how he had the energy to single handedly undertake EME on 2 bands at once! I think Mike needs a vacation now! Thanks for sharing the notes about the trip with us, Mike! VY 73, Lance

MMMonVHF is trying to give an overview of Sporadic E on other continents than Europe and is asking to send reports of Sporadic E openings that occured on 144 MHz worldwide!

Chris, SP7DCS, plan to be qrv during the contest on 2m, 70cm and 23cm CW random unassisted. Last weeks I was working to get 70cm system running. My 4 yagi array is up again with repaired preamp and TX line. Old 250W PA has been retired and I want to try new 400W SSPA for the first time. I do hope it will work as I had no opportunity to test everything together before. I will change bands depending on activity level and conditions, but as I have TVI problems on 70cm I will on this band mostly during the night. SOURCE: Chris SP7DCS via MoonNet

Plan is to have a sloper with passive directors for NW (US/JA) and NE (EU, etc), a dipole at 35 ft., and verticals with just a few radials on the other bands. It is possible that I will be able to access 'Blackbeard's Lookout Tower' that is about 500 ft. away; if so I will hang a long wire and use that on all bands! (Last year had better antennas at about 80 ft. on the top floor of a hotel; they worked well!). Radio is a K3, may try to take a 250w amp (the legal limit in C6A) if I can meet the new travel weight and size limits..." He will be active outside of the contest. XU, CAMBODIA (Also XV and XW). Tom, KC0W (ZD7X), who has been working here, expects to be active as XU7XXX in a few contests in the next several months. Look for him to be active during the CQWW DX CW Contest (November 29-30th) as a Single-Op/Low-Power entry, the ARRL 160-Meter Contest (December 5-6th), the CQ 160-Meter CW Contest (January 23-25th [2009]) and the ARRL DX CW Contest (February 21-22nd [2009]) as a Single-Op/Low-Power entry. By the way, his 160m antenna will be a dipole/vertical placed on the beach 5 meters from salt water. In an excerpt from an E-mail sent to OPDX, Tom informs OPDX of the following: "Anyway, I relocated from St.Helena Island to Cambodia less than 2 months ago. I was ZD7X on St.Helena..... After 45,000+ QSOs as ZD7X........I also plan on operating from Laos & Vietnam when my long term (6-8 month DXpedition from Cambodia is over). I visited Laos & Vietnam a few weeks ago scouting good DX locations. I found some real nice ones with great take off angles over the ocean, at least in Vietnam because Laos is land locked.

I have found a GREAT place here in Cambodia on the beach to string up a dipole over 100% salt water. I kick myself everyday for not bringing along a vertical for 160. Even one of those MFJ 80/160 verticals would work OK placed right over the salt water. I have spent the last month+ looking for tubing for constructing a 80/160 vertical. No such items exist here in Cambodia!!! Where is Texas Towers when you need them, hihi!!!

As long as propagation exists between us, I believe we should be able to work something out on 160.......I ONLY work CW.

Out of the 45,000+ QSOs I made as ZD7X over my 11 month DXpedition to St. Helena, I made about 240 160 meter QSOs. ON4UN (who I did work on 160) would have died if he saw my ZD7X 160 antenna. It was a 160 meter dipole with the highest point (the feed point) at 8' above the ground. The ends of the antenna sloped down to less than 3' off the ground. My rented home was about 1 mile from the ocean, so the direct effects of the salt water could not have been that great on the antenna.

I feel that my new 160 antenna with with both legs placed right over the ocean will help my signal pretty well......Time will tell. As on St. Helena, it all boils down to propagation on 160. As you know, 160 is a

VERY weird band according to openings.

You are correct not seeing my TENATIVE call of XU7XXX on the DX Clusters yet. It should be issued in the next 7-10 days or so according to the radio licensing guy I met with. My call must first be approved by the Cambodian Minister of Communications.....

Best from Cambodia, Tom - ZD7X, TO0O,KC0W (XU7XXX?)"

ADDED NOTES: QSL via KC0W, DIRECT ONLY. However, he mentions that QSLing may take up to 8 months or longer. He also states, "After operating from Cambodia for 3-4 months I plan on activating Laos and Vietnam for an extended DXpedition of up to 3 months in each country."

Activity will be on 160-10 meters, mainly CW, using 100 watts only into a two element vertical and windom antennas. He will also be an entry in the CQWW DX CW Contest (November 29-30th). QSL via EB7DX.

2008 LOW-BAND SUCCESS STORY FROM MARKET REEF
OJ0B & OJ0J 2005-2008 LOG SEARCH ONLINE

In case of any uncertainties about your low-band QSOs, here you have a much anticipated log search machine and a short recap.

http://df3cb.com/logsearch/oj0/

QSLing for the 2008 operation is happening as we speak. Additionally, all 2005 QSLs were sent to the bureau network some six months ago. All logs are open for QSLing.

We like to thank Bernd, DF3CB for setting up this log search for us. Our QSLing is done using his QSL management software.

Just download it and enjoy whether printing on labels or directly onto QSL cards!

FROM THE OFFICES OF ARCALA EXTREMES

ARCALA EXTREMES LAUNCHING CQWW CW TEAM

Snow and ice are present in the Far North at the home of OH8X, and preparations are underway to boost the signals globally, largely depending on a regular friend - Aurora Borealis. Pasi, OH2IW will be at the controls and running OH8X single-operator, all-band. Keep an eye on this station and observe its Northern sound. For more, see www.radioarcala.com.

The sister station CU2X will again be operated by Toni, OH2UA, following his smashing of the European SSB record by a wide margin. He is now determined to do the same on CW. This is from the new QTH, and you can read more at www.cu2a.com.

The second sister station TC4X in Asian Turkey will be activated by Martti, OH2BH, Pertti, OH2PM and Tefvik, TA1HZ. They are there to take the first steps for setting up a permanent station with more firepower while bringing a breath of old times to the game.

Adding to the lineup its X-rated signals will be the team's associated Eastern Aland Island super station signing OH0X, again mono-band, with Pekka, OH2TA at the helm.

Radio Arcala's propagation department, Ilkka, OH1WZ of Palos Verdes Sundancers fame will be in charge of the OH2BH station, mono-band, with his deep-space telescope to see whether the particles streaming down with the solar wind will pass Radio Arcala or hit it straight on the face.

And finally, representing the Arcala senior citizens department, Ville, OH2MM will be operating mono-band as CN2M as the guest of Jim, CN2R. This will be from Casablanca, Morocco.

Their ultimate categories are subject to a final decision when looking at the world on the starting grid minutes before the start of the race.

>From NASA Page: After two-plus years of few sunspots, even fewer solar flares, and a generally eerie calm, the sun is finally showing signs of life! "I think solar minimum is behind us," says sunspot forecaster David Hathaway of the NASA Marshall Space Flight Center. His statement is prompted by an October flurry of sunspots. "Last month we counted five sunspot groups," he says. That may not sound like much, but in a year with record-low numbers of sunspots and long stretches of utter spotlessness, five is significant. This represents a real increase in solar activity. SOURCE: http://science.nasa.gov/default.htm

5R8EM Sainte Marie Island 2008 HF EME - QSL news and follow-up
Thank you all again, we already received a lot of QSLs and 'good words'. Our QSL card is still 'in production' so wait a bit to get our confirmation. Very soon, the follow-up of this expedition will be done at http://www.f1hdi.org in the EME menu. There are already some nice pictures to see , but the site is a proto and I expect to have a brand new one with more contents and more professional looking soon. A new EME Expedition in 2009, well, why not !, if you know of some sponsors they are welcome and we should try to be ... multibands... - see: 5r8em.blogspot.com/

FOR IMMEDIATE RELEASE: November 18, 2008

CQ Magazine Calls on FCC to Resume Amateur Enforcement

(Hicksville, NY November 18, 2008) -- "CQ" magazine is calling on FCC Enforcement Bureau Chief Kris Monteith to move swiftly to name a successor to Riley Hollingsworth, K4ZDH, as Special Counsel for Amateur Radio, and to bring FCC enforcement back to the ham bands.

Writing in his &quot;Zero Bias&quot; editorial in the December 2008 issue, "CQ" Editor Rich Moseson, W2VU, noted that the Commission not only has failed to name a successor to Hollingsworth, but that not a single amateur enforcement action has been taken since his retirement this past July. At that time, the editorial noted, the amateur radio community was assured that the Commission's dedication to enhanced enforcement in the Amateur Service remains strong. However, the FCC's total inaction since July suggests otherwise.

"This is deeply disturbing and of grave concern," wrote Moseson, adding, "It would be a tragedy, and a travesty, if the FCC were to go back on its promise to be there for us and allowed amateur enforcement to once again drop off the radar."

The need for continuing amateur enforcement was reinforced after the issue was went to press when "CQ" was informed of an outburst of racist diatribes on 20 meters, including the transmission of recordings of a Hitler rally and Nazi marching songs. "This type of behavior was all too common before 'Sheriff' Riley came to town a decade ago," noted Moseson, "and it quickly disappeared once it became obvious that someone in authority was paying attention. But now, only a matter of months since Riley handed in his badge, it has become obvious to these hams that they are once again free to do whatever they please without fear of any consequences."

"The FCC must get back into the amateur enforcement business, and it must do so quickly," says Moseson, "before the situation once again gets out of control. Enforcement Bureau Chief Monteith must act promptly to name a successor to Riley Hollingsworth and assure amateurs that they have not once again been abandoned by the Commission."

FOR IMMEDIATE RELEASE TODAY, NOVEMBER, 19, 2008, 10.00UTC

NEW DX SUMMIT TOOK OVER THE MOTHER OF ALL DX SUMMITS TODAY!

The Group at OH8X is honored to continue the services initiated by members of the OH2AQ Radio Club more than ten years ago. The original OH2AQ DX Summit was closed today at noon local time.

http://www.dxsummit.fi/

In the words of Wayne, N7NG, the President of Yasme Foundation, we capture the essence of this original innovation;

Yasme Foundation and the whole world of Amateur Radio congratulate Jukka Salomaa, OH2BUA, and Antti Kantola, OH5TB, for conceiving, operating and maintaining the DX Summit, the first widely-used Web-based spotting network portal. They created a tool that fundamentally changed the nature of HF operating, a true advancement of the radio art.

The New DX Summit is operated by Radio Arcala, OH8X, located in the Far North at the Arctic Circle, within the Aurora Belt, with a mission to encourage today's youth to make possible the impossible in the course of their own innovations through radio communication experience and related exciting theories.

Arcala Extremes is headquartered in Finland while operating in a European context. The message is global, and the experience is for us to share. Read about the Arcala mission and let your imagination fly to do your share among the young people and secure the continuation of this great passion that has enriched our lives and made the communication among people more effective and enjoyable. The New DX Summit and its future applications are targeted to be part of this vision.

Running the New DX Summit is supported by Yasme Foundation Inc.

>From the SK7BQ Award Group:

Due to the poorest condx on the HF bands in 54 years during 2008 the clubs involved in the Roskilde 1658 Award have unanimously decided to prolong the award activities throughout 2009, until December 31, 2009. Hopefully this decision will make it possible for all amateurs and SWLs interested in the award to qualify for it.

Amateurs in our neighbouring countries should observe that we are also active on 2m and 70cm when condx are good. A lot of DX on 2m have been worked all over Europe with the award callsigns.

At the time of writing it is unclear whether the Danish wild card station callsign OZ1658ROS can be prolonged during 2009. If not, another callsign will be used. The Danish wild card callsign will be announced on the award homepage <http://www.sk7bq.com/roskilde> as soon as our friends in OZ9EDR in Roskilde get a decision from the telecom authorities. The Danish wild card station will be QRV during 2009 with some callsign in any case.

The rules are now updated on the award homepage with new dates and the online logs are up to date. The rules are available in English, Swedish, Finnish, German and Dutch language. The entire award web site is available in both English and Swedish.

Please note that the special rules for the award on February 26, 2008 also applies for February 26, 2009, the day of the Treaty of Roskilde. Only two Swedish callsigns or one Swedish callsign and the Danish wild card station need to be worked or logged during that day. All callsigns involved in the award will be active during some part of February 26, 2009.

It is possible to see what callsigns you have worked on which bands and what callsigns you miss in a matrix presented by the log search function. The log search even tells you if you have qualified for the award or not. Please note that the online logs are updated once a month so it might take some time until your QSO shows up in the log. The last date in the log for each callsign is mentioned on the log search page.

There is also an activity calendar on the award web site. Please note that there might be activity that is not mentioned in the activity calendar. However, all major activities are announced in the calendar.

There are links to DX cluster spots for all award callsigns on the activity calendar page. Check the DX cluster for sporadic activities!

All awards are numbered in the order of incoming approved applications. Licensed amateurs and SWLs share the same number series.

We do not QSL unless you have sent us a QSL direct or via the bureau. Please observe the QSL information for each callsign under "QSL information" on the award homepage.

All outgoing QSLs are handled by SK7BQ. They will be printed and sent out direct or via the bureau during the spring 2009.

73 es GL de SK7BQ Award group in Kristianstad, in the former Danish

province of Scania. Kristianstad was founded by the Danish King
Christian IV in 1614. Kristianstad is said to be the only city in the
world with a foreign King�s insignia as it�s coat of arms.

F/LA0BY/p activity in BCC MS Contest 2008 from JN33LN (13./14.12.2008)
Weather permitting I hope to participate one or two days in the BCC MS Contest from a location near Cannes, probably in JN33LN. I may not be on all weekend, but at least Saturday evening and perhaps Sunday morning until noon. I will try to find a spot with reasonably good

take-off from North to South-East. Operation will be in random WSJT only. My equipment will be a single 9-ele-F9FT yagi and maximum 150W RF power into the antenna. From the site I will not have access to the Internet or DX-Clusters, but these shall not be used in that contest anyway. SOURCE: Stefan at www.mydarc.de/la0by/dxped.htm

Jim will be departing here on Saturday, November 22nd, to return to AZ.
I plan to operate Saturday Random Hour from DN81 and possibly DN80.
I have not yet decided where I will operate from for Sunday Random Hour.
My route will generally be south from DN81 and I will try and stop and put out as many grid squares as I can on the weekend (weather permitting).

LAOS IS ON 6M!
On Tuesday, W1JJ and I both worked XW1A on 6m EME. Currently, the antenna at XW1A/XW1B is only an old 5 element yagi, but they now have made arrangements to obtain four of the 10 element YU7EF yagis and plan to assemble a fully steerable array for 6m EME. I am sure they will be very active on Es next summer with their new array, too.

CO2WF QRV soon on 6 meters

I received word from Winty that he will soon be QRV on 6 meters digital modes. He has built an interface and is currently working on an antenna. His locator is EL83we in Boca Ciega just east of Havana City. His plans are to listen and send CQ's on 50.260MHz, and he is planning to be active during the upcoming Geminids. Internet access is very limited there, so he will not be on PJC, but I am sure he would appreciate anyone hearing him to make his presence known there. I am his QSL manager. Phil - N1KI

KP5, DESECHEO ISLAND (Press Release #2, November 23rd - DXpedition Dates Announced). "The U.S. Fish & Wildlife Service has notified the team that February 12-26, 2009, will be the dates allocated for the radio operation. These dates are coordinated with other USFWS research activities scheduled on other parts of Desecheo Island as well as scheduling USFWS security personnel for the camp.

Fifteen operators will be allowed on the island at any given time. A total of 6-8 stations will be operational, including 160-6 meters.

A reconnaissance trip to Desecheo is scheduled for Friday, December 19th. Three team members, USFWS personnel and an UXO (unexploded ordnance) expert will sweep and clear the assigned area of UXO and other hazards. There will be no radio operations.

The 15-man team will assemble in Puerto Rico on February 8, 2009, for mandatory UXO training. The next three days will include team operations training, and last minute preparation and staging of the several tons of equipment for transport. On February 12th, landing will commence and two stations will be immediately activated. Likewise, stations will continue to operate until the final moments before departure on February 26th.

Halfway through the operation, on February 19th, approximately half of the operating team will be replaced with fresh operators for the final week.

The team has been diligently planning antennas and propagation paths to take advantage of every possible band opening to Asia, where Desecheo is #2 on the Most Wanted List and to Europe, where it is #3 on the Most Wanted List.

Contributions are being solicited. To assist us and for the latest news, please go to the team's website: http://www.kp5.us

NEW HA-IPARC AWARD AVAILABLE. Gab, HA3JB, informs OPDX that a new "HA-IPARC (Hungarian-International Police Association) Award" is available by only making 3 different QSOs with the callsigns listed on the HA-IPARC Web site. For details on the award, visit: http://www.ha3jb.com/award.html

OD, LEBANON. Salvo, IV3YIM, is now active as OD5/IVV3YIM until April 20th (2009). Activity is expected to be 80-10 meters using SSB with a possibility of some CW, RTTY, PSK and operations on 160/30/17/12/6 meters. QSL via IV3YIM, by the Bureau or direct to: Salvo Vitale, P.O. PG6, THE NETHERLANDS (Special Event). Operators Peter/PA8A, Fred/PA8F and Rob/PA3GVI will once again activate the big array, formerly used to broadcast "Radio Netherlands", with the special callsign PG6G between 1200z, November 27th and 1200z, November 28th. The array antenna is a curtain antenna with 8 stacked dipoles between two 400 feet towers. Radiation angle is about 7 degrees and a gain of approximate 22 dB!! Their activity will be on CW and SSB, mainly on 40 meters. QSL via PA3GVI. See a video from their last visit at:

http://uk.youtube.com/watch?v=3vE1zk60v3E

POSSIBLE PIRATE. Ken, G4RWD (ex-ZF1WD), reports that the a "ZF1WD has been spotted on the DXCluster recently with QSL information stated as 'via G4RWD', which is incorrect. Whilst I have operated several times in the past as ZF1WD, I have not been there since 2002, neither did I keep the license up to date due to the cost involved. I can only assume that the callsign ZF1WD has either been re-issued by the Cayman licensing authorities, or that this is a pirate operation. I can't find any reference to this current ZF1WD operation, so I assume the latter."

QSL INFO AND NEWS....................

QSL Routes. Johannes, DK8JB, reports that an interesting link to visit for QSL routes that date back to 1987 is: http://f6gcp.free.fr/Base/

DO YOU HAVE THE CORRECT ROUTE? George, K6GT, Northern California Contest Club's (NCCC) QSL Manager/Station Trustee for the club's callsign K6ZM, informs OPDX that he has been receiving several QSL requests for cards for 8P9AG. The original holder of K6ZM, Phil Frazier, passed away in 1991, and he had used the 8P9AG callsign on a trip to 8P-land in the '80's. Clearly, since his key has been silent since 1991, he has not had any 8P operations since then. Apparently, Andy, DL9USA, was reissued the callsign and was active at the end of 2007. QSLs for that operation should go to DL9USA at: Andreas Glaeser, PF 100 246, 03122 Spremberg, Germany.

DID YOU WORK KP4AO on November 23rd? Special event station KP4AO was activated by the A.R.C. Arecibo Observatory. Activity was to celebrate 45 years of operations at the Arecibo Observatory Radio Telescope. For every QSL received, a certificate will be issued. It would be desired for a #10 BUSINESS SIZE SASE to be included with your QSL.

ZS6WAB BEACON IS NOW BEAMING TO THE MEDITERRANEAN

Willem ZS6WAB has turned the beam of his 4 metre beacon to the Mediterranean for TEP tests which will continue for several months. The beacon operates on 70.025 MHz CW and is running 25 Watts into a 9 element Yagi. When this beacon was transmitting south it could be heard throughout the day on meteor scatter in Port Elizabeth and it also indicated three short Sporadic-E openings in October on 70 MHz. A 70 MHz TEP contact between South Africa and Europe would be a historical event and a first for amateur radio in the world.

I am saddened to report that Russ Sakai, KH6FOO, passed away on 20 Nov 2008 after a long bout with throat cancer. Russ was 58. He was one of the pioneers on 2 meter EME and gave out Hawaii to many. He also was a pioneer utilizing the Pacific VHF duct from Hawaii to the mainland in the 70's and 80's. He will be greatly missed. Jack N6XQ/OA4TT
The Team of MMMonVHF will pass our deep sympathy and condolences to his family and friends. Rest in peace, Russ!

The 5K0T team have changed their plans. They were unable to operate from Roncador Bank because of lack of a suitable location, and are now supposed to be QRV from Serrana Bank NA-133) until 1 December, including the CQ WW DX CW Contest. However, the latest information from the team (19 November) was that strong winds and heavy rain were preventing them from setting up. On 2 December they expect to relocate to Bajo Nuevo (NA-132) and operate from there until the 6th. They intend to be active on all HF bands and 6 metres, with two stations and a focus on low band operation at night. QSL 5K0T via HA7RY. Bookmark http://www.5k0t.com for updates.

CQ News (CQ RTTY Contest Director Named). Richard Moseson, W2VU, Editor CQ Amateur Radio, sent out the following press release: Ed Muns, W0YK, Named CQ RTTY Contest Director (Hicksville, NY November 24, 2008) -- Ed Muns, W0YK, of Los Gatos, California, has been named Director of 'CQ' magazine's radioteletype (RTTY) contests, 'CQ' Editor Rich Moseson, W2VU, announced today. 'CQ' sponsors the world's two most popular annual RTTY competitions, the CQ World Wide RTTY WPX Contest each February and the CQ World Wide RTTY DX Contest every September.

Muns succeeds Glenn Vinson, W6OTC, who has been CQ's RTTY Contest Director since 2000, and who guided the events to their current levels of popularity. The number of logs submitted for the RTTY DX contest has tripled in the past eight years despite declining sunspots throughout the period. "I am glad to have had this opportunity to help promote RTTY contesting," says Vinson, adding that Muns has already been working closely with other members of the CQ RTTY Contest Committee, software authors and other CQ contest directors to assure a smooth transition. "I feel very confident that these contests will continue to gain strength year over year."

Ed Muns was first licensed in 1962, and has been contesting since the 1970s. He has been active in RTTY contesting since 2004 and very quickly set two world records in operations from Aruba. He has also been the NA RTTY Sprint contest manager since 2005. Professionally, Ed is retired from a career as an engineering executive for Hewlett-Packard, and currently owns and operates a Pinot Noir vineyard in California that he started ten years ago.

Both Glenn and Ed point out that Glenn's original plan had been to transfer responsibility for the CQ RTTY contests to his co-director for the past several years, Paolo Cortese, I2UIY. However, Paolo unexpectedly became a Silent Key in October 2008. Ed stepped in to fill the void that was created by Paolo's passing.

"We thank Glenn for his many years of service to our RTTY contests, and his great success in building up their popularity," noted 'CQ' Editor Moseson, "and we welcome Ed to the CQ 'family' with thanks for his willingness to step up to the plate on short notice and take on this responsibility."

C9, MOZAMBIQUE (Update). Igor, UY5LW, continues to be active as C91LW from Maputo until December 2nd. Activity will be on 160-10 meters with 800 watts using CW, SSB and the Digital modes. He will also be in the CQWW DX CW Contest (November 29-30th) using the callsign C98LW from Inhaca Island (AF-066) as a Single-Op/Single-Band (40m) entry. QSL via his home callsign. For more details, updates, logs and photos, please visit: http://www.dxer.com.ua/c91lw

CK2, CANADA. Operators Nelida/LW8EXF, Claudio/VE2DWA, Gary/VE2GK, Rich/VE3KI and Davis/VO1AU will be active as CK2DWA during the CQWW DX CW Contest (November 29-30th) as a Multi-Single entry. QSL via VE2DWA.

DV1, PHILIPPINES. Alex, DV1UBY, will be active during the CQWW DX CW Contest (November 29-30th) as a Single-Op/Single-Band (15m) entry. QSL via DV1UBY direct.

IOTA NEWS......................

EU-189. In a update by Col, MM0NDX, in regards to Isle of Rockall, he states, "Never been a better chance of this rare one being activated. There is potential that more than one trip to Rockall will occur next year, but still to be finalized. Will provide more info when known." In a press release by Island Man/Andy Strangeway, he states, "I appreciate it would appear that there has been little news in the last few weeks, but I can assure everyone that things have certainly been moving. I expect before Christmas that news of transportation to Rockall being secured will be announced. Working in tandem with my friend Col, MM0NDX, I am acutely aware of the interest shown in EU-189. With this in mind I would like to invite radio hams, be they individuals or clubs, to contact me with their proposals to be part of this exciting expedition. I require the following information to be included in the proposal.

* The maximum and minimum number of berths that would be required.
* A CV of previous radio activations of those that would be involved.
* Any information of additional skills that would strengthen the depth of the expedition, for example any crewing of yacht/boat, tender experience or climbing ability.

The countries who have so far shown the greatest interest in the expedition are Belguim, France, Japan, Norway, UK and USA. I would especially like to hear from Japanese radio hams as not one operator from Japan has ever contacted Rockall. EU-189 is the most wanted IOTA in Japan.

Once the transport has been secured, the team for the expedition will be selected and dates announced. A website can be built especially for the radio hams and a QSL manager is already secured should you require these extras. For all proposals in the first instance, please contact Andy at info@island-man.co.uk within the next seven days." To keep updated on the Island Man's

SILENT KEY. It is with great sadness to report that ARRL President Emeritus George S. Wilson III, W4OYI, of Owensboro, Kentucky, became a "Silent Key" at his home on November 25th. He was 76. The announcement of W4OYI's passing was reported in this week's "ARRL Letter". Wilson served as the ARRL's 11th President from January 1992-July 1995. He resigned from the position after a stroke in 1995. Read the complete press release about W4OYI in "ARRL Letter" Vol. 27, No. 47, November 26th.

SILENT KEY (News from CQ: "Hashafisti Scratchi" a Silent Key). Richard Moseson, W2VU, Editor of CQ Amateur Radio, reports: (Hicksville, NY, November 25, 2008) -- The man who wrote "Scratchi" for 'CQ' magazine is a Silent Key. George H. Floyd, Jr., WA4DGA (ex-W2RYT), of Lynchburg, Virginia, entertained thousands of his fellow hams for more than two decades -- between 1947 and 1971 -- writing as a politically-incorrect (by today's standards) Japanese-American ham with fractured English and contorted spelling. He wrote from "Feenix, Ariz.," began each column with "Deer Hon. Ed.," and regularly skewered the pomposity and poor operating practices he encountered on the air. He passed away November 22 at the age of 91.

In real life, George Floyd was an engineer and executive with General Electric, working in Schenectady and Syracuse, New York, before moving to Lynchburg, Virginia in the late 1950s. GE alumni will also remember George -- pseudonymously as well -- as "Lighthouse Larry" in GE employee publications.

Scratchi first appeared in 'CQ' in June, 1947. The column became a regular feature between 1948 and 1960, then returned from 1966 to 1971. For many 'CQ' readers in that time period, Scratchi was the first item they read when the magazine arrived each month. 'CQ' Publisher Dick Ross, K2MGA, writing in the magazine's 50th anniversary issue in January, 1995, said: "For many years the name Hashafisti Scratchi has been almost synonymous with confusion and consternation in amateur radio. It seems, too, that whenever the unusual or impossible is happening, Scratchi is there helping it happen." Upon receiving news of George's passing, Ross noted, "As saddened as I am to learn of George's death, the mere mention of his name brings a smile to my face, knowing how his good humor and wonderfully creative imagination entertained so many of us for so many years."

Floyd was pre-deceased by his wife, Miriam; and is survived by two daughters, two granddaughters and six great-grandchildren. The family asks that those interested in making donations in Floyd's memory contribute to the Nature Conservancy, the Sierra Club, the American Society for the Prevention of Cruelty to Animals or the Humane Society of the United States.

'CQ' readers are invited to submit reminiscences of Scratchi for a tribute in an upcoming issue of the magazine. A special e-mail address has been set up at <scratchi@cq-amateur-radio.com>.

PLEASE DO REGULAR UPDATE OF THE eMWS and eMWDXCC at MMMonVHF

The Team of MMMonVHF will use YOUR "Most Wanted" for showing expedition the most wanted places (specially for MS in europe and EME all over the world). Remember such nice trips to DXCCs like GU, JW or JD1 these year or the multi-square operation from Tor, DJ8MS... Some of you did not update since 01/2007 and so maybe they are not interested anymore or have had no changes. So therefore we decide to build in a new BUTTON at your ACCOUNT to click that there was "NO CHANGES" in your "most wanted" since your last update. Otherwise we will remember your after a years periode to see if you still have interest in it... NO problem, if not, but than we will skip these entry after 3 years to have the table as update as possible (its not a question of quantity, it shall be high quality!). However, the eMWS and eMWDXCC pages make only sense if the data is as much up-to-date as possible. So, please feel free to upload your data as often as you want. SOURCE: The MMMonVHF Team

THE NIGHTLY VHF SKEDS ARE ACTIVE AGAIN
The nightly VHF skeds from Port Elizabeth have been resumed on 144,400 MHz FM to benefit from the excellent Tropo conditions that exist during the hot summer months. The skeds start at 19:30 SAST when the beam antennas in Port Elizabeth are pointing west in the direction of Mossel Bay, Dana Bay and beyond. At 20:00 SAST the beams are turned to East London and Division 5. While the East London Hams are beaming to Port Elizabeth it should be possible, under good conditions, for Hams in Mossel Bay to also hook up with them. During these skeds there is also the opportunity to arrange tests on 144,200 SSB and/or 70,200 MHz FM. Please read more in detail http://www.mmmonvhf.de/latest.php?id=2113

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

```
 radio/personal-intro
 Subject: Guide to the rec.radio Newsgroups
 Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
 Last Posted: 9 Nov 2001 06:18:17 GMT
 Posting-Frequency: 15th of each month
```

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

KOSOVO NEWS (Press Release by Martti, OH2BH)..............

THE REPUBLIC OF KOSOVO ENTERS A NEW PHASE AS OF DECEMBER 9, 2008

"EULEX will switch on and UNMIK will switch off", as EULEX's head put it today! <http://www.eulex-kosovo.eu/> http://www.eulex-kosovo.eu

It was just a few days ago in the United Nations Security Council where the UN Secretary-General's fresh report on Kosovo highlighted the considerable progress made in Kosovo since its independence in February of this year. All Council members supported the decision by the Secretary-General to adapt the UN's role to this new, positive reality by accelerating the downsizing of the UN Mission in Kosovo (UNMIK) and the transfer of rule of law authorities to the European Union's mission, EULEX as of December 9, 2008.

There is no doubt in anyone's mind that the Republic of Kosovo, as it is called in UN terms, is there to stay as it is recognized by fifty-three UN member states today. Even those European countries not recognizing Kosovo because of their own minorities, voted unanimously to let the EULEX take over the next phase of the new country's development work. This is also another historical event where, for the first time, the European Union is working together and with the United States on a peace settlement issue.

This same day also signifies a wonderful occasion to the 2008 Nobel Peace Prize Laureate, Martti Ahtisaari, who acted as the UN Special Envoy for Kosovo and whose "peace roadmap" is now in implementation. Mr. Ahtisaari has served as mediator in many complex negotiations in which there is no standard outcome. Kosovo's road to independence marks a unique case in which the only winners are the people of Kosovo. We all salute Mr. Ahtisaari for his mission under complicated circumstances and congratulate him on winning the Nobel Peace Prize which he will receive on this same day. Amateur Radio operators are grateful to Mr. Ahtisaari for his support of Amateur Radio Mission Goodwill Kosovo currently under implementation in Kosovo.

A special postage stamp is issued in Finland on December 10th in Mr. Ahtisaari's honor, and the next 1000 direct QSL envelopes released by OH2BH/OH2BN/OH2TA/OH2UA for YU8/OH2R, CN2B, CU2X, FJ/OH2AM, OH0X, OH8X,

OJ0B, TC4X will bear that stamp." Visit the following Web page to see the stamp:

OH9, FINLAND (Special Event - This one for the kids!). Once again OH9SCL will be active from Santa Claus Land (SCL) in the Arctic Circle, during the month of December. Activity will be on 160-10 meters using CW, SSB and the Digital modes. There has been plenty of activity over the past week on 40/20/30 meters, some SSB, RTTY and PSK31. QSL via OH9UV: PL 50, 96101 Rovaniemi, Finland. A special "Santa Claus Land" award is available. For more information about the award, please visit the SCL Web page at:
http://kotisivu.dnainternet.net/rakarttu/OMAT_KOTISIVUT/OH9SCL_2007/OH9SCL_2007.html

OOOOPPPSSS!! (CORRECTION) There was a typo in last week's OPDX.886 under "KH8, AMERICAN SAMOA." We stated that Larry's, AH8LG, callsign was KH8LG which was incorrect.

OP0, ANTARCTICA. Paul, ON3PC, who got his license only a short time ago, is expected to be active as OP0LE from the new Belgian Antarctic station "Princess Elisabeth" (http://www.antarcticstation.org) situated on Dronning Maud Land. Activities can be expected between mid-December and mid-February of 2009.

QRZ.COM TO CHANGE. Fred, AA7BQ, QRZ Founder, announced that QRZ.COM will be changing their database/Web site. He states, "Today we're pleased to make an initial announcement about a new version of our online callsign database that will soon replace our existing pages. Internally, we've been calling it QRZ 2.0, however, it will soon be known simply as QRZ as it becomes the system default. The new database includes a fresh new layout plus a number of new features and information details that were not previously available. In addition, the new callsign pages are customizable by the user to include colors, fonts, and multiple pictures. We've also included the GridFinder as a mainstream part of our data. Additionally, we have made vast improvements in our geo coordinate database, and we now include regional mapping information for nearly every callsign, both USA and DX! Once we've had sufficient time to test the new system we will eventually replace all of the callsign pages with the new format." To see an example of their new pages for AA7BQ, go to:
http://www.qrz.com/db/AA7BQ
To see your callsign page under the new format, just use the URL/code:
http://www.qrz.com/db/your_callsign
PLEASE NOTE: You must have Javascript enabled on your browser to take full advangage of what these new pages have to offer. Fred also mentions, "If you'd like to take a sneak peek at the new editing features as well, you must join our Beta Tester's Group (it's free) by clicking <http://forums.qrz.com/profile.php?do=editusergroups> (you must be logged in). Your request will be approved ASAP. Your comments and constructive criticism are welcome. Please don't write to tell us that 'you prefer the old version', or that you 'don't like the changes' because, frankly, we're determined to move forward. This is the first major rewrite of the QRZ database in several years and a lot of new technology has come of age since the current system made its debut. This project started more than

a year ago and parts of it have already been running in the background for some time. Now, however, we're finally ready to start showing off the new look and get some feedback from the users. We appreciate your feedback! Please don't be bashful! We think you're going to like it!"

The good news is that a total of 84 candidates took the exam and among them 62 candidates have successfully passed. 50 MHz allocated to amateur radio in Switzerland

The Swiss authorities will allocate the 50 MHz band to amateur radio on a secondary basis by Jan 1, 2009. All Swiss and foreign CEPT class licensees may send with 100 watts PEP on 50-52 MHz without any antenna restrictions. Primary users may not be disturbed which includes the Ticino since there are still some TV stations active in the VHF band I in Northern Italy.

Prize drawing among participants of the WAE60 Marathon

Interesting prizes will be drawed among those participants who submitted a log for the WAE60 Marathon. The random generator for the prize winners will be activated by a clueless round participant during the DL and DIG thursday broadcast on 3770 kHz (+/- QRM) starting around 1800 UTC on Dec 11, 2008. The WAE celebrated its 60th anniversary this year which was a good reason to organize a WAE60 Marathon lasting from Aug 9 until Sep 14, 2008.

If all goes well, I will stick a two metre yagi (ZS2U design) into the air from KF36nm (also known as Fish River Mouth) from Saturday 13 December to probably Saturday 20 December. So hopefully I can work a few guys on 144.400 FM as ZS4BS/2 (maybe I should sign 7P8DG and confuse them a bit!). Greetings Dennis, ZS4BS

GEMINIDS SPECIAL 2008 - Please do use:
http://www.mmmonvhf.de/ms.php
and have a lot of fun within the shower time!

****

One of the major meteor showers of the year, the Geminids, dominates December�s meteor scene. Geminids meteor rates are rather high (ZHR around 120 hr -1) and regular year by year. Geminids maximum for 2008 is predicetd by IMO on December 13, on 23 UT. Lot of MS activity is expected in 144 MHz band, due to concomitant BCC-MS contest.

For having your antennas always to the best direction we do recommened to use "VIRGO" a Real Time Meteor Sky View by Sabine, DL1DBC, a small Java Applet at the webpage: http://www.dl1dbc.net/Meteorscatter/

For all without these possibilities here a short "best QTF-Overview":
N/S: 04-07 & 20-23UT NE/SW: 05-08 & 21-00UT SE/NW: 03-06 & 19-22UT
E/W: 00-02 UT (worst direction of the shower - vy high Radiant!)

The Shower is down horizont 10 to 17 UT! For short distance, back- or sidescatter tests beam to the Radiant around 00 to 02 UT, its the time the radiant is very high in elevation (70�)

Latest NEWS/INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

PLEASE DO REGULAR UPDATE OF THE eMWS and eMWDXCC at MMMonVHF

The Team of MMMonVHF will use YOUR "Most Wanted" for showing expedition the most wanted places (specially for MS in europe and EME all over the world). Remember such nice trips to DXCCs like GU, JW or JD1 these year or the multi-square operation from Tor, DJ8MS...   Some of you did not update since 01/2007 and so maybe they are not interested anymore or have had no changes. So therefore we decide to build in a new BUTTON at your ACCOUNT to click that there was "NO CHANGES" in your "most wanted" since your last update. Otherwise we will remember your after a years periode to see if you still have interest in it... NO problem, if not, but than we will skip these entry after 3 years to have the table as update as possible (its not a question of quantity, it shall be high quality!). However, the eMWS and eMWDXCC pages make only sense if the data is as much up-to-date as possible. So, please feel free to upload your data as often as you want. SOURCE: The MMMonVHF Team

Badger Contesters net hosted by Todd KC9BQA. Wed. nights, 8:30pm centr. (9:30pm eastern) - Freq. is 144.250, SSB My QTH is EN63ao, or 40 miles north of Milwaukee. I start out looking south, where the bulk of our check-ins are (Milwaukee/Chicago area). Then swing the beams a full 360, calling CQ Badger Contesters Net about every 20-25 degrees. I start by looking SW, then W, then NW, N, NE, E, SE. That means Ohio is typically about 9:40-50pm eastern time. KC8ZJL Dennis and KD8IME Bob often check in from EN71. It's a fun net, only purpose is to stir up activity. We get a list of everyone in all directions first, nd then we go back to each check-in and they say hello to the net. Stay as long or as little as you care to. Short-timers welcome. Typically done by 9:30-40pm central time. Often have some ragchewing afterwards. I post this to the 144 Prop Logger, too. As well as several regional VHF club email reflectors. We average about 10-14 check-ins each Wednesday. SOURCE: Andy N8OFS GOT6???

GEMINIDS SPECIAL 2008 - Please do use:
http://www.mmmonvhf.de/ms.php
and have a lot of fun within the shower time!
****

First night of BCC MS-Contest is past - Of course the condx are really not as good as we will be able to see it at the maximum of the shower which is predicetd by IMO for December 13, on 23 UT. The meteor rates shall be rather high (ZHR around 120 hr -1) near the maximum time...

For having your antennas always to the best direction we do recommened to use "VIRGO" a Real Time Meteor Sky View by Sabine, DL1DBC, a small Java Applet at the webpage: http://www.dl1dbc.net/Meteorscatter/

For all without these possibilities here a short "best QTF-Overview":
N/S: 04-07 & 20-23UT NE/SW: 05-08 & 21-00UT SE/NW: 03-06 & 19-22UT
E/W: 00-02 UT (worst direction of the shower - vy high Radiant!)

The Shower is down horizont 10 to 17 UT! For short distance, back- or sidescatter tests beam to the Radiant around 00 to 02 UT, its the time the radiant is very high in elevation (70�)

2009 CQ DX MARATHON. The fourth running of the CQ DX Marathon begins at 0000 UTC on January 1, 2009, and runs through 2359 UTC on December 31, 2009. The goal, as always, is to work as many countries and CQ zones as possible at least once during the calendar year. The only change from the 2008 rules is that the prohibition on assistance, such as lists and passes, for the Unlimited Class is deleted (the limitation remains in effect for the Formula Class). Once again they will use a downloadable Microsoft Excel template which may be filled in and e-mailed to a special address as your log entry. For complete details, please visit the following Web page at: http://cq-amateur-radio.com/DX%20Marathon%20Rules%20Dec08.pdf

3 STEVE'S TO BE ACTIVE AGAIN! Yes, it is that time again. The 3 Steve's (Steve/KF2TI, Steve/N2IFA, Steve/KB2ENF and Kurt/W2MW [aka Steve]), along with "those two laughing young men", Andrew/N2IFB and Eric/K2EMZ, will be guest operating at the ARRL station, W1AW, Tuesday, December 30th, from 1700-2045z. This is their 16th annual WAS (Worked All Steve's) DXpedition to Newington, and they will be operating on the following bands:

30m CW - Kurt/W2MW [aka Steve]
40/20/15m SSB - Steve/KF2TI, Steve/N2IFA and Steve/KB2ENF
17/10m (possibly 80m) - Andrew/N2IFB and Eric-K2EMZ will also be operating as "Steves"

They hope conditions will improve and will try to listen for outside the U.S.; packet spots will be posted. If you work any 3 operators, they will send you a beautiful, full color WAS (Worked All Steve's) certificate (suitable for framing). No QSL is needed as they will have copies of the log and send out a certificate to all those who qualify. QSL cards to them are not necessary for the WAS. If you want a W1AW QSL card, please send to them direct or via the bureau. The logs will be posted (hopefully) after January 1st on their Web site at:

http://the3stevesarc.org

PLEASE NOTE: This is not an officially sanctioned ARRL event. It is run for fun by the 3 Steves Amateur Radio Association (TSARC) - WK3SS (all rights reserved) and they are responsible for the printing and sending of the "Worked All Steve's" certificate (suitable for framing). They would like to thank the ARRL for allowing them to play with their great toys and putting up with them each year. They hope to work you.

A3, TONGA. Paul, A35RK/KK6H, is back home in Ha'apai as of December 12th, as he says "to a rousing welcome of thunder, lightning, and torrential rain, which is forecsat to continue for awhile. I'll be QRV as soon as the bad weather breaks and I can get my antennas back up." Paul reports that as KH8/KK6H he made "about 600 QSOs from American Samoa, on both CW and SSB, on 80, 30, 20, 17 and 15 meters, including a few Europeans on 20M long path. Conditions were generally lousy." The log has been sent to W7TSQ and posted on LoTW. QSL via W7TSQ or LoTW.

A3, TONGA. Just a reminder that Dave "Kawe", W6ZL, will return as A35KL from FOA Island (OC-169) in the Ha'apai Island Group, for a brief period possibly around 0000z, December 17th until 1800z, December 19th. QSL via W6ZL, SASE or new style IRC, or via the LOTW (may not be able to post log until after his return to U.S. around Christmas time).

ASIAN TRIP. Frank, I2DMI, announces on QRZ.com that he will be visiting Thimphu, Bhutan, between December 22-31st and Nepal between December 31st and January 5th. He states that he has received his callsign for Bhutan and will be signing A52RY but will only be active during his spare time. Activity will only be RTTY. He thinks his operating periods will likely be in the ranges of 0100-0300z and 1200-1900z. Suggested target frequencies will be 3582, 7040, 10142, 14082, 18102, 21082, 24922 and 28082 kHz, listening up 2 or spread 2-10 kHz depending on the pileup. He will concentrate his activity on the opened bands. His activity from Nepal will be the same. However, he will get his callsign after his arrival (possibly 9N7RY or 9N7DMI which one available). QSOs will be put on LoTW and e-QSL the second week of January. Bureau cards will go out the fourth week of March. You can QSL direct to I2DMI: P.O. Box 55 - 22063 CANTU, Italy. Include a self addressed envelope (SAE) and sufficient return postage. Please QSL only to his P.O. Box # 55 - 22063 Cantu (not his home address).

CHU TO QSY JANUARY 1ST. The CQ Newsroom reports: "Canadian time/frequency standard station CHU -- a fixture for decades on 7335 kHz -- will change frequency to 7850 kHz at 0000 UTC on January 1, 2009. The move comes as a result of the International Telecommunication Union's decision in 2007 to expand the 40-meter ham band in Europe and Africa (Region I) to 7000-7200 kHz. It was previously 7000-7100 kHz, with -- as every 40-meter DXer knows -- international broadcasting allocated from 7100-7300 kHz.

As part of the 40-meter expansion, the international broadcast band was shifted to 7200-7350 kHz. As broadcasters began relocating, CHU on 7335 began experiencing significant interference. Thus, officials at Canada's National Research Council which operates CHU, decided to move the time/frequency standard station's transmissions to 7850 kHz as of the beginning of 2009. The complete NRC announcement (English version) is online at:
http://inms-ienm.nrc-cnrc.gc.ca/common_files/stories/chu/communique_e.pdf

E44M DXPEDITION NEWS. The E44M team will use "Hamradioweb" as forum to share information about the DXpedition in Palestine directly with the community of the DXers. During the operations, feel free to put your questions or suggestions there. The Web link is:
http://www.hamradioweb.org/forums/showthread.php?t=3335
The forum will soon become the only one meeting place for open discussion of various topics about the DXpedition that the operators will check day by day.

FH, MAYOTTE. Operators Phil/G3SWH and Richard/G3RWL (Dick on CW) will be active from here between February 26th and March 5th (2009). Mayotte counts as AF-027 for IOTA purposes. The 2003 "Most Wanted" survey by the 425 DX News shows Mayotte ranks 121 for DXCC purposes. Both operators will use the single callsign of FH/G3SWH. Their activity will be mainly on CW on all bands 80-10 meters. Subject to QRN and site conditions, there may be some 160 meters CW activity. Richard may also operate some RTTY and/or PSK31. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many bands as possible. QSL via G3SWH, either direct with SAE and adequate return postage (recommended), or via Phil's Web site for a bureau reply or by the bureau. For updates and more information, please visit the following Web page at: http://www.g3swh.org.uk/mayotte.html

FT5Y, ANTARCTICA (Update). Hopefully you were lucky to work Nicolas, F4EGX, as FT5YI from the French scientific station "Dumont D' Urville" this past weekend. He is expected to go QRT this week on December 19th. According to Jean-Michel, F6AJA, Nicolas doesn't know if he will spend Christmas at the station or on the boat "Astrolabe". He will be back in France around the New Year. Take a look at some of the interesting photos he is putting on his Web page at: http://f4egx.homelinux.net
LAST MINUTE UPDATE: Nicolas's last operation will be December 16th, during his afternoon around 14267 kHz.

FW, WALLIS & FUTUNA ISLANDS. Eli, HA9RE, and a team of operators will be

active from Wallis Island as FW0RE. The group is expected to arrive on the island January 26th. Eli states, "Provided all our baggage arrives in due time then we can begin the operation on January 28-29th." They are expected to be there for about a month. Activity will be on 160-10 meters, including 30/17/12 meters, using CW, SSB and RTTY. Two stations will be on the air. Antennas to be used are: a 24m vertical on 160/80/40m, Spiderbeam for 20/17/15/10m, HB9CV for 20-15m and a 7-band Butternut. Eli and his team are now looking for sponsorship. To help, contact Eli via E-mail at: ha9re@freemail.hu
A Web site dedicated to the FW operation will be set up on HA9RE's own Web pages after the expedition has taken place.

HAM IN NEED! Mike, RX1AL, informs OPDX that Vladimir "Vlad", 4K9W, a DXer in Baku, Azerbaijan, is in a very difficult situation. Vlad, who is an invalid for over 30 years, has been bed ridden and constantly dependant on respite care. Vlad's mother recently passed away and Vlad is now alone without other relatives. At present, his friends and acquaintances from the neighborhood support him. However, it is necessary to find constant home care for him. If this is not possible from his own means, then the State will be compelled to move Vlad into a home for severely disabled persons in order to guarantee him minimum care to survive. This would mean that Vlad would no longer enjoy different facets of his life: Amateur radio (almost QRV daily and along with CW and SSB also on PSK and RTTY for over a year now), communicating with friends for many years on Amateur radio airwaves, participating in contesting, and also on the internet. If you would like to know more and would like to help him, please visit the Web page at: http://4k9w.oe4vie.com/4k9w_english.html

HB, SWITZERLAND (6m News). The Swiss authorities will allocate the 50 MHz band to amateur radio on a secondary basis on January 1, 2009. All Swiss and foreign CEPT class licensees may transmit with 100 watts PEP on 50-52 MHz without any antenna restrictions. Primary users may not be disturbed which includes the Ticino since there are still some TV stations active on the VHF band I in Northern Italy.

HE8, SWITZERLAND (Special Event/AAW). Walter, HB9BHY, has announced that he will participate in the 6th Antarctic Activity Week (AAW, February 16-22nd [2009]). He will use the callsign HE8ICE (reference number WAP-81). QSL via HB9BHY. PLEASE NOTE: The HE8 prefix is special and was issued to celebrate the 80th anniversary of USKA (see OPDX.887), so HE8ICE will be used for the 2009 AAW instead of the old previous callsign HB9ICE. Also, a full list of callsigns already booked for the 6th AAW is available at the WAP Web site at: http://www.waponline.it/Default.aspx?tabid=113

IRC REMINDER! Vasilij, RW6HS, wants to remind everyone that some IRCs are dated and will expire on December 31st, 2008.

LOG RECOVERY HELP NEEDED! Al, VE1AL, reports: "Due to my own stupidity, I have lost the DXbase log I keep from October 11, 2008, through December 1, 2008. While I don't necessarily want to have QSLs, I would like to try to rebuild the log information. If it is possible, would those stations who worked me through that period please send me the log information including your call, the date and time of the QSO and the band on which we worked. I know it will be impossible to rebuild the log but any and all pertinent information would be appreciated. I would also appreciate it if the DX bulletin editors could pick up this request and publish it in an upcoming issue. Many thanks to all who might reply to VE1AL@rac.ca "

SILENT KEY. Alexander, RA4HT, informs OPDX that Joseph Raihstein, RD4HF (ex-4K6GF, UD6GF, UD6DLJ, 4K500GF, 4K70GF and 4KA6GF) became a Silent Key (SK) on December 7th. In recent years he was seriously ill, but every day if he was not in the hospital, his voice could be heard on the bands. Until recently, RD4HF participated in a round table of Russian Emergency Network (RAS). All his life was associated with amateur radio. Most of his life of Joseph - "Semen-Semenych" as he was affectionately called by his Baku friends, lived in Azerbaijan, where he became known as radiosportsmenom, deserved coach of Azerbaijan, a judge of the All-Union category, Honorary Radio USSR. OPDX and its readers would like to send out our deepest sympathy to the family and friends of RD4HF.

C Class Solar Flare & CME

On Friday December 12, 2008 fleeting sunspot group #11009 produced a C class solar flare before setting around the west limb of the Sun. This is the first C class solar flare since April 03, 2008. Also a filament eruption occurred in the northwest quadrant of the Sun beginning at approximately 0615 UTC. This produced a weak partially geo-effective (Earth facing) coronal mass ejection (CME) that "may" impact Earth's geomagnetic field in a minor way (Kp 3) on or about Monday December 15, 2008. 73 & GUD DX, Thomas F. HB, SWITZERLAND (6m News). The Swiss authorities will allocate the 50 MHz band to amateur radio on a secondary basis on Jan 1, 2009. All Swiss and foreign CEPT class licensees may transmit with 100 watts PEP on 50-52 MHz without any antenna restrictions. Primary users may not be disturbed which includes the Ticino since there are still some TV stations active on the VHF band I in Northern Italy.

A Giant Breach in Earth's Magnetic Field (dec. 16th, 2008)
NASA's five THEMIS spacecraft have discovered a breach in Earth's magnetic field ten times larger than anything previously thought to exist. Solar wind can flow in through the opening to "load up" the magnetosphere for powerful geomagnetic storms. But the breach itself is not the biggest surprise. Researchers are even more amazed at the strange and unexpected way it forms, overturning long-held ideas of space physics - read http://science.nasa.gov/headlines/

2009 CQ WPX CONTEST (Rule Changes). Randy Thompson, K5ZD, Director of the CQ WPX Contest, announced that the rules for the 2009 CQ WPX Contest are now available. See: http://www.cqwpx.com/rules.htm
There are changes throughout the rules, so participants are encouraged to read the complete rules carefully. Many of the changes were to align with similar rules in the CQ WW Contest or to clarify administrative details. There is no change to the scoring. Most of the changes are administrative and should have little impact on the competitive and fun aspects of the contest. They look forward to more sunspots and another record year of participation in the 2009 WPX contests. Look for CQ WPX 2008 Contest results in the January (SSB) and March (CW) issues of CQ Magazine.

4A, MEXICO (Special Event). Members of the DXXE (Mexican Contest and DX group) will celebrate their 4th anniversary by using the special callsign 4A1DXXE between December 25th and January 6th (2009). He also mentions that he will participate in the main international contests (like the CQ WPX) from a different location with a better station (yagi antennas and also dipole for 80m). Dani will stay in Malaysia for at least one year. QSL via his home callsign.

ASIAN TRIP (Update). By the time you read this Frank, I2DMI, should be active from Thimphu, Bhutan, as A52RY between December 22-31st. Frank informed OPDX on Friday that he will be using his own vertical antenna because the yagi at the HAM CENTRE has been broken by wind. He also mentioned that he still does not know his callsign for Nepal, but he will get a 9N7 (RY? or DMI?) callsign after his arrival in Kathmandu. Please remember he will only be active during his spare time as A52RY. Activity will only be RTTY. He thinks his operating periods will likely be in the ranges of 0100-0300z and 1200-1900z. You can QSL direct to I2DMI: P.O. Box 55 - 22063 CANTU, Italy. Include a self addressed envelope (SAE) and sufficient return postage. Please QSL only to his P.O. QSL INFO AND NEWS....................

5X1AB PIRATE ALERT. Phil, K6EID, who is the QSL Manager for Arik, 5X1AB, states that Arik was active on October 9th, 2008, until 1740z when he then QRTed. Someone apparently used his callsign working many USA boys after that until 2100 or 2200z. Phil states, "I've received loads of cards and had to return them as NIL. Arik confirmed that he did not make these QSOs. Anyone working a station signing 5X1AB after 1740z on October 9th, 2008, you worked a pirate, save your postage."

NA-132/NA-133 QSL REQUEST. Pedro, HK3JJH, informs OPDX that he is receiving lot of QSL cards for the recent expedition (NA-132/NA-133) from the USA with only a 42 cent stamp only on the envelope. These cards will not be answerd directly because his post office box in Miami is a mail drop-off (to make it easier/safer for him to retrieve the cards). The QSLs will be mailed to Colombia and then sent back to the U.S. for mailing; the expenses are over one USD for each envelope.

Rony, PS7AB, informs OPDX that he is now the new Manager of the "Islanders Expeditionaries Association" (AEI), the Awards and Certificates of the "DIB" (Brazilian Islands Award), "DFB" (Brazilian Lighthouses Award), and "DFH" (Brazilian Historical Fortifications), in substitution to the old manger, Pedro Sirzanink, PP5SZ. The "Islanders Expeditionaries Association" (AEI) is a civilian society that was founded on October, 27, 1993, in Florianopolis City, by Pedro Sirzanink, PP5SZ. For more information about "AEI", please read the following link:

I've had a couple of days off, and had some time yesterday to get on the air. 20 was open to Europe, so I ran off a few CW QSOs & then decided to give RTTY a shot.

Called CQ. Three stations came back. Looked like one of them might have been PH0AW, but I wasn't certain of the call as it was among the jumble of the other callers.

So I came back: PH0AW? PH0AW? AGN PSE K

And PH0AW did respond. So did another station whose call contained the letters C, D, G, L, X, and the number 9. Note that *none* of these letters appear in the call PH0AW.

Turns out EVERY TIME I STOPPED TRANSMITTING, this C-D-G-L-X-9 station called me. EVERY TIME. Needless to say, this made it difficult to print PH0AW. I did however eventually complete the QSO with the Dutch station. After signing off, two stations called: the C-D-G-L-X-9 station and DJ9MH. As you might guess, I ignored the "I think every call means me" station and worked DJ9MH.

Signed off with DJ9MH, and there was only one caller, the C-D-G-L-X-9 station.

I QSYd to PSK31.

Hint: if you want to work W9WI, you might *not* want to call every time I stop transmitting. Especially if your callsign has absolutely no characters in common with the guy I came back to.

I do not mean to pick on RTTY operators in general. Often CW and phone operators are every bit as bad at this.

I just looked at Derwin King's (W5LUU) Moondata Update 2009 in Fall 2008 issue of /CQ VHF /magazine. During 2009 & 2010, _EME conditions will be the most favorable of a 9 year cycle_.
During 2009, 10 weekends are rated as Good to Excellent!
On 2m, degradation will be as low as 0.07 & 0.08dB on a couple of days. I remember how wonderful conditions were during the last peak 9 yrs ago. 2m & 70cm should be especially affected by this low degradation. SOURCE: Bob, K6PF via MoonNet

LATEST UPDATES about the VHF DXpedition to NAMIBIA (JG73NI) in January 2009, dated 2008-12-25: All preparations are on schedule! Current plans are to complete packing on 04 January and depart on 05 January with the trip to Luderitz (1600km by car towing a trailer) anticipated to take two days of travel followed by another day to assemble the station for operation. Look for us starting moonrise of January 7th. We expect to start disassembling the station around the 15th and arrive back in Pretoria on the 18th. Unfortunately we could not get a special callsign for our DXpedition. Therefore we will be using HB9CRQ Dan's US-call (to keep the call short). Our call for all EME operation will be V5/KT6Q. QSL for EME please to HB9Q, Box 133, CH-5737 Menziken, Switzerland.

NETHERLANDS ANTILLES CONTINUED. Hans Timmerman, PB2T, President of the European DX Foundation (EUDXF), announced on the EUDXF Web page Tuesday, December 16th (edited): "According to Dutch Prime Minister Balkenende, important agreements to secure the future of the people on the Netherlands Antilles were made. During (another) Round Table Conference held on 15th December 2008 an agreement was signed on the future of the Netherlands Antilles. In 2009 more work has to be done on the execution of the agreements made. Depending on progress a date, will be set for the implementation of the new structure. There is hope that all will be finalized in 2010. In 2005 it was agreed that Curacao (PJ2) and Sint Maarten (PJ7) will become autonomous countries within the Kingdom of the Netherlands and that the islands Bonaire (PJ4), Sint Eustatius (PJ5) and Saba (PJ6) will become Dutch municipalities. DXCC wise, these changes could result in deletion of two entities (PJ2 and PJ7) and four new entities: Curacao (with status aparte), Sint Maarten (with status aparte), Bonaire, Sint Eustatius and Saba."

NOW WAIT A SECOND! Those who like to be on time will have to wait a second for on New Year's Eve before ringing in the New Year on Wednesday. Read all about it at:

Bob, ZL1RS (ET3AA...) in january as A35RS from AG28HV
Barring some sort of disaster, A35RS should be QRV on 2M from AG28hv in the Kingdom of Tonga (south Pacific islands) from 06-15 Jan. 2009. However ... the antenna setup will be small, the power low, no skeds, no Internet, and I will be "on holiday" ... so don't expect too much!

VK1DA/p plans to operate in the Summer Field day event from Mt Ginini
on at least the 5 bands from 50 to 2.4 GHz, with a possibility of
10 GHz. I will mostly be operating on the SSB/CW modes but will try
to listen out for locals on 2m FM. On my website http://vk1da.info
I have provided two spreadsheets which may be useful to others.
One is a plain one page log sheet suitable for field day use...

The IQ3AZ JN66 STORY Uploaded from Massimo, IV3NDC, dated 2008-12-28
at MMMonVHF Review: http://www.mmmonvhf.de/review.php click IQ3AZ
The idea of activating JN66 via MS has stuck in our minds for lot of
time. Lack of serious MS activity since the early 90�s and a complex
orography made JN66 square become �blue� in MWS map... After having
�tested� some candidate DXP sites by means of RadioMobile software,

we found (and even visited) a UFB location in Slovenija, inside JN66 and with excellent takeoff to North. Read more at the REVIEW!

QUADRANTIDS MS-SHOWER SPECIAL

****

Meteor Scatter: Quadrantids Sower occurs january, 3rd. 2009

Another meteor shower is now approaching: Quadrantids meteor shower will reach its maximum on January 3, 2009, at 12.50 UT according to IMO, with ZHR around 120 hr-1. Remember the QUAs are only a shower which took place for around 6 to 8 hours in the peak! So if the peak really occurs around 12 UT, the shower is usable 8 to 16 UT, which will be very nice, bcse the Radiant is in optimum over the horizont for mid europe! Have a look about the Geminids 08 report and to the predictions for the upcoming meteor showers in January 09, on our MMMonVHF MS-Propagationpage: http://www.mmmonvhf.de/ms.php

Until now we did get the following activity infos:
JM48 - IS0/IT9VDQ - http://www.mmmonvhf.de/latest.php?id=2177
JN84 - E77GS   - http://www.mmmonvhf.de/latest.php?id=2187
JO00 - G1KAW/p   - http://www.mmmonvhf.de/latest.php?id=2175
JO45 - OZ/DK2ZF   - http://www.mmmonvhf.de/latest.php?id=2173
JO70 - OK1TEH 70cm - http://www.mmmonvhf.de/latest.php?id=2109

Because the peak is at a weekend the activity will be very high again and we do recommened to use the letter system (like in BCC MS Contest) to call CQ on 144,370 MHz and qsy lower and higher that calling QRG!

CY0, SABLE ISLAND (DXpedition Postponed). Duane Traver, WV2B, the CY0 DXpedition Team Leader, sent out a press release on January 1st, that states the following (edited):

> "Dear Fellow DXers,
>
> Reluctantly, due to the current U.S. economic situation, the DXpedition team has decided to postpone the CY0 DXpedition planned for 2009. While we are hopeful to reorganize the DXpedition {possibly for 2010}, we have decided that rather than tie up the funds so graciously made available by our sponsors, we will return donations received so the sponsorship may be available to other DXpeditions for this year. Any sponsoring organization may feel free to contact me with any questions regarding the matter. We are hopeful that our kind sponsors will be willing to

renew their sponsorship when the Dxpedition is able to be reorganized in the future. The sabledx.com website will remain functional for the time being. Wishing all good DX and 73.
Sincerely, Duane Traver, WV2B Team Leader"

E4, PALESTINE (Update). The E44M is now active until January 11th. Activity will be on 160-2 meters using CW, SSB, RTTY and all the digital modes with a maximum power of 1KW. They will have 3 stations on the air active with beams, verticals and wire antennas. The E44M arrived late on January 1st, but did not start setting up until the next day. Arturo, IK7JWY, has been named as their pilot station for their activity. They state, "The function of the pilot station will be to collect requests and suggestions relating to the DXpedition, and then forward them to the team, and communicate to the public any instructions or information from the team." The pilot station will be only using the forum at
http://www.hamradioweb.org/forums/forumdisplay.php?f=39
to receive messages from users in the special area of discussion.

LOG ONLINE. The log for the special event station 4A1DXXE is now available online at:
http://www.dxxe.org/logsearch/index.php?cmd=preselect&log=4A1DXXE
It is planned to update the online log once a day until activity ends. QSL for 4A1DXXE is via N7RO or LoTW.

NO LONGER THE QSL MANAGER FOR CT3BX. Hermann, HB9CRV, announced that as of December 31st, 2008, he is no longer the QSL manager of CT3BX. No new QSL Manager has been nominated and the logs are closed.

QSL UPDATES FOR HC8N and K5S (NA-082). Randy, W5UE, reports that all direct requests received for HC8N as of December 19th, have been answered and are in the mail. The remaining incoming QSLs of 2008 for HC8N should be in the mail by January 5th. QSL cards for K5S/K5Z, East Ship Island, MS (IOTA NA-082) activity in October have been received from the printer and direct requests have started going out. The K5S team was expected to have a "QSL Party" on January 3rd and the remaining direct requests received to date should be answered then. Randy states, "I have also started accepting online requests for direct cards for stations I manage. The process is fairly simple. Make an online donation via PayPal to cover my postage/card costs and send me QSO data via E-mail. My hope is that this method will be more cost effective and efficient for both you and me as manager. Please see my Web page for details at:
http://w5ue.net/qsl-w5ue.html

I welcome any feedback you might have on this process. Bureau requests are now being answered via the GlobalQSL service. Several thousand backlogged HC8N requests have already been entered and should be finding their way into the bureau system soon. I apologize for my lack of bureau responses since hurricane Katrina... this should put me back on track."

HAVE PATIENCE! QSL cards are still being received for the many UA4WHX operations. Vlad is still sending them out.

QSL.NET & QTH.NET ANNOUNCEMENT. Al Waller, K3TKJ, announced on December 31st (2008) the following (edited):

Dear fellow hams,

After 13 years of providing hams with no cost web space, e-mail forwarding and mailing list services through QSL.net and QTH.net, I have decided to retire. All QSL.net and QTH.net servers and Internet connections at my home QTH are being turned down.

Scott, KA9FOX, has graciously decided to pick up where I left off, and he is in the process of migrating all services to new hardware. See below (on <http://www.qsl.net/index.html>) for an update on the status of the migration.

I want to thank all of you for all of your support over the years, and I hope that you will support Scott as he takes over the reigns.

See you on the air! 73 - Al Waller, K3TKJ"

TS7, TUNISIA (Update/IOTA Op). Members of the France Provins ARC (F6KOP) and some international operators will activate Kerkennah Island (AF-073) using the callsign TS7C between January 8-19th (2009). This 12 day operation would not be possible without the help of Mustapha, DL1BDF. According to the latest press release (edited) by Maurice, F5NQL: "All the luggage is packed and sorted by 25kg parcels (one per operator). Mustapha, DL1BDF, team member, was a great help to so we could obtain the use of the special callsign TS7C. As indicated in "Press Release No.1, some new comers in the DXpedition have been included in the team, to permit them to get some more skill, operating side by side with long time experienced DXpeditioners. They are the future operators of F6KOP next expeditions. We ask your indulgence for them; they are learning what to do in the pile-ups, and for some of them, TS7C will be their first DXpedition. We will stay on Chergui Island (IOTA AF-073 and WLOTA 3459), in the Kerkennah Group. Their departure is scheduled from Paris, on January 8th, in the early morning. The team will begin to set-up the first station immediately when they arrive at the Kerkennah Hotel. So, the first signals are expected the same day at the end of the afternoon or early in the evening. The departure from Kerkennah is scheduled very early in the morning of the 19th. So the operation end will happen sometime around 1800 or 1900z, in the evening of the 18th. As usual, one station will continue to be on the air in the evening as late as possible. For the new bands and/or modes hunters, we will be operating on the HF bands, 160-10m, using CW, SSB, FM, and the Digital modes (RTTY, PSK31, BPSK, SSTV). We will pay special attention on the lower bands, 160/80m. Of course you'll find operators on the other bands and modes. Six stations will operate at the same time, 24 hours a day. Sometimes it will be possible to hear TS7C on the same band but different modes. The antenna farm will consist of vertical and wire antennas for the lower bands and Spiderbeams for 40-10m. Since the first press release the team had to be changed a little. The complete team going to Tunisia has been finalized and the team consists of the following:

PEAK of the QUADRANTIDS 2009 (Review: http://www.mmmonvhf.de/ms.php)
Probably most of you was QRV last weekend and has noticed the strong
Meteor Scatter activity related to 2009 Quadrantids Shower.
Very high meteor rates (ZHR up to 150 hr-1 at peak) have been observed,
with spectacular reflections all over the peak day (Saturday Jan 3rd).
Shower maxima has been broader than usual this year. According to IMO
Live, measured ZHR has remained over 100 hr-1 level between 05 and
18 UT on Jan. 3rd, while ZHR has remained over 40 hr-1 the whole day!
Such a maxima is significantly wider than typical Quadrantids activity
shape. Peak time predictions have been fully confirmed by observations.
European MS enthusiasts have been favoured this year, since during peak
time (around 13 UT) the shower's Radiant elevation over EU was optimal
for radio contacts (around 45 degs), thus leading to very favourable
path geometry. That's an excellent way of starting 2009 radio season,
but now we have to wait until April/May for the next good meteor shower.
Anyway, apart sporadic meteors, some minor showers will appear before
that, and our Team will keep you informed about them...

DX Special Bulletin No. 891.1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K4UEE and W0GJ for the following DX information.

The following press releases were provided by Bob Allphin/K4UEE and Glenn Johnson/W0GJ.

FOR IMMEDIATE RELEASE

January 6th, 2009

Desecheo 2009 Press Release #3

During the week of December 17-21, six members of the February 2009 Desecheo DXpedition team met in Puerto Rico. The team spent the first evening with local DXers and members of the Puerto Rico Amateur Radio League and enjoyed a wonderful dinner and a night of fellowship. The hospitality was gracious and very much appreciated.

The following day the team visited US Fish and Wildlife Headquarters in Boqueron and met with the Chief Refuge Manager and law enforcement personnel. Later that day, the DXpedition team members underwent UXO (unexploded ordnance) training. The following morning, Friday, Dec. 19th, they accompanied U.S. Fish & Wildlife law enforcement and UXO personnel to Desecheo. The campsite and antenna fields were thoroughly swept for UXO and several areas were found suspicious. These areas were clearly marked, mapped by GPS and declared off limits for the DXpedition. USFWS will allow antennas on the ridge above the helicopter pad, thus providing a clear shot to EU, NA and JA. Other antennas will be located on the beach below the helicopter pad. The only radio operation that was conducted was to test a 2m link to Puerto Rico. After three hours on the Island, the team endured a rough passage back to the mainland.

Logistics and staging of equipment is ongoing and will be complete before the team arrives in Puerto Rico on Feb. 7th. The team will transit to Desecheo on Feb. 12 to begin the two-week operation. Eight HF stations plus 6 meters will be operational. An incredible array of antennas has been planned. Transportation and logistics have been arranged for a fast deployment and quick appearance on the air.

The Desecheo 2009 team wishes to thank our sponsors for their generous support. Special thanks go to North American and Japanese DX clubs and individual DXers. Their support has been especially noteworthy.

Fundraising continues�.if you or your Club would like to help out, please go to www.kp5.us/help.htm. While on the team website, click the �Pictures� menu button and check out the pictures taken on the recent reconnaissance trip to Desecheo.

73,

Co-leaders:

Glenn Johnson, W0GJ

OK, we have a problem. Continuous callers.

Back when I got into this thing (and I'm really not that old), a great tactic for working the DX was to find the guy he's working, set the transmitter 100Hz or so higher, and then when the DX is ready for callers again, call there. Used to work pretty well.

This tactic is no longer possible. It's impossible to find the guy the DX is working! - because every time he comes back to someone, the WHOLE PILEUP calls. More than a few times, the DX comes back to someone and gives him a signal report -- and the guy just calls again.

Obviously, a lot of these people **cannot hear the DX they're calling.** If not for an accurate spot in the network, they'd have no idea there was a DX station there - nor would they have any idea where to transmit.

=======================

So, here's my proposal.

The spotting software adds a field to each user's record.

This field is a record of how many "confirmed spots" that user has made. Your spot is "confirmed" if at least two other users have spotted the same DX callsign within 1KHz of the same frequency within an hour either side of when you spotted it.

Now, when a new spot comes in from someone else, and you're logged in...

If you have enough "confirmed spots" in your record -- say, five in the last six months, just to toss out a number -- then the network sends you the entire spot. Including accurate frequency and any QSX information.

If you *don't* have enough confirmed spots... then you get partial information. Say, the frequency to the nearest 25KHz and the word "SPLIT" if a QSX frequency or the word "UP" appeared in the original spot.

You get:
```
DX de W9WI: 14027.3  E44M QSX UP 3    1807z
   - or -
DX de W9WI: 14025+/- E44M SPLIT       1807z
```

depending on whether you've sent enough accurate spots.

==========================

Presumably if you're capable of making a reasonable number of accurate spots, you're able to hear and copy DX and can be trusted to participate in a pileup without screwing everyone else.

If you haven't proven your ability to copy the DX, well, you still know the DX is there -- but you're going to have to tune your radio and copy some callsigns if you want to know where they really are and stand some chance of actually working them.

==========================

No, it's not perfect. Someone will cheat the system. But might it at least be better than what we have right now?

We as in whom? It's IMHO part of a much greater problem. Back when morse code was required to get a ham license was first dropped, many hams claimed that the ability to send and receive morse code was a good way of testing for good operating practices. If you were competent at code, you were competent at ham radio operating.

This was as it turns out, a red herring, a diversion from the real problem that good operating practices are related to good operating practices and not related to morse code, typing, building a radio or any other skills.

Your examples point out that in fact you are complaining about morse code operators, although I expect that the same problem exists with voice operators.

E44M may be a special case, because while there has been some propigation to most of the world from this area, in the last few days, there has been very little most of the time. In fact, worldwide propigation from here has been very "spotty" since the decline of the sunspot cycle.

That does not mean that you can't use it, I have worked Europe with 2w SSB on 20m, a friend has recently worked South America with less on CW. But it's not a "sure thing".

However, the real problem is that no one wants to learn good operating practice anymore.

Unfortunatley, I don't have an answer, but I don't think that a quick software fix to a spotting program will do any good. If I were in the U.S., which I am not at the moment, I would concentrate my efforts of education and raising a new generation of good operators.

Geoff.

E44M isn't really a special case -- last week I experienced the same
problem from the "DX" end. (Tennessee is hardly a "rare one"!)

Trying to work PH0AW on RTTY, and finding a couple of other Europeans -
who didn't have any of the characters "P" "H" "0" "A" "W" in their calls
- calling me every time I stopped transmitting. (they would have got
their QSO a lot faster if they'd let me finish with PH0AW first!)

And in general, this happens in EVERY pileup these days.

(BTW, E44M has actually been surprisingly loud here - they were even Q5
in the mobile on 40 last night around 0500z. I suppose they're far
enough south to escape some of the worst effects of the poor propagation.)

This is of course the basic problem. (and in part why this post is
titled "semi-facetous") Really, the spotting network is no more
responsible for this problem than the easy availablity of cars is
responsible for drunken driving. But one does have to wonder.....

CE - CHILE

The special event station XR27RAID is active in all modes on all bands from Jan 11-25 during the 27th Raid Atacama Desert Trophy, an off-road car race through the Atacama desert. QSL via bureau to CE6TBN or HA1AG.

KP5 - DESECHEO ISLAND, NA-095

Bob Allphin,K4UEE, co-leader of the upcoming KP5 DXpedition asks for support from European DXers. Only with the unfatiguing commitment of the KP5 team they were able to obtain a special permission to place their antennas on a ridgeline above the helipad that will give a clear path to Europe. This increases the chance for small European stations with limited equipment to make a contact with Desecheo. Thus Bob asks those who need KP5 as a "new one" or look for mode and band points to support this large scale activity. Though Desecheo belongs to the Top 5 of the most wanted DXCCs in Europe the support from the Europeans lags behind the North American or Japanese support. They also published a new interview with the co-expedition leader Glenn Johnson,W0GJ. The audio file can be found in the Radio and Media Documentary Archive at: http://www.dokufunk.org/desecheo

S2 - BANGLADESH, AS-127

CQ to Accept eQSL Confirmations for Award Credit

Hicksville, NY and Bedford, TX, January 13, 2009) - CQ magazine will accept contact confirmations made on the eQSL.cc electronic confirmation system for its operating awards effective immediately, CQ Editor Rich Moseson, W2VU, and eQSL Founder and Webmaster Dave Morris, N5UP, announced today.

There will be certain limitations and procedural differences for different awards, at least to start. Only confirmations from "Authenticity Guaranteed" members of eQSL will be accepted, and in accordance with existing eQSL policy, a membership level of bronze or higher is required in order to participate in award programs via eQSL.

"This is the first time that CQ has formally accepted anything other than traditional paper QSL cards for its awards," said Moseson. "We have been working with Dave Morris and his team for several months to assure that the integrity of our awards programs will be protected and to create mechanisms to make it easy for both award applicants and award managers to use eQSL credits toward our awards. All of our award managers have been involved in this process and support this action."

"We want to express our great appreciation to Dave and his team for their willingness to do whatever was necessary to make this agreement possible," Moseson added. "It has been a pleasure working with them and we look forward to a long-lasting relationship."

"We are pleased to be adding CQ to the top of our list of amateur organizations that accept electronic QSLs," said Morris. "CQ has some of the most highly sought-after awards, and we have been working behind the scenes for years to create credit submission mechanisms that would ensure the integrity of their programs without introducing any additional labor for the award managers. We believe the electronic QSL can drastically reduce costs, and the award application mechanisms we have developed will provide for more efficient processing at reduced cost for both the applicant and the award manager."

Applicants for the CQ DX and CQ DX Field Awards must print out their eQSLs and submit them along with their traditional QSLs to a CQ checkpoint or to CQ DX Awards Manager Billy Williams, N4UF. eQSL has an automated process in place for applicants for CQ's Worked All Zones, WPX and USA-Counties awards. N5UP explains how that will work for the applicant:

"The applicant goes to the My Awards screen. He clicks on the particular award he wants to apply for. This brings up a list of the credits our system 'thinks' he is entitled to. There are checkboxes that allow him to check which ones he wants to use, and we automatically pre-fill one credit per category so he doesn't have to do anything if he wants to take the defaults. At the bottom of the screen are two buttons: 'Submit to CQ' and 'Print Paper Application'."

The "submit" button will place all the selected QSOs into a file for the award manager to access, while the "print" button will generate a printed list to be submitted along with the traditional application. PLEASE NOTE that ALL applicants must send the award fee payment to the CQ Award Manager, regardless of how the application is submitted. Some CQ award managers are now accepting PayPal; see individual award web pages for details. All awards will continue to accept traditional QSLs as well as eQSLs. For the USA-Counties Award (USA-CA), applicants must note on their record books (or printouts) whether each county has been confirmed traditionally (with an "X" to the right of the entry) or electronically (with an "E" next to the entry).

For more information on eQSL, visit: http://www.eQSL.cc
For more information on CQ awards, visit the awards page on the CQ website at <http://www.cq-amateur-radio.com/>. Please note that the award rules posted on the website have not yet been updated to reflect the acceptance of eQSLs. This will be done as soon as possible, but the policy takes effect immediately.

The first Amateur Lunar tests & contacts 1953-1970 (at OK2KKW page)
Lunar DX on 144 Mc! [1953] W4AO and W3GKP Bounce 2-Meter Signals Off the Moon - OUR COVER: Aiming an antenna at the moon is an exacting proposition. Our cover shows W4AO, left, and W3GKP checking the alignment of the 20 wavelength stacked rhombics used for Project Moonbeam. Listening to the wire recording from which the above graph was made, it doesn�t sound like much; a one-second beep, an interval of receiver noise, then a wavering trailing bee-e-e-e-p barely discernible in the midst of the slightly musical rushing sound that is characteristic of high-selectivity reception. You wouldn�t be impressed if you happened to hear it casually, but to Ross Bateman, W4AO, and Bill Smith, W3GKP, it was music of the sweetest sort...

Very bad NEWS de Matej, OK1TEH, abt. PZ5-EME-Trip, dated 2008-09-18
"I'm sorry to announce that the VHF EME part of PZ5Z expedition was canceled. We had some problems with local 2m license as well as with possible QRM from 20m far HF yagies with everyday QRO (PZ5Z license is valid only for PZ5RA's QTH). However we don't give up and would go there for 100% EME expedition without HF during spring or summer 2009. If we know the date & details for sure, we will announce it in time at MMM VHF & ok2kkw.com" 73 de Matej, OK1TEH

Aloha to all: I will be in northern Canada again on the 25th Sept. DO69, slash VE5. I have some telemetry to install at a uranium prospect there and will be taking some 144 Mcs. gear. I will run meteors on 144.143, FSK, always second. I am not much for the Ping Jockey but others will likely announce my presence. I am likely to be active after 0000z the 26, 27 and 28 September (25, 26 and 27th September USA) I'll have a travel style 17b2 and my 400 watt puddle cooled brick (upside down TE Systems in a puddle of water, I have many of you with this from many DXCC locations, don't laugh, much less power budget than DC fans)...... Until then, see some of you on the 144 Sprint Monday! Hope to work you, Jeremy w7eme

GB1CM, which is to commemorate the first anniversary of the loss of the rally driver Collin McRae, will be on the air during the month of September on 80m through to 6m on SSB. The call sign 'GB1CM' is to commemorate the first anniversary of the tragic loss of life of 'Colin McRae' on the 15th September 2007,the greatest British rally driver ever, winning the 1995 WRC title along with being the British Rally Champion in 1991 and 1992, I feel Colin McRae was well loved and best known for is exploits with his 'Subaru Impreza'in the WRC events. Members of the Bittern DX Group will be once again operating GB2TX raising awareness and funds for the British Wireless for the Blind Fund over "Transmission 2008" weekend (20th - 21st September) @ EMCY Garden Centre, Holt in Norfolk. Last year GB2TX scooped both club Transmission trophies for most contacts of 1165 QSOs and most funds raised of �1750, which was a staggering 31% of the National

total raised by the event. Please help us to help others by giving us a call and if you feel so inclined, we can also accept donations online, remember every pound helps. We'll be QRV most bands from 70cm - 160M, mostly SSB, FM and some CW. 73 Keith Martin "G�GFQ"

2008 FALL CLASSIC DX EVENT (Sponsored by the CountryuncleDX Group). Ron, K4SX, reports the following on September 17th: "It is my pleasure and privilege to announce today the first annual Fall Classic DX Event sponsored by www.countryuncledx.com. This DX Event has been founded for the primary purpose of generating enthusiasm for DXing, Amateur Radio, and to provide an inclusive way for Hams who do not like to 'contest' but would enjoy a way to compete over a longer period of time than a weekend without calling 'CQ Contest'. So the 2008 Fall Classic DX Event has been developed and launched for Amateurs to participate and enjoy DXing.

The Event begins on October 1, 2008, and ends December 31, 2008. All event information can be found at www.countryuncledx.com or you can E-mail K4SX or N4DA for information and details.

I should also mention that this event is not intended to compete with or preclude any other DX competition or contests. It is worth also noting that all DX contacts made in contests during the event period may and will be counted.

I hope you decide to post this to your website and newsletters and that you plan on joining in and having some DX fun! If you have any question, please contact N4DA@bellsouth.net ..."

3B7, ST. BRANDON ISLAND. Rachid, 3B8FQ, is planning to activate St. Brandon Island as 3B7FQ, in October. The dates of the operation have not been determined. As in April, when Rachid operated 3B6FQ from Agalega Is., this will be a working trip, with on-air activities shared with meteorological maintenance duties. Rachid's 3B6FQ operation netted almost 500 QSOs from Agalega.

More specific details will be disseminated closer to the departure date. QSL all of Rachid's operations via K5XK. Ron reports that he has moved to a new QTH, delaying some QSL replies for 3B8FQ and 3B6FQ. Cards for both operations are printed and replies to all direct requests will be mailed within the next week. Bureau requests that have been received will go out in October.

K5XK is also the QSL manager for the current 5Z4/RW1AU operation. See www.qrz.com/k5xk for detailed QSL information.

3V, TUNISIA. Dmitry, RW4WM, will be active as 3V8SS from Sousse between September 29th and October 8th. Look for activity on CW and SSB, with some RTTY. QSLs for this operation go via RW4WM, direct or by the Bureau.

5Z, KENYA. Valery, 5Z4/RW1AU, continues to be quite active from Nairobi and is currently, only on 20 meters SSB, but a keyer is enroute, and if it arrives safely, Val will be very active on CW in the near future. The keyer will remain at the 5Z4RS club station for others to use after his departure. Since Val is on a temporary work assignment, it is not known how long how long he will be in Kenya. Look for Val on weekends, and periodically on weeknights after work (after 1500z). Val will reply to eQSL requests and should have his LoTW documentation completed soon. QSL via RW1AU's instructions on QRZ.com; Val's QSL Manager, K5XK, has a new address, which is also "OK" on QRZ.com. Printed color QSLs are being printed and will be mailed out within the next 2-3 weeks.

8Q7, MALDIVES. Mark/M0DXR, and his XYL Gemma/2E0WPX, (who were just married this past weekend) will be here on their honeymoon between September 22nd and October 5th. Both are expected to be active as 8Q7XR and will be operating on CW and SSB on 40-10 meters using an IC-7000 and a G5RV dipole. QSL via M0DXR, direct or by the bureau.

A2, BOTSWANA. Just a reminder that Sigi/DL7DF and a team of operators will be active as A25/DL7DF this week from Botswana between September 23rd and October 6th. LAST MINUTE UPDATE: Paul, A35RK, talked to Mike and Jan at 0330Z, Sunday, and here's their story: The weather is still a problem for them...high winds and rough seas are making it difficult. Transporting equipment ashore is a bit hazardous, so Mike has only been able to erect dipoles for 20 and 17M. The BigIR set-up will have to wait for 2-3 days when the winds are forecast to abate. But the good news is that they are established on shore, and Mike has been active on CW. They will be there for awhile, so the IOTA crowd should be happy with that."

VK9, WILLIS ISLAND (Update). Chris, DL1MGB/VK9DWX, reports on September 19th in News #7 (an Excerpt) - Young DXpeditioners on Willis:

"We have decided! It was a very difficult decision for us, we have got 22 applications, all of them avid contesters and DXers, unfortunately some of them did not meet the age criteria, others with visa-problems had to withdraw. Two of them were outstanding in performance, dedication and commitment. These two rookies to join our expedition to Willis Isl. are:
   * On the first part: W4WJF, William Joshua (Josh) Fischer, from North Carolina, USA, 21 years old
   * On the second part: ZS6DXB, Rhynhardt (Rhy) Louw from JHB, Rep. of South Africa, 25 years old

We are very happy to announce this decision to the DXers community and hope that this will encourage further DXpeditions to take similar or even better approaches to promote and "elmer" young DXers and Contesters.

Preparations
****

All our preparations are entering the final stage. 1.4 tons of material are on its way and as our carrier told us, it is about to arrive in Australia with the "MS Ute Oltmann" in these days.

There will be a vanguard consisting of Joerg (DL8WPX), Gerd (DJ5IW) and Robert (SP5XVY) who will fly to Cairns by Friday 26th, followed by Dieter, DL8OH, who departs two days later. They will meet our man in Australia, Dale (VK4DMC), and together will take care of all necessary work, in particular, to meet our boat charter, get all material cleared and all additional purchases done. The idea is to fight Murphy as effective as possible and to prepare the departure of our vessel, the "MV Floreat", as actual as we can, before the crew steps in and the show will begin. We will keep you informed!"

Check their Web site for more details in the next 2 weeks at:

http://willis2008.dl1mgb.com/index.php

The team is still looking for donations. For details on how to help, please visit: http://www.vk9dwx.de/howtohelp/index.php

ConDX/SolarActivity: Yesterday Space Weather News reported "an
encouraging sign that the 11- year solar cycle is indeed progressing"
as a new Cycle 24 magnetism has formed what appears to be two fast
growing planet earth sized sunspots (1002). The two spots were
discovered late on Sunday September 21st. These are cycle 24 activity
as they are located well above the sun's equator high in the northern
latitude. This new activity also has the magnetic polarity of Cycle 24.
You can see the new cycle 24 spots at http://tinyurl.com/3rcr84.

5R8EM LH42 still qrv 144 MHz EME - Since saturday 20th the group made QSO to QSO on 144 MHz EME-QSL please via Jacques F1BCS... Hi there, thank you very much for the many contacts on144 EME, please have a look at 5r8em.blogspot.com for the latest news and take the opportunity to call us for this last pass. We were still 'blackout'ed by the unknown local noise which was putting our smeter to S9 for hours (at least until 4am UTC and for the moon set). Nevertheless, we got new calls on the list, and it's fun ! Now, the next pass will be the last pass for us and we would love to get new ones and/or some big guns calling us again in order to ear the bagpipes sounds again.
See you 5R8EM - SOURCE: tnx JM, F1HDI, via MoonNet and own BLOG

NEW SUNSPOT (From Space Weather News -- dated for Sept. 22nd, 2008): For the first time in months, a significant sunspot is emerging on the sun. It is a fast-growing active region with two dark cores, each larger than Earth. The magnetic polarity of the sunspot identifies it as a member of new Sunspot Cycle 24. Because the year 2008 has brought so many blank suns, some observers have wondered if we are ever going to climb out of the ongoing deep solar minimum. Today's new sunspot is an encouraging sign that the 11-year solar cycle is indeed progressing, albeit slowly."

SILENT KEY. It was reported that Jens, OZ5MJ, became a "Silent Key" (SK) this past Sunday, September 21st, at the age of 77 years. Jens was a well-known DXer who was on the DXCC Honor Roll,he was also a very active DXer. Whenever there was a DXpedition, Jens could be found in the pile up. One of his biggest interests was IOTA hunting, and we are sure that many IOTA DXpeditioners will remember working him. He was on the IOTA honor roll listed with 982 islands. Thanks to him, IOTA EU-171 and EU-172 were added to the IOTA list back in year 2000. He was also very interested in RTTY and PSK31, and operated in quite a few RTTY contests over the years. He also enjoyed hunting for U.S. counties as well. OPDX and its readers would like to send out our deepest sympathy to the family and friends of OZ5MJ.

Hi Andy, I will be using a Icom ic706MK2G, power will be 100 watts 6-80m, no amp this trip. We have no planned schedule at this time where Bill W4WV (KG4WV) and I will share the antennas. After 2006 and 2007 outbursts, predictions say that Orionids activity will be much higher than normal also in 2008. While the �traditional� peak is expected on october 21, another maximum, related to the encounter with an ancient dust trail, ejected in year -1265 and rich in bright meteors, is expected to occur on October 19, between 02.13 and 08.08 UT.

IARU ENDORSED BOOKLET PROMOTING ETHICS. Bill Moore, NC1L, ARRL Awards Manager, reports on the DXCC Blog Web page: "A 67-page booklet, 'Ethics and Operating Procedures for the Radio Amateur' by John Devoldere, ON4UN, and Mark Demeuleneere, ON4WW, is available for free download from the ARRL Web site. The booklet is an 'Americanized' version of the booklet that the authors wrote for an international audience. An international

version is also available. At its June 2008 meeting, the IARU Administrative Council endorsed and recommended the principles set out in the booklet as a means of encouraging all radio amateurs 'to operate to the highest levels of proficiency, with proper consideration for others using the amateur radio bands' and as a tool 'to teach newcomers and others correct operating behavior.' The booklet mainly addresses HF operating issues, but the principles are also applicable to VHF and higher bands. ARRL Chief Executive Officer and IARU Secretary David Sumner, K1ZZ, expressed appreciation for Devoldere's and Demeuleneere's efforts: 'The authors are well known, experienced HF operators who are concerned about on-the-air operating standards and who decided that 'It's better to light a candle than curse the darkness.' Anyone who reads their booklet will learn something, no matter how experienced they may be.'" The Web link for the booklet is:

QSL INFO AND NEWS....................

7X5VRK QSL Manager STATUS (NOT). Steve, N3SL, reports "After a long wait, I have finally made contact with the Bou-Saada Radio Club, 7X5VRK. They DO NOT use a QSL Manager, and claim they never have. So, I'm not sure how Mac, W3HC, had cards for them. Be that as it may, please announce that I am not the 'new' manager for 7X5VRK. I will be returning all cards on hand to their senders, as well as any donations that were enclosed. I will update sites like QRZ, IK3QAR, etc. The route for 7X5VRK, per 7X5AV, Djamel, Club Manager, is: BOU-SAADA Radio Club, PO Box 300HB, Bou-Saada 28200, ALGERIA."

NEW QSL MANAGER. Petr, OK1DOT, informs OPDX that he is now the QSL Manager for Walter, 9G5SW. Petr is also the QSL Manager for: 3W22S, 3W3W, 9M2/G4VGO, 9V1GO, EP4SP, HK1AR, HK3KAV, NL7G, TG9AKH, WP3F, XV1X, XV9DT, YB1JZS, YB5AQB, YI9CC and ZS6CCY.

TO5FJ QSLING. Paul, F6EXV, states (edited):"Hello all, 9 months after the expedition to St. Barth, I am still receving cards almost daily. I would like to stop answering direct requests and will confirm every QSO in the log with a bureau card. I AM NOT CLOSING THE LOG, but would be grateful to those intending to request a card direct to do so without further delay. The log has been uploaded to LoTW, and can be checked on my webpage <www.f6exv.org>. I will QSL the left-over labels (I printed all the labels for all the contacts, and the left-overs are those for which a card request has not been received yet) via bureau by December. The bureau card requests received to date have already been answered (and also those with insufficient postage)."

UA4WHX QSLS. Several DX mailing lists report that the editor of "The Daily DX" (Bernie, W3UR) has indicated the following: "Many DXers have been asking about the status of the QSLs for UA4WHX, Vladimir. He was the operator of 3DA0VB, 4K0VB, 4L0B, 5H3VMB, 5R8VB, 5X1VB, 5Z4/UA4WHX, 7P8VB, 7Q7VB, 9J2VB, 9U0VB, 9X0VB, A25VB, C91VB, D20VB, D60VB, J20VB, OD5/UA4WHX, ST2VB, V51VV and Z2/UA4WHX. Over 310,000 QSOs were made and hand logged. The QSLs are beautiful photo cards and are also being hand written. They are definitely worth the wait. Vladimir tells 'The Daily DX' that about 50% of the direct QSL cards have been answered. He does not think the job will be completed by year's end. Do not resend at this time as it will only slow down everything. DXers who are waiting for their QSLs can ask about the status via E-mail to UA4WHX. His address is listed on QRZ.com."

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and K4UEE for the following DX information.

Press Release # 1----Desecheo KP5----2009

The Caribbean National Wildlife Refuge Complex has selected and announced a team of operators to activate Desecheo Island (KP5) sometime between January 15, 2009 and March 30, 2009. The Team will be co-led by Dr. Glenn Johnson, W0GJ and Bob Allphin, K4UEE.

Background: On June 30, 2008, the Caribbean National Wildlife Refuge office in Puerto Rico sent a letter to persons that had previously made inquiries about an Amateur Radio operation from Desecheo. They announced their decision to allow one group to activate the island and invited proposals that must adhere to strict guidelines and criteria. Applicant�s had 45 days to prepare and submit their proposals.

CNWR received seven written proposals. A panel of three Fish and Wildlife Service employees, from areas within the Service outside of the Caribbean refuge, spent September 24 & 25 reviewing and evaluating the proposals. The selection criteria used were those outlined in the proposal invitation letter. Points were awarded for how well criteria were addressed for thoroughness and documentation.

The proposal with the highest ranking was submitted by team leaders Dr. Glenn Johnson, W�GJ, and Bob Allphin, K4UEE.

Their plan involves a team of fifteen operators for a 14-day operation. USFWS has not announced the actual dates of the operation yet, but the DXpedition is expected to take place between January 15, 2009 and March 30, 2009. A Special Use Permit (SUP) will be issued as per USFWS regulations. We expect that the DXpedition team and DXers worldwide will have a minimum of 30 days notice.

A website is being planned and will be announced in the near future.

very late addition to the party, but when the suggestion was made,
I thought it too good to pass up. I will be modifying the online

And if anyone knows of any Hams who might be interested in
participating for the award, please pass this along to them.

For the next Strange Radio Event, 17..19 October 2008, I will be on
the air with the special callsign II2SRT/6 from JN62WM ;
it is a country house on a good position high on a hill, but sorrily
I will not have beams .. I will rely on a 18AVT from HiGain and hope
to be able to erect a 160 - 80m dipole too. The station will be
equipped with my old one: IC746 IC2KL and AT500, plus an IC7000 .
It will be a single operator operation, I'll be there from 16th October
to 20th October . As you know the SRE will be held only in Phone mode.
Being a special Call Station, I'll be allowed to operate all bands,
so I'll do 160 to 6 m if propagation allows me. I wish we will have a
good propagation, good weather and no qrm, and more , no storms. I hope
to meet you on the air, and wish you all the best DX on this Event.

Friends, The odds of once again experiencing all the challenges
that haunted me during my 2008 Six Meter trip to the Caribbean are

impossibly high so it is with much confidence that I happily announce that I will return to San Andres 5J0 in 2009. Even limited to 100 W and poor Es, a number of EU stations made it into the log during two brief openings during the troublesome trip. I am determined to prove that San Andres Island is not "One Hop Too Far"! I will add a second op to help raise a longer boom yagi and promise to insure that the KW amp is not knocked about by Customs. Preliminary on-the-air dates are June 17-July 5. A new website for 5J0M Caribe 2009 is now active at: http://www.qth.com/k7bv/caribe2009

VU7, LAKSHADWEEP ISLANDS. OPDX received the following press releases from our friends at the NIAR in India.

Release #1

(Edited)

Dear Friends,
Greetings to the Ham world from India ! ! !

It gives me a great pleasure in informing you that VU4 and VU7 will be activated again this year as part of NIAR Silver Jubilee Celebrations in October 2008.

The necessary clearances have been obtained; the formal permission letter for VU4 and VU7 activity will be issued shortly. The callsigns will be VU4MY, VU4RG, VU7NRO & VU7SJ.

I would like to thank all the applicants who have supported us and joined hands to strengthen amateur radio activity in India. The VU4 and VU7 will be activated by teams of Foreign and Indian amateur radio operators. Names and other operational details will be given by the respective teams.

We profoundly thank the all the concerned government agencies like the Ministry of Defence, Home Affairs and External Affairs as well as the Ministry of Communications and Information Technology for their continuous support to amateur radio activity in the country.

It is the third time for three years in a row that the Government of India has extended its full support to foreign and Indian radio amateurs to operate their amateur radio stations from remote Islands of Andamans and Lakshadweep. The simultaneous amateur radio activity from these two Islands is a path breaking achievement for NIAR during the year of Silver Jubilee.

We wish all hams to join us to support our vision and mission to strengthen amateur radio promotion in India.

Look forward to meet you on the band.

Thanking you.
With Regards,
S.Suri, VU2MY
Founder & Chairman, NIAR Web site: www.niar.org

CQ0DSM B is the call sign of the most recent D-STAR repeater radio station in operation since October, 3rd, 2008 in Portugal.

Located in Serra de S=E3o Mamede / Portalegre, Portugal, but only a few Km of the border with the Autonomous Community of Extremadura in Spain, this device is by now only on a test phase.

The entire project, as well as the official operational licence, goes to A.R.R. (" Associa=E7=E3o de Radioamadores do Ribatejo ").

This regional ham radio association would like to express a public gratitude, appreciation and recognition, regarding all those colleagues who helped on the accomplishment of such remarkable motivating project.

This assignment was only possible thanks to group of financial contributors, all dedicated to pursuit the intended goal right until the end.

According with the plan, a gateway connection is now ready and will be accessible soon. The preliminary works of this first intervention had in mind a simple start of the repeater on its basic, but full functional, features.

Obviously time is never enough and, as usual with amateur setting up's, a few unpredictable " Murphy's law " events had a say in order to postpone some important efforts for the next visit.

Below we let you with the previously announced data and TRX configuration tips :

UHF Channel: RU680.
Call Sign: CQ0DSM B
TX Repeater: 438,500 MHz.
RX Repeater: 430,900 MHz.
Shift: -7,6 MHz.
RF Power: 15 W.
QTH local designation: Serra de S=E3o Mamede / Portalegre.
Geographic Location: N 39=BA 18` 45,50" / W 007=BA 21=B4 30,72"
Locator Maidenhead: IM69hh.
Altitude (ASL): 1025m.
Heading: Omni Vertical.
Mode: GMSK.
DesEmi: 6K00F7W.
Internet Gateway: Not Available at moment, will be accessible soon.
Licence owner and maintenance responsibility: A.R.R. - Associa=E7=E3o de Radioamadores do Ribatejo.

This Local Ham Radio Association have join efforts with NAUCOM (Icom's delegate company for Portugal), and thanks to ICP-ANACOM - (the equivalent to FCC in Portugal) conformity, the project have become achievable.

More info soon in website of A. R. R. : http://www.ct1arr.org

For information of those interested in 70 MHz. CEPT WGFM finally approved
the 2008 version of the European Common Allocation table at its recent
meeting in Baku. It was published on the ERO web-site 7 October and
includes footnote EU9 against the bands 68 - 70.45 MHz and 70.45 - 74.8
MHz. EU9 reads "In a growing number of CEPT countries, parts of the band

70.0-70.5 MHz is also allocated to the Amateur service on a secondary basis." The Baku approved version of the ECA can be downloaded at:
http://www.erodocdb.dk/Docs/doc98/official/pdf/ERCREP025.PDF
This is the first international radio regulatory recognition of the 4m amateur band since Radio Regulation 182 in the ITU International Radio Regulations, Atlantic City 1947 which states: In France and the USSR the band 72 - 72.8 Mc/s is allocated for the amateur service. Lets hope that many more countries release all or parts of the 4 m band. Once 10 countries openly support the sense of EU9, it is theoretically possible to ammend the ECA to actually include an allocation to amateur service in the body of the European frequency table. 73 Dave

A Team of AD6E Al, G3KHZ Derek, CT1AGF Luis, K6MYC Mike and W5GAI Skip will activate the very rare DXCC P2, Papua New Guinea
LATEST (parts of) NEWS from Lance, W7GJ, dated 2008-10-07:
In case anyone has not heard, I am sending out information again, this time with additional information I have received from K6MYC and W5GAI. Mike advised that all his flights are confirmed for an October 15 departure and his visa is in hand! This is an unprecedented opportunity to contact a rare but very well equipped DXCC on VHF! Expected dates of operation are as follows (dates not shown are travel dates): P29VLR (in QI45UM) Oct. 21-26 - P29NI (in QI28mm) Oct 29 - Nov 3 Conditions for EME begin to deteriorate during the first few days of November, so stations are advised to try to contact Mike in October, as early as possible in the trip. Mike is encountering over $2100 extra equipment shipping charges - in addition to his personal plane and boat traveo costs. Each contact will be at a huge dollar investment Please do what you can to make the dXpedition successful and also contribute what you can to the costs.

NEW SUNSPOT REPORTED. Space Weather News (http://spaceweather.com) reports on October 11th: "A 'new-cycle' sunspot belonging to Solar Cycle 24 is emerging near the sun's northeastern limb. This is the third time in as many weeks that a new-cycle sunspot has interrupted the year's remarkable run of blank suns. The accelerating pace of new-cycle sunspot production is an encouraging sign that, while solar activity remains very low, the sunspot cycle is unfolding more or less normally. We are not stuck in a permanent solar minimum. Readers with solar telescopes should train them on the sun this weekend to observe sunspot genesis in action."

After 35 years, I have finally rewritten my moontracking program in Visual Basic 6.0 so it will run on these newfangled Windows operating systems ;-) I received a suggestion to provide calculation of common moon windows between two horizon-only stations and you will now find that common window times are determined by variable elevation windows at both stations. This should be especially useful for horizon-only stations, although any other elevation constraints (such as higher elevations for dishes) can also be specified. Some of the other annoying glitches in the old DOS program have been removed. The latest updated application and help files for Version 1.01 are now included in the zip file at: http://bigskyspaces.com/w7gj/GJTRACKER.zip

After the unsuccessful attempt to activate Gibraltar again in 2008
which was made impossible due to the total lack of support from the
local ham radio association GRAS (who did not express their consent
for a special QRO licence for 400 watts out which the Gibraltar

so) Frank and I decided to activate GU Guernsey mainly on 2m EME.

Pacific Tour. Update. JA8BMK, Toshi, is currently on Tarawa, Western
Kiribati, T30, waiting for a ship to take him to Canton Island, Central
Kiribati, T31. He started operation from Tarawa with the T30XX callsign
yesterday. QSL via JA8BMK, direct only. He expects to be active until
October tenth, all bands, CW and SSB. Toshi says he's noticed there
are a lot of changes on Tarawa, no more direct flights to C2 or V7
and no more direct flights to T32, East Kiribati, from Fiji, 3D2.
It is still difficult to get to T33 as well. He was lucky to find

a government- chartered ship to T33, which will leave in mid-November, a long time to wait but it can't be helped. This is Toshi's third "attack" on T31 and, "it is a really hard and expensive business for solo expedition." And, no matter how you reach the island, there is no guarantee of a return within a couple of months. Toshi has an advantage that he's retired, so he does have the schedule flexibility, but he says he misses his dog, Jackie. He has a satellite telephone a long this time. Here is his current schedule:

T30XX	Tarawa	October 5-10	confirmed
T33ZZ	Banaba	October 12-22	confirmed
T31DX	Canton	November 20-December 5, booked on the cargo ship

Meteor Scatter: HIGH Orionids shower activity expected !
After 2006 and 2007 outbursts, predictions say that Orionids activity
will be much higher than normal also in 2008. While the �traditional�
peak is expected on october 21, another maximum, related to the encounter
with an ancient dust trail, ejected in year -1265 and rich in bright
meteors, is expected to occur on October 19, between 02.13 and 08.08 UT.
Read more at our MS-Propagationpage (http://www.mmmonvhf.de/ms.php)
where you can find data concerning upcoming meteor showers in October.

Colin, G4ZJF, spread some interesting words on our FORUM about WSJT.
There is a JT65 decoding problem on WSJT 5.9 and later. Several EME'ers
still use Version 4.X of WSJT for receiving as it seems to decode more
than the later versions. What I have discovered on the later versions
if you switch ON the 'Quick Decode' (Decode\JT65\Quick Decode on Menu)
it decodes signals that it won't with the 'Quick Decode' switched OFF.

GM4DHF/p will be qrv 144 MHz (as well MS) from IO78HF
Following our enjoyable walking holiday to the Isle of Skye (IO67) in
August, Jan and I have rented another holiday cottage in the far North
of GM. We have to travel on Saturday 25th and so will miss a day of
operation. On 2M I will be using between x1-x4 yagis and 250W, which
will be determined by the layout of the cottage/land and not known
until my arrival. I will also probably take a small 70cm beam and 100W
in the hope of some excellent tropo conditions. If they are poor, I
will be active on FSK441 MS on 144Mhz ... read more details at:

MU/DH7FB and MU/DF2ZC (IN89RK) 17 - 20 Oct 2008
After the unsuccessful attempt to activate Gibraltar again in 2008
which was made impossible due to the total lack of support from the
local ham radio association GRAS (who did not express their consent
for a special QRO licence for 400 watts out which the Gibraltar
Regulatory Authority considered to grant us - had the GRAS only done
so) Frank and I decided to activate GU Guernsey mainly on 2m EME.

ZoneProp uses an widely accepted propagation engine to determine the band on which a contestant in one CQ DX zone is likely to be able to contact a contestant in another CQ DX zone taking into account the current geomagnetic activity.

ZoneProp produces a 40 zone by 40 zone matrix that is updated hourly at approximately 20 minutes past the hour. The intersection between a row and column gives the band on which a contestant in the zone represented by the row is mostly likely able to contact an contestant in the zone represented by the column. The zone numbers in the left hand column are clickable. Once clicked the information for that zone is displayed in isolation above a map of CQ DX zones. The pages are refreshed every 10 minutes in order to capture hourly updates of the matrix."

We both shut down when his moon reached 20 degrees elevation and we had not decoded anything from him. As I was shutting things down here, I noticed a decode pop up at 1543Z on the backup computer that was still running.... SOURCE: Lance, W7GJ, [Magic Band EME]

A Team of AD6E Al, G3KHZ Derek, CT1AGF Luis, K6MYC Mike and W5GAI Skip will activate the very rare DXCC P2, Papua New Guinea
LATEST NEWS from Joop, PA0JMV, dated 2008-10-23 07:30:
Mike finally showed up on 144.125 on Oct 22 after his moonrise. He worked KB8RQ, W7GJ, W7IUV , maybe more. I started listening at the beginning of the groundgain lobe at my moonrise, today Oct 23. First sigs (-25dB) showed up at 00:28 while he was sending OOO for RA6AX. His signals were fast drifting, so he must have switched on at athat time, later the sigs were stable. I saw him calling-working IK1UWL, DL8YHR but NC, DK3BU, I2RV, DF2ZC, PA0JMV, ES6RQ and then I went to bed again after some 45 minutes of excitement. My groundgain had ended as well. His best sigs were about -24dB but KB8RQ mentioned problems with the big PA in P29, so he must have used his spare 350w brick. Mind the high values of DPOL for the EU-window, that makes it complicated! 73 Joop   ... as well got the info pe1l sm5cui ra6ax oz1lpr dl8yhr and vk2ku shall be complete meantime (ed DL8EBW)...

DX Special Bulletin No. 881.1

BID: $OPDX.881.1

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and VK2HV for the following DX information.

The following VK9DWX press release was received from Paul, VK2HV:

News #12 - 25.10.2008

The Willis Islands Group, Mid Isl. Thursday, October, 25th

Due to heavier winds to be expected on Monday we have to take down the complete camp tomorrow on Sunday October 26th and transport all equipment to the Floreat. That means that we will stop radio operation latest on October 25th at about 22:00z. We want to have a controlled shutdown and a secure trip back to Australia mainland for all members and all of the equipment. Therefore we have to leave earlier as planned.

We will take part in the CQWW SSB Contest for the first 24 hours with three stations. The remaining stations will be still available for WARC operation.

We did the last onlinelog update for now. This includes all QSOs till 25.10.2008 00:00z (before the contest). We will put all QSOs to the online log when we are back home.

More information will be available after our return to Australia.

Vy 73s VK9DWX team

We would be delighted if DX editors would publish this information as widely as possible and DXers bring it to the attention of their clubs and fellow DXers.

My information was inaccurate, I'm sorry. EA stations can use ONLY 70.150 AND 70.200 MHz (with a bandwith of 12 KHz), but NO other frequencies between 70.150 AND 70.200. The official text is at:
http://www.ure.es/legislacion/4-reglamentacion/1075-resolucion-autorizando-la-banda-de-70-mhz-de-forma-experimental-y-segmentos-de-160-m-.html
It says that we are granted the frequencies 70.150 MHz AND 70.200 MHz with an apparent radiated power of 10w and a max.bandwitdh of 12 kHz.

SAARS will be activating Little Talbot Island (IOTA NA-138) from noon Saturday Nov 15 noon Sunday Nov 16th. All hams are invited to join us and participate in the fun. LATEST NEWS from Andy, N8OFS, dated 2008-10-31: Our current plans are to transmit part of the time on 6 meters. The island is a state park and due to some restrictions we can only put up one antenna so we will only have one operation radio. We have decided that whoever is operating the radio will have the choice of band and mode so I don't have a set schedule. If you want we can try to work out some skeds with you. If I get more details then I'll forward them to you. Marshall Harrison - W4MKH

Operators George/AA7JV, Tomi/HA7RY, Pedro/HK3JJH and Fero/ HA8MT will be active as 5K0T (not 5J0T as first announced earlier in the week this is to avoid possible conflict with a previous operation.) from Bajo Nuevo (IOTA NA-132) and Roncador Bank (IOTA NA-133) between November 19th and December 2nd. We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

hello all,
I am looking, for any of the following Beko amps please, as I can't seem to find them anywhere, even on ebay!

HLV-500 for 23cm
HLV-700 for 70cm
HLV-1200 for 2m
or if possible, would prefer:
HLV-1000 for 23cm
HLV-1400 for 70cm
HLV-2400 for 2m

I would prefer, if possible, to get them from somewhere in the UK, or europe, but, as these are proving so hard to find, would appreciate contact details of any place that I could find them, or anyone who is selling any of them, as long as they are in full working order, and good condition, and as long as they ship to the UK.

please contact me, using any of the details below, if you can help me,thanks.

This interesting report shows/compares graphic illustrations of the current SC23-SC24 transition period and other SC put together by David Archibald. To view this report, go to:
